

Table of Contents

INTRODUCTION.....	1
About This Book	1
Conventions Used in This Book.....	2
Foolish Assumptions.....	2
Icons Used in This Book.....	3
Where to Go from Here.....	3
CHAPTER 1: An Overview of Geometry.....	5
The Geometry of Shapes.....	6
One-dimensional shapes	6
Two-dimensional shapes	6
Three-dimensional shapes	6
Geometry Proofs	6
Am I Ever Going to Use This?	7
When you'll use your knowledge of shapes	7
When you'll use your knowledge of proofs	8
Getting Down with Definitions.....	9
A Few Points on Points	11
Lines, Segments, and Rays	12
Horizontal and vertical lines	12
Doubling up with pairs of lines	13
Investigating the Plane Facts	14
Everybody's Got an Angle.....	14
Five types of angles	15
Angle pairs	16
Bisection and Trisection	18
Segments	18
Angles.....	18
CHAPTER 2: Geometry Proof Starter Kit.....	21
The Lay of the (Proof) Land.....	21
Reasoning with If-Then Logic.....	23
If-then chains of logic	24
Definitions, theorems, and postulates.....	25
Bubble logic	26
Complementary and Supplementary Angles.....	27
Addition and Subtraction	29

	Addition theorems.....	29
	Subtraction theorems	33
	Like Multiples and Like Divisions.....	34
	Congruent Vertical Angles.....	36
	Transitivity and Substitution.....	37
CHAPTER 3:	Tackling a Longer Proof.....	41
	Making a Game Plan	42
	Using All the Givens	42
	Using If-Then Logic.....	43
	Chipping Away at the Problem	45
	Working Backward	47
	Filling in the Gaps	49
	Writing out the Finished Proof.....	49
CHAPTER 4:	Triangle Fundamentals.....	51
	Taking in a Triangle's Sides.....	51
	Scalene triangles.....	52
	Isosceles triangles.....	52
	Equilateral triangles.....	52
	Triangle Classification by Angles	52
	The Triangle Inequality Principle	53
	Sizing up Triangle Area	54
	A triangle's altitude or height	54
	Determining a triangle's area	56
	Regarding Right Triangles	57
	The Pythagorean Theorem	58
	Pythagorean Triple Triangles.....	60
	The Fab Four triangles.....	61
	Families of Pythagorean triple triangles	61
	Two Special Right Triangles.....	64
	The 45°- 45°- 90° triangle	64
	The 30°- 60°- 90° triangle	66
CHAPTER 5:	Congruent Triangle Proofs.....	69
	Proving Triangles Congruent	69
	SSS: The side-side-side method	70
	SAS: Side-angle-side.....	72
	ASA: The angle-side-angle tack.....	74
	AAS: Angle-angle-side	74
	Last but not least: HLR	75

	Taking the Next Step with CPCTC	75
	Defining CPCTC	76
	Tackling a CPCTC proof	76
	The Isosceles Triangle Theorems	79
	The Two Equidistance Theorems	81
	Determining a perpendicular bisector	81
	Using a perpendicular bisector	83
CHAPTER 6:	Quadrilaterals	85
	Parallel Line Properties.....	85
	Parallel lines with a transversal.....	85
	The transversal theorems.....	87
	The Seven Special Quadrilaterals	89
	Working with Auxiliary Lines	90
	The Properties of Quadrilaterals	93
	Properties of the parallelogram.....	93
	Properties of the three special parallelograms.....	95
	Properties of the kite.....	98
	Properties of the trapezoid and the isosceles trapezoid.....	99
	Proving That You've Got a Particular Quadrilateral	100
	Proving you've got a parallelogram	100
	Proving that you've got a rectangle, rhombus, or square.....	103
	Proving that you've got a kite	104
CHAPTER 7:	Polygon Formulas	107
	The Area of Quadrilaterals	107
	Quadrilateral area formulas	108
	Why the formulas work.....	108
	Trying a few area problems.....	110
	The Area of Regular Polygons.....	113
	The polygon area formulas.....	114
	Tackling an area problem	114
	Angle and Diagonal Formulas.....	115
	Interior and exterior angles.....	116
	A polygon angle problem.....	117
	Criss-crossing with diagonals	118
CHAPTER 8:	Similarity	119
	Similar Figures	119
	Defining similar polygons	119
	How similar figures line up.....	121

	Solving a similarity problem	122
	Proving Triangles Similar	124
	Tackling an AA proof.....	125
	Using SSS~	126
	An SAS~ proof.....	127
	Splitting Right Triangles with the Altitude-on-Hypotenuse Theorem	128
	More Proportionality Theorems.....	130
	The Side-Splitter Theorem	130
	The Angle-Bisector Theorem	132
CHAPTER 9:	Circle Basics	135
	Radii, Chords, and Diameters	135
	Five circle theorems.....	136
	Using extra radii	136
	Arcs and Central Angles.....	138
	Tangents.....	138
	The Pizza Slice Formulas.....	140
	Determining arc length	140
	Sector and segment area.....	141
	The Angle-Arc Formulas	143
	Angles on a circle	144
	Angles inside a circle	144
	Angles outside a circle.....	145
	Keeping the formulas straight.....	146
	The Power Theorems.....	147
	The Chord-Chord Theorem	148
	The Tangent-Secant Theorem	149
	The Secant-Secant Theorem.....	149
	Condensing the power theorems into a single idea.....	150
CHAPTER 10:	3-D Geometry	151
	Flat-Top Figures	151
	Pointy-Top Figures	154
	Spheres.....	159
CHAPTER 11:	Coordinate Geometry	161
	The Coordinate Plane	161
	Slope, Distance, and Midpoint.....	162
	The slope dope.....	162
	The distance formula.....	164

The midpoint formula	165
Trying out the formulas	166
Equations for Lines and Circles	167
Line equations.....	168
The circle equation	168
CHAPTER 12: Ten Big Reasons to Use in Proofs.....	171
The Reflexive Property.....	171
Vertical Angles Are Congruent.....	171
The Parallel-Line Theorems	172
Two Points Determine a Line.....	172
All Radii Are Congruent.....	173
If Sides, Then Angles	173
If Angles, Then Sides	173
Triangle Congruence.....	173
CPCTC.....	174
Triangle Similarity.....	174
INDEX	175

About This Book
