About the Author	xvii
Introduction	1
Background.....	1
This Book.....	1
The Scientific Approach	2
Recording and Processing Uncertainties.....	3
Using a Spreadsheet	3
Controlling the Simulations	3
Thanks	4
1 Millikan's Oil Drop Experiment.....	5
Introduction	5
The Objective	6
The Apparatus	6
The Variables	8
The Physics	8
The Method.....	9
The Simulation	10
The Results.....	13
Further Discussion.....	14
2 Planck's Constant	15
Introduction	15
The Objective	16
The Apparatus	16
The Circuit	17
The Variables	18
The Physics	18
The Method.....	19
The Simulation	20
The Results.....	20
Further Discussion.....	22
3 Rutherford's Gold Foil Experiment	23
Introduction	23
The Objective	25
The Apparatus.....	25
The Variables	26
The Physics	26

The Method.....	27
The Simulator	27
The Results.....	28
Further Discussion.....	28
4 Measuring the Acceleration Due to Gravity.....	29
Introduction.....	29
The Objective.....	31
The Apparatus.....	31
The Variables	31
The Physics	32
The Method.....	32
The Simulation	32
The Results.....	33
Further Discussion.....	34
5 Average Velocity Using an AirTrack.....	37
Introduction.....	37
The Objective.....	38
The Apparatus.....	38
The Variables	38
The Physics	38
The Method.....	39
The Simulation	40
The Results.....	43
Further Discussion.....	44
6 Determining Acceleration Using an AirTrack.....	45
Introduction.....	45
The Objective.....	45
The Apparatus.....	45
The Variables	45
The Physics	46
The Method.....	46
The Simulation	47
The Results.....	48
Further Discussion.....	49
7 Confirmation of Newton's Second Law	51
Introduction.....	51
The Objective.....	52
The Apparatus.....	52
The Variables	53
The Physics	53
The Method.....	53
The Simulation	54

	The Results.....	54
	Further Discussion.....	54
8	Showing Conservation of Energy Using an AirTrack.....	55
	Introduction.....	55
	The Objective.....	55
	The Apparatus.....	55
	The Variables.....	55
	The Physics.....	56
	The Method.....	56
	The Simulation.....	57
	The Results.....	59
	Further Discussion.....	59
9	Conservation of Momentum in an Inelastic Collision Using an AirTrack.....	61
	Introduction.....	61
	Objective.....	61
	The Apparatus.....	61
	The Variables.....	61
	The Physics.....	62
	The Method.....	62
	The Simulation.....	63
	The Results.....	64
	Further Discussion.....	64
10	Hooke's Law.....	65
	Introduction.....	65
	The Objective.....	65
	The Apparatus.....	66
	The Variables.....	66
	The Physics.....	67
	The Method.....	67
	The Simulator.....	67
	The Results.....	68
	Further Discussion.....	68
11	Young's Modulus.....	69
	Introduction.....	69
	The Objective.....	69
	The Apparatus.....	69
	The Variables.....	69
	The Physics.....	70
	The Method.....	70
	The Simulator.....	70
	The Results.....	71
	Further Discussion.....	71

12	Velocity of Rifle Shell Using a Ballistic Balance.....	73
	Introduction.....	73
	The Objective.....	74
	The Apparatus.....	74
	The Variables.....	74
	The Physics.....	75
	The Method.....	76
	The Simulation.....	77
	The Results.....	77
	Further Discussion.....	77
13	Simple Pendulum.....	79
	Introduction.....	79
	The Objective.....	79
	The Apparatus.....	79
	The Variables.....	81
	The Physics.....	81
	The Method.....	82
	The Simulation.....	82
	The Results.....	84
	Further Discussion.....	85
14	Simple Harmonic Motion Using a Mass-Spring System.....	87
	Introduction.....	87
	The Objective.....	87
	The Apparatus.....	87
	The Variables.....	88
	The Physics.....	88
	The Method.....	91
	The Simulation.....	91
	The Results.....	93
	Further Discussion.....	93
15	Capacitor Charge and Discharge.....	95
	Introduction.....	95
	Objective.....	95
	The Apparatus.....	95
	The Circuit.....	97
	The Physics.....	98
	Method.....	98
	The Simulation.....	99
	The Results.....	101
	Further Discussion.....	102
16	The Internal Resistance of a Dry Cell.....	103
	Introduction.....	103
	The Objective.....	103

The Apparatus.....	103
The Circuit	104
The Variables	105
The Physics	105
The Method.....	105
The Simulation	106
The Results.....	106
Further Discussion.....	106
17 The IV Characteristics of a Diode.....	107
Introduction	107
Objective.....	108
The Apparatus.....	108
The Circuit	109
The Variables	110
Method	110
The Simulation	110
The Results.....	110
Further Discussion.....	110
18 The IV Characteristics of a Filament Lightbulb	111
Introduction	111
The Objective	111
The Apparatus.....	111
The Variables	112
The Circuit	112
The Method.....	112
The Simulation	113
The Results.....	114
Further Discussion.....	114
19 The Resistivity of Constantan	115
Introduction	115
Objective.....	115
The Apparatus.....	115
The Circuit	116
The Variables	117
The Physics	117
The Method.....	117
The Simulation	117
The Results.....	119
Further Discussion.....	119
20 Resistors in Series and Parallel	121
Introduction	121
Objective.....	121
The Apparatus.....	121

	The Variables	122
	The Physics	122
	The Method.....	123
	The Simulation	125
	The Results.....	126
	Further Discussion.....	126
21	Heat Transfer	127
	Introduction.....	127
	The Objective	127
	The Apparatus.....	128
	The Variables	128
	The Physics	128
	The Method.....	129
	The Simulation	129
	The Results.....	129
	Further Discussion.....	129
22	Boyle's Law.....	131
	Introduction.....	131
	The Objective	133
	The Apparatus.....	133
	The Variables	134
	The Physics	134
	The Method.....	135
	The Simulation	135
	The Results.....	136
	Further Discussion.....	136
23	Charles's Law.....	137
	Introduction.....	137
	The Objective	137
	The Apparatus.....	137
	The Variables	138
	The Physics	138
	The Method.....	138
	The Simulation	139
	The Results.....	140
	Further Discussion.....	141
24	Mechanical Equivalent of Heat	143
	Introduction.....	143
	The Apparatus.....	144
	The Variables	144
	The Physics	146
	The Method.....	146

	The Simulation	146
	The Results.....	148
	Further Discussion.....	148
25	Specific Heat Capacity of Brass.....	149
	Introduction.....	149
	The Objective	149
	The Apparatus.....	149
	The Variables	150
	The Physics	150
	The Method.....	150
	The Simulation	151
	The Results.....	152
	Further Discussion.....	152
26	Investigation of Mechanical Waves	153
	Introduction.....	153
	The Objective	154
	The Apparatus.....	154
	The Variables	155
	The Physics	155
	The Method.....	157
	The Simulation	157
	The Results.....	158
	Further Discussion.....	158
27	Measuring the Speed of Water Ripples	159
	Introduction.....	159
	The Objective	159
	The Apparatus.....	159
	The Variables	160
	The Physics	160
	The Method.....	161
	The Simulation	161
	The Results.....	161
	Further Discussion.....	162
28	Infrared Radiation.....	163
	Introduction.....	163
	The Objective	163
	The Apparatus.....	163
	The Variables	164
	The Physics	164
	The Method.....	165
	The Simulation	165
	The Results.....	165
	Further Discussion.....	165

29	Diffraction Using a Monochromatic Laser	167
	Introduction.....	167
	The Objective.....	167
	The Apparatus.....	167
	The Variables.....	168
	The Physics.....	168
	The Method.....	170
	The Simulation.....	170
	The Results.....	171
	Further Discussion.....	172
30	Inverse Square Law for Gamma Radiation	173
	Introduction.....	173
	The Objective.....	173
	The Apparatus.....	174
	The Variables.....	174
	The Physics.....	175
	The Method.....	175
	The Simulation.....	175
	The Results.....	176
	Further Discussion.....	176
31	Refraction of Light	177
	Introduction.....	177
	The Objective.....	178
	The Apparatus.....	178
	The Variables.....	178
	The Physics.....	178
	The Method.....	180
	The Simulation.....	180
	The Results.....	181
	Further Discussion.....	181
32	Magnetic Field Due to a Coil of Wire	183
	Introduction.....	183
	The Objective.....	183
	The Apparatus.....	183
	The Variables.....	184
	The Physics.....	184
	The Method – Current and Magnetic Field.....	185
	The Method – Number of Turns and Magnetic Field.....	185
	The Method – Radial Distance and Magnetic Field.....	186
	The Simulation.....	186
	The Results.....	188
	Further Discussion.....	188

33 Investigation of Magnetic Flux of a Current-Carrying Wire	191
Introduction	191
The Objective	191
The Apparatus	191
The Variables	192
The Physics	192
The Method	194
The Simulation	195
The Results	195
Further Discussion	195
34 Magnetic Flux Linkage	197
Introduction	197
The Objective	198
The Apparatus	198
The Variables	199
The Physics	199
The Method	200
The Simulation	203
The Results	204
Further Discussion	205
Appendix 1 Uncertainties	207
Appendix 2 Using Excel for the Results	213
Appendix 3 Controlling the Simulations	221
Index	225
