## Part I Ligaments, Tendons, and Menisci

1. Structure and Function of Normal and Healing Tendons and Ligaments  
A. Viidik
2. The Biology of Tendons and Ligaments  
C.B. Frank, D.A. Hart
3. Biomechanics and Morphology of the Medial Collateral and Anterior Cruciate Ligaments  
S.L-Y. Woo, J.A. Weiss, D.A. MacKenna
4. Biomechanics of the Anterior Cruciate Ligament and its Replacements  
D.L. Butler, Y. Guan
5. New Insights Into Load Bearing Functions of the Anterior Cruciate Ligament  
K.L. Markolf, J.F. Gorek, J.M. Kabo, M.S. Shapiro, G.A.M. Finerman
6. Structure and Biology of the Knee Meniscus  
S.P. Arnoczky
7. Structure and Function of the Meniscus: Basic and Clinical Implications  
M.A. Kelly, D.C. Fithian, K.Y. Chern, V.C. Mow

## Part II Cartilage Biomechanics

8. Biphasic and Quasilinear Viscoelastic Theories for Hydrated Soft Tissues  
V.C. Mow, J.S. Hou, J.M. Owens, A. Ratcliffe
9. Physicochemical and Bioelectrical Determinants of Cartilage Material Properties  
E.H. Frank, A.J. Grodzinsky, S.L. Phillips, P.E. Grimshaw
10. A Triphasic Theory for the Swelling Properties of Hydrated Charged Soft Biological Tissues  
W.M. Lai, J.S. Hou, V.C. Mow
11. Viscometric Properties of Proteoglycan Solutions at Physiological Concentrations  
W.B. Zhu, V.C. Mow
12. Osmotic and Hydraulic Flows in Proteoglycan Solutions  
W.D. Comper
13. Water Content and Solute Diffusion Properties in Articular Cartilage  
P.A. Torzilli, E. Askari, J.T. Jenkins
14. Biomechanical Properties of Healing Cartilage  
M.K. Kwan, S.L-Y. Woo
15. Alternate Hybrid, Mixed, and Penalty Finite Element Formulations for the Biphasic Model of Soft Hydrated Tissues  
R.L. Spilker, J-K. Suh, M.E. Vermilyea, T.A. Maxian
16. Characteristics of Joint Loading as it Applies to Osteoarthritis  
E.L. Radin, D.B. Burr, D. Fyhrie, T.D. Brown, R.D. Boyd

## Volume II

Preface	v

## Part III Bone Biomechanics

17. Function and Form of Bone J.D. Currey	3
--	---

18. Multiaxial Structure-Property Relations in Trabecular Bone 31  
B.D. Snyder, W.C. Hayes
19. The Mechanical and Remodeling Properties of Trabecular Bone 61  
S.A. Goldstein, S.J. Hollister, J.L. Kuhn, N. Kikuchi
20. Age-Related Loss of Vertebral Trabecular Bone Mass and Structure - Biomechanical Consequences 83  
L. Mosekilde
21. Biologic Modulation of Mechanical Influences in Bone Remodeling 97  
C.T. Rubin, K.J. Mcleod
22. Properties of Cortical Bone and Theory of Bone Remodeling 119  
S.C. Cowin
23. Mechanical Stresses in Joint Morphogenesis and Maintenance 155  
D.R. Carter, M. Wong
24. Streaming Potential in Bone 175  
A.F.T. Mak
- Part IV Joint Biomechanics**
25. Kinematics and Mechanics of the Cruciate Ligaments of the Knee 197  
J.J. O'Connor, A. Zavatsky
26. Stereophotogrammetric Determination of Joint Anatomy and Contact Areas 243  
L.J. Soslowsky, G.A. Ateshian, V.C. Mow
27. The Relationship Between Knee Motion and Articular Surface Geometry 269  
R. Huiskes, L. Blankevoort
28. Viscoelastic Behaviour of Synovial Fluids and Artificial Replacements 287  
V.O. Ribitsch

29. Bio-Tribology of Natural and Replacement Synovial Joints 305  
D. Dowson
30. Squeeze Film Lubrication for Articular Cartilage with Synovial Fluid 347  
J.S. Hou, M.H. Holmes, W.M. Lai, V.C. Mow
31. Joint Physiology and Biomechanics 369  
E.L. Radin, D. Fyhrie
32. Finite Element Analysis of Bones and Joints: Some Applications to Femoral Head Osteonecrosis 385  
T.D. Brown
33. Kinematics of Human Shoulder Motion 405  
A.E. Engin
34. Biomechanics of the Elbow 441  
K-N. An, B.F. Morrey
