Introduction to the 5th edition xxiii

Section 1 Setting the Scene 1

Chapter 1 Research and Development in Nursing
Kate Gerrish and Ann McMahon 3
Key points 3
Introduction 3
The nature of nursing research and development 4
Developing nursing knowledge 5
Research awareness, utilisation and activity 7
Research and nursing practice 9
UK health and social care research policy 10
UK nursing research policy 11
Nursing research policy imperatives 13
Conclusion 14
References 14
Websites 15

Chapter 2 The Research Process
Anne Lacey 16
Key points 16
Introduction 16
Developing the research question 17
Searching and evaluating the literature 19
Choice of methodology, research design 20
Preparing a research proposal 22
Gaining access to the data 23
Sampling 25
Pilot study 26
Data collection 26
Data analysis 27
Dissemination of the results 27
Implementation of the results 28

	Ensuring rigour	28
	Conclusion	29
	References	30
	Websites	30
Chapter 3	Research Ethics	
	Martin Johnson and Tony Long	31
	Key points	31
	The importance of ethics in research	31
	Issues for researchers to address	32
	Strategies for ethical research	37
	Conclusion	40
	References	41
	Websites	42
Chapter 4	Sources of Funding and Support for Research	
	Senga Bond and Anne Lacey	43
	Key points	43
	Introduction	43
	Education for research	44
	Supervision	45
	Advice about a specific project	46
	Kindred spirits to provide emotional sustenance	47
	Financial support	48
	Information resources	51
	Conclusion	51
	Further reading	52
	Websites	52
Chapter 5	User Involvement in Research	
	Gordon Grant and Paul Ramcharan	54
	Key points	54
	Introduction	54
	A brief history of user involvement in research	55
	Mapping user involvement in nursing and nursing-related research	56
	Challenges for user involvement in nursing and nursing-related research	64
	Weighing user experiences – learning disability as a case example	65
	Conclusion	67
	References	67
	Further reading	69
	Websites	69

Section 2 Preparing the Ground 71

Chapter 6 Asking the Right Question
Gill Hek 73
Key points 73
Introduction 73
Research questions in published studies 74
Sources of research questions 77
Questions, aims, objectives and hypotheses 83
Feasibility 86
Ethical issues 87
Research questions and methodology 87
Conclusion 88
References 88
Websites 89

Chapter 7 Finding the Evidence
Claire Beecroft, Angie Rees and Andrew Booth 90
Key points 90
Introduction 90
Electronic information sources and the internet 90
The research literature 91
Accessing the literature 93
Planning a literature search 95
Searching the literature 98
Specialist information sources 101
Writing a literature review 103
Managing references 103
Conclusion 105
References 105
Further reading 106
Websites 106

Chapter 8 Critical Appraisal of the Evidence
Andrew Booth 107
Key points 107
Introduction 107
What is critical appraisal? 108
The need for critical appraisal 109
Validity of research designs 110
How to appraise quantitative research studies 111
How to appraise qualitative research studies 112
How to appraise systematic reviews, practice guidelines and economic analysis 116
Applying the results of critical appraisal 119

Conclusion 121
References 121
Further reading 122
Website 122

Chapter 9 Preparing a Research Proposal
Senga Bond and Kate Gerrish 123
Key points 123
Introduction 123
Typical content of a research proposal 124
Title of project 124
Summary 125
Justification for the study 125
Related research 125
Aims and objectives 126
Plan of investigation 126
Ethical considerations 130
Products arising from the project 131
Dissemination 131
Resources 131
Budget 132
Curriculum vitae 133
Final review 134
Additional considerations 134
Conclusion 136
Further reading 136
Websites 137

Chapter 10 Gaining Access to the Research Site
Amanda Hunn 138
Key points 138
The need for regulation of research 138
The Research Governance Framework in the UK 138
The system for ethical approval 139
Research ethics committee applications 141
The remit of a research ethics committee 141
Building the approval process into research plans 142
Applying to the research ethics committee 144
Informal access negotiations 146
Gaining informed consent from research participants 149
Taking consent 153
Conclusion 154
References 154
Websites 154

Section 3 Choosing the Right Approach 155

Chapter 11 The Quantitative–Qualitative Continuum
Annie Topping 157
Key points 157
Introduction 157
The characteristics of quantitative and qualitative research 158
Influences and contributions to the development of nursing research 159
Empiricism and the scientific method 160
Quantitative research 163
Qualitative research 165
Critical accounts of research epistemology 166
Blending quantitative and qualitative approaches 168
Judging the quality of quantitative and qualitative research 169
Conclusion 169
References 170
Websites 172

Chapter 12 Sampling
Susan Procter and Teresa Allan 173
Key points 173
Introduction 173
Populations and samples 173
Sampling frame 175
Types of sampling 175
Sampling schemes in quantitative research 176
Calculating sample size in quantitative research 179
Sources of bias in quantitative sampling 180
Sampling in qualitative research 181
Calculating sample size in qualitative research 184
Sampling strategies used in qualitative and quantitative research 184
Conclusion 186
References 187
Further reading 187

Introduction to qualitative research approaches (Chapters 13, 14 and 15) 189

Chapter 13 Grounded Theory
Immy Holloway and Les Todres 192
Key points 192
Introduction 192

The purpose and main features of grounded theory 193
The use and relevance of grounded theory in nursing research 194
The theoretical basis of grounded theory: symbolic interactionism 194
Data collection and initial sampling 195
Data analysis 197
The theory 201
Writing memos 202
The use of literature in grounded theory 202
The choice between Glaserian and Straussian grounded theory 203
Which approach? 204
Problems and strengths of grounded theory 204
Conclusion 205
References 206
Further reading 207
Website 207

Chapter 14 Ethnography
Immy Holloway and Les Todres 208
Key points 208
Introduction 208
The characteristics of ethnography 209
The use of ethnography in nursing 211
Descriptive and critical ethnography 213
Selection of sample and setting in ethnographic studies 214
Data collection 215
Fieldwork and fieldnotes 217
Macro- and micro-ethnographies 218
Data analysis and interpretation 218
Relationships and problems in the setting 220
The ethnographic report 221
Conclusion 221
References 222

Chapter 15 Phenomenological Research
Les Todres and Immy Holloway 224
Key points 224
Introduction 224
Purpose of phenomenological research 225
Use of phenomenology in nursing 226
Main features 228
Fieldwork 230
Analytical procedures 233
Strengths and limitations 234

Conclusion 236
References 236
Further reading 237
Websites 238

Chapter 16 Experimental Research
Andrea Nelson, Jo Dumville and David Torgerson 239
Key points 239
Background 239
Experimental versus observational studies 239
Characteristics of experimental design 240
Pre-post-test design 241
Interrupted time series 243
Controlled trials 244
The randomised controlled trial 245
Randomised controlled trials and the reduction of bias 248
Other experimental designs 251
Reporting and reading RCTs 255
Important considerations in using randomised controlled trials 255
Strengths and limitations of randomised controlled trials 256
Conclusion 257
References 258
Websites 259

Chapter 17 Surveys
Hugh McKenna, Felicity Hasson and Sinead Keeney 260
Key points 260
Historical development of survey research in health 260
Descriptive surveys 261
Correlational and comparative surveys 262
Longitudinal surveys and cohort studies 264
Sources of data in survey research 265
Epidemiology 269
Conclusion 271
References 271
Further reading 272
Websites 272

Chapter 18 Action Research
Julienne Meyer 274
Key points 274
Principles of action research 274
Common models of working with action research in nursing 275
The role of the researcher in action research 279
Ethical issues 280

Methods of data collection 281
Assessing quality 283
Research as an agent of change 284
Advantages and disadvantages of action research 285
Conclusion 286
References 287
Further reading 288
Websites 288

Chapter 19 Evaluation Research
Colin Robson 289
Key points 289
What is evaluation? 289
Why evaluation research? 290
The satisfaction questionnaire 290
Models of evaluation 292
Quantitative or qualitative? 296
The political nature of evaluation 298
Evaluation research and evidence-based practice 298
Conclusion 299
References 299
Further reading 301
Websites 301

Chapter 20 Case Study Research
Charlotte Clarke and Jan Reed 302
Key points 302
Introduction 302
Definitions of case study methodology 304
Research questions 305
Selection of cases 306
Research design 308
Data analysis 309
Presentation and reporting 313
Conclusion 314
References 314

Chapter 21 Systematic Reviews and Secondary Research
Catherine Beverley, Mary Edmunds-Otter and Andrew Booth 316
Key points 316
Introduction 316
Background to secondary research 316
Writing a systematic review protocol 319
Systematically searching the literature 321
Assessing the quality of the literature 325

Extracting key information from the selected studies 325
Summarising, interpreting and presenting the findings 327
Writing up the review 330
Systematic reviews of qualitative research 330
Conclusion 331
References 332
Further reading 334
Websites 334

Section 4 **Collecting Data** 335

Chapter 22 Interviewing
Angela Tod 337
Key points 337
Introduction 337
The purpose of the research interview 337
Types of interview 340
Undertaking an interview 342
Conducting the interview 345
Advantages and disadvantages of interviews 347
Issues of validity and reliability 348
Ethical issues with interviewing 349
Conclusion 351
References 351
Further reading 352

Chapter 23 Using Focus Groups
Claire Goodman and Catherine Evans 353
Key points 353
Purpose of focus groups 353
Conducting a focus group 355
Analysis 360
Issues of validity and reliability 361
Advantages of focus groups 362
Limitations of focus groups 363
Ethical issues 364
Conclusion 365
References 365
Further reading 366

Chapter 24 Using Questionnaires
Tricia Murphy-Black 367
Key points 367
Purpose of questionnaires 367
Using previously-validated questionnaires 368

	Designing a questionnaire	368
	Types of questions	371
	Validation of measurement scales	374
	Validity and reliability	375
	Administering questionnaires	377
	Comparison between face-to-face and postal questionnaires	379
	Ethical issues associated with questionnaires	380
	Conclusion	380
	References	380
	Further reading	382
	Website	382
Chapter 25	Using Observation	
	Hazel Watson and Rosemary Whyte	383
	Key points	383
	The purpose of observation	383
	Participant observation	387
	Non-participant observation	390
	Advantages and disadvantages of observation	394
	Issues of validity and reliability	395
	Ethical issues associated with observation	396
	Conclusion	397
	References	397
	Website	398
Chapter 26	Physiological Measurement	
	Mark Johnson and S José Closs	399
	Key points	399
	Introduction	399
	Making physiological measurements	404
	Interpreting physiological measurements	411
	Ethical issues	413
	Conclusion	413
	References	414
	Further reading	414
Section 5	**Making Sense of Data**	415
Chapter 27	Qualitative Analysis	
	Judith Lathlean	417
	Key points	417
	Introduction	417
	Principles of qualitative analysis	418
	Examples of methods of analysis	420
	Practicalities	427

Examples of analyses 428
Using computer software for qualitative data analysis 431
Conclusion 432
References 432
Further reading 433

Chapter 28 Descriptive Analysis of Quantitative Data
Jenny Freeman and Stephen Walters 434
Key points 434
Introduction 434
Data types 434
Recording data 436
Presenting data in charts 440
Describing data 444
Presenting data and results in tables 451
Conclusion 451
References 452
Further reading 452
Websites 452

Chapter 29 Examining Relationships in Quantitative Data
Jenny Freeman and Stephen Walters 454
Key points 454
Introduction 454
Statistical analysis 454
Choosing the statistical method 458
The relationship between two continuous variables 466
Conclusion 472
Further reading 474

Section 6 Putting Research into Practice 475

Chapter 30 Communicating and Disseminating Research
Kate Gerrish and Anne Lacey 477
Key points 477
Introduction 477
Communicating with different audiences 477
The research report 478
Writing an article for publication 480
Presenting research at a conference 483
Networking opportunities, research partnerships and collaborations 489
Conclusion 490
References 490
Further reading 490
Websites 490

Chapter 31 Evidence-Based Practice
Kate Gerrish 491
Key points 491
Introduction 491
The nature of 'evidence' in evidence-based practice 492
Hierarchies of evidence 496
Research utilisation 498
The process of evidence-based practice 500
Barriers to achieving evidence-based practice 500
Implementing evidence-based practice 502
Conclusion 503
References 503
Further resources 505
Website 505

Chapter 32 Implementing Evidence-Based Practice
Steve Campbell, Helen Hancock and Hilary Lloyd 506
Key points 506
Introduction 506
Change 507
An individual-led approach to implementing evidence-based practice 509
A co-ordinated approach to implementing evidence-based practice 512
Clinical practice guidelines 514
Implementing clinical practice guidelines 516
Implementing a clinical guideline 517
Conclusion 519
Acknowledgements 519
References 519

Chapter 33 The Future of Nursing Research
Ann McMahon and Anne Lacey 521
Key points 521
Introduction 521
Five policy imperatives 521
The future of nursing as a clinical academic discipline – a higher education perspective 528
Three scenarios for the future of nursing research 530
References 531
Websites 533

Glossary 534
