UNIT 1
NURSING RESEARCH, THEORY, AND PRACTICE: INTEGRATIVE DEVELOPMENT

1 Developing the Discipline of Nursing through Modeling, 3
Historical Perspective, 4
The Beginning of the Development of the Discipline, 4
The Present State of Development, 6
The Logical Middle, 6
Nursing as a Discipline, 7
Modeling Nursing: Philosophical Perspectives, 8
Cosmology, 8
Ontology, 9
Epistemology, 10
Modeling Nursing: Theoretical Perspectives, 10
Definition of a Model, 10
Definition of a Theory, 11
Definition of a Paradigm, 12
The Meaning of Metaphor in Nursing Theory, 13
Outcomes of Modeling Nursing, 13
Summary, 14

2 Nursing Theory and Research: Understanding the Connections, 17
Understanding the Connection, 18
Paradigms of Discovery, 18
Using Theory to Generate Research Ideas, 22
Theory-Generating Research, 23
Theory-Testing Research, 23
Congruence Between Theory and Research, 26
Knowledge of Theory Through Research, 26
Practical Pointers for Evaluating Research on Instrumentation, 30
Reliability, 30
Validity, 31
Summary, 32

3 The Structuring of Nursing Practice, 35
Pursuing the Theory-Research-Practice Link, 36
Developing Practice within Nursing Theoretical Systems, 37
Nursing Theoretical Systems, Models, and Practice, 38
Importance of Theoretical Perspectives to Practice, 39
Human Becoming Theory, 40
Moderate Realist Perspective, 40
Critical Theory/Feminist Perspective, 40
Nursing as a Program, 40
Individual Practitioners, 41
Organizations and Institutions, 41
Summary, 48

4 Integration, 51
Nursing Praxis, 52
Knowledge from Other Disciplines, 52
Selecting a Nursing Theoretical System, 53
Questions for the Selection of a Theoretical System as the Basis for Specialty Practice or Knowledge Development, 54
Research Methods, 56
Methods of Quantitative Research, 57
Methods of Qualitative Research, 57
Balance Between the Two Research Methods, 58
Selecting a Paradigm of Inquiry, Research Method, and Instrumentation, 59
Practice Applications, 61
Choosing a Theoretical Perspective to Structure Practice, 62
Addressing the Theory-Practice Gap, 62
Summary, 63

UNIT 2
OVERVIEW OF THEORIES, RELATED RESEARCH, AND PRACTICE APPLICATIONS

5 Modeling Nursing From a Realist Point of View: Orem's Self-Care Deficit Nursing Theory, 71
The Starting Point of the Modeling Process, 72
Reason for Theory Development, 72
Phenomenon of Concern, 72
Description of Orem's Theoretical System, 73
Philosophical Perspectives, 73
Description of Models and Theories, 75
Research Derived from Self-Care Deficit Nursing Theory, 80
Research Instruments Measuring Self-Care, 81
Review of Related Research, 89
Praxis and Theory Utilization: Designing Nursing Practice Programs within the Theoretical System of Self-Care Deficit Nursing Theory, 107

The Variables of Concern for Practice, 108
Describing a Population for Nursing Purposes, 112
Process Models, 113
Practice Models, 114
Implications for Administration, 117
Implications for Education, 118
Status of Theory Development, 118
Nexus, 119

6 Modeling Nursing From an Energy Field Perspective: Rogers' Science of Unitary Human Beings, 123
The Starting Point of the Modeling Process, 124
Reason for Theory Development, 124
Phenomenon of Concern, 125
Description of Rogers' Theoretical System, 126
Philosophical Perspectives, 126
Description of Rogers' Models and Theories, 127
Research Derived from the Science of Unitary Human Beings, 128
Research Instruments, 129
Review of Related Research, 138
Praxis and Theory Utilization: Designing Nursing Practice Programs within the Theoretical System of the Science of Unitary Human Beings, 152
The Variables of Concern for Practice, 153
Process Models, 153
Practice Models, 154
Implications for Administration, 155
Implications for Education, 155
Nexus, 156

7 Modeling Nursing From Unitary and Existential Perspectives: Parse's Theory of Human Becoming, 161
The Starting Point of the Modeling Process, 161
Reason for Theory Development, 162
Phenomenon of Concern, 162
Description of Parse's Theoretical System, 163
Philosophical Perspectives, 163
Description of Models and Theories, 165
Research Derived from the Theory of Human Becoming, 166
Review of Related Research, 169
Praxis and Theory Utilization: Designing Nursing Practice Programs within the Human Becoming School of Thought, 180
The Variables of Concern for Practice, 181
Describing a Population for Nursing Purposes, 181
Expected Outcomes, 181

Process Models, 181
Practice Models, 183
Implications for Administration, 183
Implications for Education, 184
Nexus, 185

8 Modeling Nursing From a Systems Perspective: The Neuman Systems Model, 187
The Starting Point of the Modeling Process, 187
Reason for Theory Development, 188
Phenomenon of Concern, 188
Description of Neuman's Theoretical System, 188
Philosophical Perspectives, 188
Description of Model and Theories, 190
Research Derived from the Neuman Systems Model, 192
Research Instruments, 194
Review of Related Research, 195
Praxis and Theory Utilization: Designing Nursing Practice Programs within Neuman's Theoretical System, 221
The Variables of Concern for Practice, 221
Describing a Population for Nursing Purposes, 221
Process Models, 226
Practice Models, 227
Implications for Administration, 227
Implications for Education, 228
Status of Theory Development, 228
Nexus, 228

9 Modeling Nursing From a Transactions Systems Perspective: King's Conceptual System and Theory of Goal Attainment, 233
The Starting Point of the Modeling Process, 234
Phenomenon of Concern, 235
Description of King's Theoretical System, 235
Philosophical Perspectives, 235
Description of Model and Theory, 237
Research Derived From King's Conceptual System and Theory of Goal Attainment, 238
Research Instruments, 238
Review of Related Research, 240
Praxis and Theory Utilization: Designing Nursing Practice From the Perspective of King's Conceptual System and Theory of Goal Attainment, 249
The Variables of Concern for Practice, 250
Describing a Population for Nursing Purposes, 251
Expected Outcomes of Nursing, 251
Process Models, 251
Practice Models, 253

Implications for Administration, 253
Implications for Education, 253
Status of Theory Development, 254
Nexus, 255

10 Modeling Nursing From an Adaptation Perspective: The Roy Adaptation Model, 259
The Starting Point of the Modeling Process, 259
Reason for Theory Development, 260
Phenomenon of Concern, 260
Description of Roy's Theoretical System, 261
Philosophical Perspectives, 261
Description of Model and Theory, 263
Research Derived from the Roy Adaptation Model, 264
Research Instruments, 264
Review of Related Research, 268
Praxis and Theory Utilization: Designing Nursing Practice Programs within the Theoretical System of the Roy Adaptation Model, 297
The Variables of Concern for Practice, 297
Describing a Population for Nursing Purposes, 298
Expected Outcomes of Nursing, 298
Process Models, 298
Practice Models, 300
Implications for Administration, 300
Implications for Education, 302
Status of Theory Development, 302
Nexus, 302

11 Modeling Nursing From the Perspective of Health: Pender's Health Promotion Model, 307
The Starting Point of the Modeling Process, 307
Reason for Model Development, 308
Phenomenon of Concern, 308
Description of Pender's Theoretical System, 308
Philosophical Perspectives, 308
Description of Model and Theories, 309
Research Derived from Pender's Health Promotion Model, 310
Research Instruments, 312
Review of Related Research, 315
Praxis and Theory Utilization: Designing Nursing Practice Programs From the Perspective of Pender's Health Promotion Model, 339
The Variables of Concern for Practice, 339
Describing a Population for Nursing Purposes, 339
Expected Outcomes of Nursing, 339
Process Models, 339
Practice Models, 341

Implications for Administration, 341
Implications for Education, 341
Status of Theory Development, 341
Nexus, 341

12 Modeling Nursing From the Perspective of Human Relations: Peplau's Theory of Interpersonal Relations, 345
The Starting Point of Modeling Nursing, 346
Reason for Theory Development, 346
Phenomenon of Concern, 346
Description of Peplau's Theoretical System, 346
Philosophical Perspectives, 346
Description of Model and Theory, 347
Research Derived from Peplau's Theory of Interpersonal Relations, 351
Research Instruments, 351
Review of Related Research, 355
Praxis and Theory Utilization: Designing Nursing Practice From the Perspective of Peplau's Theory of Interpersonal Relations, 366
The Variables of Concern for Practice, 366
Expected Outcomes of Nursing, 367
Describing a Population for Nursing Purposes, 367
Process Models, 367
Practice Models, 369
Implications for Administration, 369
Implications for Education, 369
Nexus, 370

13 Modeling Nursing From a Caring Perspective: Watson's Transpersonal Nursing and the Theory of Human Caring, 373
The Starting Point of the Modeling Process, 374
Reason for Theory Development, 374
Phenomenon of Concern, 374
Description of Watson's Theoretical System, 375
Philosophical Perspectives, 375
Description of Transpersonal Caring-Healing Model and Theory of Human Caring, 377
Research Derived from Watson's Theory of Human Caring, 380
Instruments, 380
Review of Related Research, 381
Praxis and Theory Utilization: Designing Nursing Practice Programs within Watson's Theoretical System, 398
The Variables of Concern for Practice, 398
Describing a Population for Nursing Purposes, 399
Expected Outcomes of Nursing, 399
Process Models, 399
Practice Models, 400

Implications for Administration, 400
Implications for Education, 401
Future Theory Development Required to Facilitate Practice, 401
Nexus, 402

EPILOGUE: The Integration of Nursing Theory and Research for Practice, 405
Using the Past to Create the Future: The Integration of Nursing Theory and Research for Practice, 405
Existing Theoretical Systems, 405
Nursing: A Practice Discipline with Practical Science, 405
Recognition of the Duality in the Ontology of the Discipline, 407
The Scope of Theoretical Systems, 407
Practical Usefulness, 408
Empirical Adequacy, 409
The Future, 409

APPENDIX, 411

GLOSSARY, 483
