

Contents

1. Basics of Electricity, Light and Sound

- The Structure of an Atom 3
- The Formation of Compounds 4
- Types of Electricity 5
- Static Electricity 6
- Capacitance 10
- Current Electricity 11
- Thermal and Chemical Effects of Currents 19
- Magnetic Effects of Electric Current 30
- Magnets and Earth Magnetism 39
- Electromagnetic Induction 46
- Electric Shock 62
- Physical Principles of Sound 71

2. Low Frequency Currents

- Faradic Type Current 75
- Electrotherapeutic Currents 76
- Nerve Transmission 82
- Waveforms 85
- Current Modulation 89
- Indications for the Use of Low Frequency Currents 91
- Physiological Effects of Low Frequency Currents 93
- Treatment of Patient's Condition 94
- Proforma for Patient's Assessment 95
- Median Nerve Stimulation 99
- Ulnar Nerve Stimulation 102
- Radial Nerve Stimulation 105
- Erb's Paralysis 107
- Facial Nerve Stimulation 109
- Deltoid Inhibition 111
- Quadriceps Inhibition 113
- Lateral Popliteal Nerve Injury 114
- Faradism Under Pressure 116
- Faradic Foot Bath 117
- Common Motor Points 119
- Strength Duration Curve 122
- Iontophoresis 127
- Transcutaneous Electrical Nerve Stimulation 128
- Microcurrent Electrical Neuromuscular Stimulation 133

3. Medium Frequency Currents

- Rebox-type currents 134
- Russian Currents 134
- Interferential therapy 135
- Treatment of Patient's Condition 138

1

75

134

- Proforma for Patient's Assessment 139
- Low Back Pain 142
- Periarthritis Shoulder 144
- Osteoarthritis Knee 146
- Absorption of Exudates 147
- Stress Incontinence 148

4. High Frequency Currents

- Shortwave Diathermy 150
- Microwave Diathermy 169
- Longwave Diathermy 171
- Treatment of the Patient's Condition 171
- Proforma for Patient's Assessment 172
- Cervical Spondylosis 174
- Periarthritis Shoulder 176
- Low Backache 178
- Lumbar Spondylosis 181
- Shortwave Diathermy to Hip Joint 181
- Sciatica 183
- Osteoarthritis of Knee 184
- Secondary Osteoarthritis 185
- Ligament Injuries 187
- Plantar Fasciitis 191
- Salpingitis (Pelvic Inflammatory Disease) 193

5. Radiation Therapy

- Infrared Radiations 195
- Dangers of Infrared Radiations 200
- Treatment of Patient's Condition 201
- Proforma for Patient's Assessment 201
- Low Backache 203
- Postimmobilization Stiffness 205
- Absorption of Exudates or Edema 206
- Production of Ultraviolet Radiations 208
- Techniques of Application 211
- Techniques of General Irradiation 211
- Physiological Effects of Ultraviolet Radiations 212
- Indications of Ultraviolet Irradiations 213
- Contraindications 215
- Treatment of Patient's Condition 215
- Proforma for Patient's Assessment 215
- Ulcers 217
- Acne Vulgaris 219
- Pressure Sores 220
- Psoriasis 221
- Rickets 223
- General Debilitating Condition 223
- Vitiligo 223
- Alopecia 223
- Sensitizers 224

150

6. Laser Therapy	225
• Historical Aspects	225
• Properties of Laser	226
• Production of Laser	226
• Types of Laser	227
• Techniques of Application	228
• Dosage Parameters	228
• Interaction of Laser with Body Tissues	229
• Physiological Effects and Therapeutic Uses of Lasers	229
• Dangers and Contraindications	230
• Treatment of Patient's Condition	231
• Proforma for Patient's Assessment	231
7. Superficial Heating Modalities	236
• Paraffin Wax Bath Therapy	236
• Proforma for Patient's Assessment	238
• Hot Packs/Hydrocollator Packs	239
• Electric Heating Pads	240
• Whirlpool Bath	241
• Contrast Bath	242
• Heliotherapy	243
• Sauna Bath	243
8. Ultrasonic Therapy	245
• Frequency of Ultrasound	246
• Properties of Waves	246
• Production of Ultrasound	248
• Techniques and Methods of Application	252
• Physiological Effects of Ultrasound	257
• Therapeutic Uses of Ultrasound	259
• Dangers of Ultrasound	260
• Contraindications	260
• Phonophoresis	261
• Combination Therapy	264
• Treatment of Patient's Condition	266
• Proforma for Patient's Assessment	267
• Tennis Elbow (Lateral Epicondylitis)	268
• Golfer's Elbow (Medial Epicondylitis)	269
• Supraspinatus Tendinitis	270
• De Quervain's Disease (Tenosynovitis)	271
• Bicipital Tendinitis	271
• Subdeltoid Bursitis	271
• Subacromial Bursitis	272
• Metatarsalgia	272
9. Cryotherapy	273
• Techniques of Application	273
• Basic Principles	275
• Physiological Effects and Therapeutic Uses of Cold Therapy	276
• Dangers and Contraindications	277
• Proforma for Patient's Assessment	277
• Ankle Sprain	279
• Muscle Contusion/Hematoma	280

10. Biofeedback		281
• Biofeedback Instrumentation	281	
• General Principles	283	
• Biofeedback in Rehabilitation	283	
• Use of Electromyogram Biofeedback for Neuromuscular Re-Education	284	
• Limitations of Biofeedback	284	
• Uses of Biofeedback	285	
11. Electromyography		287
• Types of Electromyography	288	
• Motor Unit Action Potential	288	
• The Components of Electromyography	289	
• The Electromyographic Examination	294	
• Kinesiological Electromyography	297	
• Nerve Conduction Velocity	298	
• Clinical Implications of Electromyography	303
