A word of the Editor-in-Chief

137

Jaromír Tvrď, Jiří Sejkora, Pierre Rosseel, Zdeněk Dolníček

Ferraioloite from the Sítio do Castelo mine, Folgosinho (Guarda, Portugal), description and Raman spectroscopy 139

*Margarita S. Avdonteveva, Andrey A. Zolotarev, Sergey V. Krivovichev, Maria G. Krzhizhanovskaya,
Vladimir N. Bocharov, Vladimir V. Shilovskikh, Anatoly A. Zolotarev, Mikhail A. Rassomakhin*

Rapidcreekite of anthropogenic origin – ‘korkinoite’ from burnt mine dump in the Chelyabinsk coal basin,
South Urals, Russia: crystal structure refinement, thermal behavior and spectroscopic characterization 147

Martin Števko, Jiří Sejkora

Bismuth, lead–bismuth and lead–antimony sulfosalts from the granite-hosted hydrothermal quartz veins
at the Elisabeth mine, Gemerská Poloma, Spišsko-gemerské rudohorie Mts., Slovakia 157

Richard Pažout, Michal Dušek

Crystal structure of undersubstituted Sb-rich vikingite $\text{Vik}_{40} \text{Ag}_{2.85} \text{Pb}_{12.35} (\text{Bi}_{9.52} \text{Sb}_{1.27})_{\Sigma=10.80} \text{S}_{30}$: site population
and comparison with structure of vikingite $\text{Vik}_{50} \text{Ag}_{3.5} \text{Pb}_{11.0} \text{Bi}_{11.5} \text{S}_{30}$ 175
