## I PROVABILITY

---

<b>I</b>	<b>Introduction to Formal Languages</b> .....	<b>3</b>
1	General Information .....	3
2	First-Order Languages .....	5
	Digression: Names .....	9
3	Beginners' Course in Translation .....	9
	Digression: Syntax .....	15
<b>II</b>	<b>Truth and Deducibility</b> .....	<b>19</b>
1	Unique Reading Lemma .....	19
2	Interpretation: Truth, Definability .....	23
3	Syntactic Properties of Truth .....	28
	Digression: Natural Logic .....	33
4	Deducibility .....	36
	Digression: Proof .....	45
5	Tautologies and Boolean Algebras .....	49
	Digression: Kennings .....	53
6	Gödel's Completeness Theorem .....	55
7	Countable Models and Skolem's Paradox .....	61
8	Language Extensions .....	66
9	Undefinability of Truth: The Language <i>SELF</i> .....	69
10	Smullyan's Language of Arithmetic .....	71
11	Undefinability of Truth: Tarski's Theorem .....	74
	Digression: Self-Reference .....	77
12	Quantum Logic .....	78
	Appendix: The Von Neumann Universe .....	89
	The Last Digression. Truth as Value and Duty: Lessons of Mathematics .....	96
<b>III</b>	<b>The Continuum Problem and Forcing</b> .....	<b>105</b>
1	The Problem: Results, Ideas .....	105
2	A Language of Real Analysis .....	110
3	The Continuum Hypothesis Is Not Deducible in $L_2$ Real .....	114

4	Boolean-Valued Universes .....	120
5	The Axiom of Extensionality Is "True" .....	124
6	The Axioms of Pairing, Union, Power Set, and Regularity Are "True" .....	127
7	The Axioms of Infinity, Replacement, and Choice Are "True" .....	132
8	The Continuum Hypothesis Is "False" for Suitable $B$ .....	140
9	Forcing.....	145
<b>IV</b>	<b>The Continuum Problem and Constructible Sets .....</b>	<b>151</b>
1	Gödel's Constructible Universe .....	151
2	Definability and Absoluteness .....	155
3	The Constructible Universe as a Model for Set Theory .....	158
4	The Generalized Continuum Hypothesis Is $L$ -True .....	161
5	Constructibility Formula .....	164
6	Remarks on Formalization .....	171
7	What Is the Cardinality of the Continuum? .....	172
<hr/>		
<b>II</b>	<b>COMPUTABILITY .....</b>	
<hr/>		
<b>V</b>	<b>Recursive Functions and Church's Thesis .....</b>	<b>179</b>
1	Introduction. Intuitive Computability .....	179
2	Partial Recursive Functions .....	183
3	Basic Examples of Recursiveness .....	187
4	Enumerable and Decidable Sets .....	191
5	Elements of Recursive Geometry .....	201
<b>VI</b>	<b>Diophantine Sets and Algorithmic Undecidability .....</b>	<b>207</b>
1	The Basic Result .....	207
2	Plan of Proof .....	209
3	Enumerable Sets Are $D$ -Sets .....	211
4	The Reduction .....	214
5	Construction of a Special Diophantine Set .....	217
6	The Graph of the Exponential Is Diophantine .....	221
7	The Factorial and Binomial Coefficient Graphs Are Diophantine .....	221
8	Versal Families .....	223
9	Kolmogorov Complexity .....	226
<hr/>		
<b>III</b>	<b>PROVABILITY AND COMPUTABILITY .....</b>	
<hr/>		
<b>VII</b>	<b>Gödel's Incompleteness Theorem .....</b>	<b>235</b>
1	Arithmetic of Syntax .....	235
2	Incompleteness Principles.....	240
3	Nonenumerability of True Formulas .....	241

4	Syntactic Analysis .....	243
5	Enumerability of Deducible Formulas .....	249
6	The Arithmetical Hierarchy .....	252
7	Productivity of Arithmetical Truth .....	255
8	On the Length of Proofs .....	258
<b>VIII Recursive Groups .....</b>		<b>263</b>
1	Basic Result and Its Corollaries .....	263
2	Free Products and HNN-Extensions .....	266
3	Embeddings in Groups with Two Generators .....	270
4	Benign Subgroups .....	271
5	Bounded Systems of Generators .....	275
6	End of the Proof .....	280
<b>IX Constructive Universe and Computation .....</b>		<b>285</b>
1	Introduction: A Categorical View of Computation .....	285
2	Expanding Constructive Universe: Generalities .....	289
3	Expanding Constructive Universe: Morphisms .....	293
4	Operads and PROPs .....	296
5	The World of Graphs as a Topological Language .....	298
6	Models of Computation and Complexity .....	307
7	Basics of Quantum Computation I: Quantum Entanglement ..	315
8	Selected Quantum Subroutines .....	319
9	Shor's Factoring Algorithm .....	322
10	Kolmogorov Complexity and Growth of Recursive Functions ..	325
<hr/>		
<b>IV MODEL THEORY</b>		
<hr/>		
<b>X</b>	<b>Model Theory .....</b>	<b>331</b>
1	Languages and Structures .....	331
2	The Compactness Theorem .....	334
3	Basic Methods and Constructions .....	342
4	Completeness and Quantifier Elimination in Some Theories ...	350
5	Classification Theory .....	359
6	Geometric Stability Theory .....	364
7	Other Languages and Nonelementary Model Theory .....	374
<b>Suggestions for Further Reading .....</b>		<b>379</b>
<b>Index .....</b>		<b>381</b>
