List of contributors

1	Circuit quantum electrodynamics with a nonlinear resonator	1
	P. BERTET, F. R. ONG, M. BOISSONNEAULT, A. BOLDUC, F. MALLET, A. C. DOHERTY, A. BLAIS, D. VION, AND D. ESTEVE	
1.1	Presentation of the system	2
1.2	Semiclassical dynamics of the nonlinear resonator	7
1.3	High-fidelity qubit readout by a nonlinear resonator	12
1.4	Backaction of a driven Kerr resonator on a qubit	17
1.5	Conclusion	28
	References	29
2	Quantum-classical correspondence for a dc-biased cavity resonator–Cooper-pair transistor system	33
	M. P. BLENCOWE, A. D. ARMOUR, AND A. J. RIMBERG	
2.1	Introduction	33
2.2	The cavity–Cooper-pair transistor device	36
2.3	Classical model of device	37
2.4	Classical dynamics	41
2.5	Quantum model of device	44
2.6	Quantum dynamics	49
2.7	Classical limit	51
2.8	Conclusion	55
	Acknowledgments	56
	References	56
3	Activated switching in nonlinear micromechanical resonators	59
	H. B. CHAN AND C. STAMBAUGH	
3.1	Introduction	59
3.2	Micromechanical torsional oscillator	60
3.3	Switching-path distribution	67
3.4	Activation barrier scaling near bifurcation points	73
3.5	Critical kinetic phenomena in resonantly driven oscillators	80
3.6	Conclusion	88
	Acknowledgments	89
	References	90
4	Measurement and control of quantum cavities with electronic atoms	92
	A. N. CLELAND	
4.1	Introduction	92

4.2	A Josephson junction as a tunable two-level system	93
4.3	Harmonic oscillators	102
4.4	Coupled qubit and resonator	105
	References	116
5	Nondegenerate, three-wave mixing with Josephson junctions	119
	M.H. DEVORET, A. KAMAL, AND B. ABDO	
5.1	Introduction	119
5.2	Input-output treatment of a generic nondegenerate, three-wave mixing device	121
5.3	Three-wave mixing amplitude	128
5.4	Limitation of dynamic range due to pump depletion	131
5.5	Conclusion	133
	Appendix: Quantum signals propagating along a transmission line and input-output formalism	133
	Acknowledgments	140
	References	140
6	Dynamics of nano-magnetic oscillators	142
	T. DUNN, A. L. CHUDNOVSKIY, AND A. KAMENEV	
6.1	Introduction	142
6.2	Deterministic dynamics	144
6.3	Equilibrium stochastic dynamics of magnetization	149
6.4	Shot-noise and nonequilibrium stochastic dynamics	151
6.5	Dynamics and optimization of the magnetization switching	154
6.6	Spectral width of the steady-state precession	158
6.7	Conclusion	161
	Acknowledgments	161
	References	161
7	Periodically modulated quantum nonlinear oscillators	165
	M. I. DYKMAN	
7.1	Introduction	165
7.2	Resonant modulation: quantum heating	167
7.3	Quantum activation	175
7.4	Power spectra of modulated quantum oscillators	183
7.5	Nonresonant modulation: oscillator heating and cooling	190
7.6	Conclusions	194
	Acknowledgments	195
	References	195
8	Nonlinear oscillators and high fidelity qubit state measurement in circuit quantum electrodynamics	198
	E. GINOSSAR, L. S. BISHOP, AND S. M. GIRVIN	
8.1	Introduction: the high power response of the transmon-cavity system	198
8.2	Implications of the nonlinearity at the high excitation regime	199
8.3	Applications for high fidelity qubit state measurement	207

8.4	Conclusion and future prospects	216
	Acknowledgments	216
	References	216
9	Spontaneous time-symmetry breaking in a vibrating cold atom system	220
	M.-S. HEO, Y. KIM, H.-R. NOH, AND W. JHE	
9.1	Introduction	220
9.2	Experiment and discussions	221
9.3	Theoretical model	226
9.4	Calculations of critical properties	230
9.5	Beyond the single-component Landau theory: fluctuations of the total number of trapped atoms	235
9.6	Conclusions	237
	Acknowledgments	237
	References	238
10	Nonlinear nanoelectromechanical systems	239
	R. KARABALIN AND M. L. ROUKES	
10.1	Introduction	239
10.2	Basins of attraction	242
10.3	Dynamics of strongly coupled nonlinear resonators	247
10.4	Parametric amplification and actuation	257
10.5	Bifurcation-topology amplifier	262
10.6	Conclusions	274
	Acknowledgments	275
	References	275
11	Collective dynamics in arrays of coupled nonlinear resonators	278
	R. LIFSHITZ, E. KENIG, AND M.C. CROSS	
11.1	Arrays of nonlinear MEMS and NEMS resonators	278
11.2	Equations of motion and basic assumptions	279
11.3	Discrete amplitude equations: Example I—Collective response to parametric excitation	282
11.4	Discrete amplitude equations: Example II—Synchronization of nonlinear oscillators	287
11.5	Continuous amplitude equations: Example III—Nonlinear competition between extended modes	292
11.6	Continuous amplitude equations: Example IV—Intrinsic localized modes (ILMs)	301
	Acknowledgments	308
	References	308
12	Carbon nanotubes: nonlinear high-Q resonators with strong coupling to single-electron tunneling	312
	H. B. MEERWALDT, G. A. STEELE, AND H. S. J. VAN DER ZANT	
12.1	Introduction	312

12.2	Detecting the motion of a carbon nanotube resonator	314
12.3	Linear dynamics of a carbon nanotube resonator strongly coupled to a quantum dot	318
12.4	Carbon nanotube resonators in the nonlinear regime	323
12.5	Parametric excitation and mode coupling in carbon nanotube resonators	336
12.6	Conclusions	338
	Acknowledgments	338
	References	338
13	Dissipative and conservative nonlinearity in carbon nanotube and graphene mechanical resonators	341
	J. MOSER, A. EICHLER, B. LASSAGNE, J. CHASTE, Y. TARAKANOV, J. KINARET, I. WILSON-RAE, AND A. BACHTOLD	
13.1	Introduction	341
13.2	Detection of the mechanical vibrations	344
13.3	Variation of the quality factor with the amplitude of the motion	346
13.4	Hysteresis	349
13.5	Parametric excitation	350
13.6	Discussion on the nonlinear damping force	351
13.7	Coupling mechanical vibrations to electron transport in a nanotube resonator	354
13.8	Conclusion	357
	Acknowledgments	358
	References	358
14	Dynamical bifurcation and amplification in Josephson junction oscillators	362
	R. VIJAY, K.W. MURCH, AND I. SIDDIQI	
14.1	Steady state response	362
14.2	Driven response: amplitude modulation	369
14.3	Driven response: frequency modulation	380
14.4	Summary	387
	References	388
15	Parametric oscillators based on superconducting circuits	390
	C. M. WILSON, T. DUTY, AND P. DELSING	
15.1	Introduction	390
15.2	General theory	392
15.3	Tunable microwave cavities	399
15.4	Experiments	401
15.5	Conclusions	408
	References	408
	Index	411
