

PREFACE TO THE SECOND EDITION **xiii**

ACKNOWLEDGEMENTS **xiv**

ABOUT THE COMPANION WEBSITE **xv**

## **1** Introduction to Blood Science **1**

- 1.1 What is Blood Science? 1
- 1.2 Clinical Biochemistry 7
- 1.3 Blood Transfusion 9
- 1.4 Genetics 11
- 1.5 Haematology 17
- 1.6 Immunology 21
- 1.7 The Role of Blood Science in Modern Healthcare 23
- 1.8 What this Book will Achieve 25
- Summary 26
- Further Reading 26
- Websites 26

## **2** Analytical Techniques in Blood Science **27**

- 2.1 Venepuncture 28
- 2.2 Anticoagulants 28
- 2.3 Sample Identification and Tracking 29
- 2.4 Technical and Analytical Confidence 30
- 2.5 Major Techniques 36
- 2.6 Molecular Genetics 47
- 2.7 Point of Care Testing 51
- 2.8 Health and Safety in the Laboratory 53
- 2.9 Case Studies – 55
- Summary 55
- Further Reading 55
- Websites 56

## **3** The Physiology of the Red Blood Cell **57**

- 3.1 Introduction 57
- 3.2 The Development of Blood Cells 59
- 3.3 Erythropoiesis 63
- 3.4 The Red Cell Membrane 65
- 3.5 The Cytoplasm of the Red Cell 67
- 3.6 Oxygen Transport 75
- 3.7 Recycling the Red Cell 77
- 3.8 Red Cell Indices in the Full Blood Count 79
- 3.9 Morphology of the Red Cell 81
- Summary 84
- Further Reading 84
- Website 84

- 4 The Pathology of the Red Blood Cell 85**
- 4.1 Introduction: Diseases of Red Cells 86
  - 4.2 Anaemia Resulting from Attack on, or Stress to, the Bone Marrow 89
  - 4.3 Anaemia Due to Micronutrient Deficiency 91
  - 4.4 Intrinsic Defects in the Red Cell 97
  - 4.5 External Factors Acting on Healthy Cells 113
  - 4.6 Erythrocytosis and Polycythaemia 117
  - 4.7 Inclusion Bodies 120
  - 4.8 Molecular Genetics and Red Cell Disease 120
  - 4.9 Case Studies 122
  - Summary 124
  - Further Reading 124
  - Websites 124
- 5 White Blood Cells in Health and Disease 125**
- 5.1 Introduction 125
  - 5.2 Leukopoiesis 128
  - 5.3 Neutrophils 132
  - 5.4 Lymphocytes 134
  - 5.5 Monocytes 135
  - 5.6 Eosinophils 136
  - 5.7 Basophils 137
  - 5.8 Leukocytes in Action 138
  - 5.9 White Cells in Clinical Medicine 148
  - 5.10 Case Studies 154
  - Summary 156
  - Further Reading 156
- 6 White Blood Cell Malignancy 157**
- 6.1 The Genetic Basis of Leukocyte Malignancy 158
  - 6.2 Tissue Techniques in Haemato-oncology 162
  - 6.3 Leukaemia 164
  - 6.4 Lymphoma 174
  - 6.5 Myeloma and Related Conditions 179
  - 6.6 Myelofibrosis and Myelodysplasia 185
  - 6.7 Non-coding RNAs 186
  - 6.8 Case Studies 187
  - Summary 189
  - Further Reading 189
- 7 The Physiology and Pathology of Haemostasis 191**
- Virchow's Triad 192
  - 7.1 The Blood Vessel Wall 192
  - 7.2 Platelets 194
  - 7.3 The Coagulation Pathway 196
  - 7.4 Haemostasis as the Balance Between Thrombus Formation and Removal 201
  - 7.5 The Haemostasis Laboratory 204
  - 7.6 The Pathology of Thrombosis 207
  - 7.7 Case Study 211
  - Summary 212
  - Further Reading 212
- 8 The Diagnosis and Management of Disorders of Haemostasis 214**
- 8.1 Thrombosis 1: Overactive Platelets and Thrombocytosis 215
  - 8.2 Thrombosis 2: Overactive Coagulation 219

- 8.3 Haemorrhage 1: Platelet Underactivity and Thrombocytopenia 235
- 8.4 Haemorrhage 2: Coagulation Underactivity 240
- 8.5 Disseminated Intravascular Coagulation (DIC) 246
- 8.6 Molecular Genetics in Haemostasis 247
- 8.7 Case Studies 249
- Summary 252
- Further Reading 253
- Websites 253
- 9 Immunopathology 254**
- 9.1 Introduction 255
- 9.2 Immunopathology 1: Immunodeficiency 256
- 9.3 Immunopathology 2: Hypersensitivity 262
- 9.4 Immunopathology 3: Autoimmune Disease 268
- 9.5 Immunotherapy 277
- 9.6 The Immunology Laboratory 282
- 9.7 Case Studies 287
- Summary 289
- Further Reading 290
- Websites 290
- 10 Immunogenetics and Histocompatibility 291**
- 10.1 The Genetics of Antigen Recognition 292
- 10.2 Human Leucocyte Antigens (HLA) 296
- 10.3 Mechanisms of Lymphocyte Activation 298
- 10.4 Transplantation 303
- 10.5 Autoimmunity and HLA 311
- Summary 314
- Further Reading 314
- Websites 314
- 11 Blood Transfusion 315**
- What Can Be Transfused? 315
- The Basis of Transfusion Science 316
- 11.1 Blood Collection and Processing 317
- 11.2 Blood Groups 320
- 11.3 Laboratory Practice of Blood Transfusion 330
- 11.4 Clinical Practice of Blood Transfusion 338
- 11.5 Hazards of Blood Transfusion 341
- Summary 344
- Further Reading 344
- Websites 345
- 12 Waste Products, Electrolytes, and Renal Disease 346**
- 12.1 Renal Anatomy and Physiology 347
- 12.2 Homeostasis 349
- 12.3 Excretion 356
- 12.4 Renal Endocrinology 358
- 12.5 Renal Disease 360
- 12.6 Case Studies 366
- Summary 367
- Further Reading 368
- Websites 368

**13 Hydrogen Ions, pH, and Acid–Base Disorders 369**

- 13.1 Ions and Molecules 370
- 13.2 Blood Gases 373
- 13.3 Acidosis (pH < 7.3) 377
- 13.4 Alkalosis (pH > 7.5) 379
- 13.5 Mixed Acid–Base Conditions 379
- 13.6 Clinical Interpretation 380
- 13.7 Genetics of Acid/Alkali Homeostasis 381
- 13.8 Case Studies 381
- Summary 383
- Further Reading 384
- Website 384

**14 Glucose, Lipids, and Atherosclerosis 385**

- 14.1 Glucose 386
- 14.2 Dyslipidaemia 404
- 14.3 Atherosclerosis 417
- 14.4 Case Studies 424
- Summary 426
- Further Reading 426
- Websites 427

**15 Calcium, Phosphate, Magnesium, and Bone Disease 428**

- 15.1 Calcium 429
- 15.2 Phosphates 432
- 15.3 Magnesium 433
- 15.4 The Laboratory 433
- 15.5 Disorders of Calcium Homeostasis 435
- 15.6 Disorders of Phosphate Homeostasis 439
- 15.7 Disorders of Magnesium Homeostasis 441
- 15.8 Bone Physiology 442
- 15.9 Bone Disease 444
- 15.10 Case Studies 448
- Summary 450
- Further Reading 450
- Websites 451

**16 Nutrients and Gastrointestinal Disorders 452**

- 16.1 Nutrients 452
- 16.2 Intestinal Tract Physiology 458
- 16.3 Intestinal Tract Pathology 460
- 16.4 Case Studies 466
- Summary 467
- Further Reading 468

**17 Liver Function Tests and Plasma Proteins 469**

- 17.1 Anatomy and Physiology of the Liver 470
- 17.2 Liver Function Tests 475
- 17.3 Diseases of the Liver 477
- 17.4 LFTs in Liver Disease 482
- 17.5 Plasma Proteins 484

- 17.6 Molecular Genetics in Liver Disease 493
- 17.7 Case Studies 495
- Summary 497
- Further Reading 497
- Websites 497
  
- 18 Endocrinology 498**
  - 18.1 Endocrine Physiology 499
  - 18.2 The Pathology of the Endocrine System 512
  - 18.3 Case Studies 532
  - Summary 534
  - Further Reading 535
  - Websites 535
  
- 19 Cancer and Tumour Markers 536**
  - 19.1 General Concepts in Cancer Biology 536
  - 19.2 Blood Science and Cancer 540
  - 19.3 Molecular Genetics 546
  - 19.4 Case Studies 547
  - Summary 549
  - Further Reading 549
  - Websites 550
  
- 20 Inherited Metabolic Disorders 551**
  - 20.1 The Genetics of Inheritance 552
  - 20.2 Molecular Inherited Metabolic Disorders 553
  - 20.3 Organelle-Inherited Metabolic Disorders 558
  - 20.4 Ante-natal Diagnosis and Neonatal Screening 559
  - 20.5 Case Studies 560
  - Summary 561
  - Further Reading 562
  
- 21 Drugs and Poisons 563**
  - 21.1 Toxicology 563
  - 21.2 Toxicology of Specific Compounds 565
  - 21.3 Therapeutic Drug Monitoring 570
  - 21.4 Case Studies 574
  - Summary 576
  - Further Reading 576
  
- 22 Case Reports in Blood Science 577**
  - Abbreviations 577
  - Case Report 1 578
  - Additional Analyses 579
  - Case Report 2 579
  - Case Report 3 581
  - Case Report 4 582
  - Case Report 5 585
  - Case Report 6 587
  - Case Report 7 589
  - Case Report 8 591
  - Case Report 9 592
  - Case Report 10 595

**xii Contents**

Case Report 11 598  
Case Report 12 598  
Case Report 13 601  
Case Report 14 602  
Case Report 15 602  
Acknowledgements 604

**FURTHER READING 605**

**APPENDIX: REFERENCE RANGES 606**

**INDEX 611**
