1. The background and history of space law	1
<i>Peter Jankowitsch</i>	
1.1 A political overview	1
1.2 Space law and the new majority in the United Nations	9
1.3 Space law and the United Nations	10
1.4 Space law and space arms control	14
1.5 New branches of space law: An unfinished history	20
1.6 The future of space law	26
2. International space law	29
<i>Frans von der Dunk</i>	
2.1 Introduction	29
2.2 The key characteristics of international space law	37
2.3 The core substance of international space law: The UN space treaties	49
2.4 Beyond the core of international space law	106
2.5 Concluding remarks	125
3. National space law	127
<i>Irmgard Marboe</i>	
3.1 Introduction	127
3.2 International law requirements	130
3.3 Examples of national space laws	139
3.4 International initiatives	179
3.5 Conclusion	184

4.	European space law	205
	<i>Frans von der Dunk</i>	
4.1	Introduction	205
4.2	Operational integration of space activities: The European space organizations	208
4.3	Regulatory integration of space activities: The European Community/Union	239
4.4	The convergence of the European Space Agency and European Union	251
4.5	Concluding remarks	267
5.	International organizations in space law	269
	<i>Frans von der Dunk</i>	
5.1	Introduction: Intergovernmental organizations and outer space	269
5.2	Regulatory intergovernmental organizations and outer space: A survey	271
5.3	Operational intergovernmental organizations and outer space: An introduction	282
5.4	INTELSAT	283
5.5	INMARSAT	290
5.6	EUTELSAT	295
5.7	INTERSPUTNIK	301
5.8	ARABSAT	305
5.9	IGO involvement in space law: A legal assessment	307
5.10	Satellite communication IGO privatization: A legal assessment	317
5.11	Concluding remarks	329
6.	Legal aspects of the military uses of outer space	331
	<i>Fabio Tronchetti</i>	
6.1	Introduction	331
6.2	Militarization versus weaponization of outer space	333
6.3	The legal framework regulating military uses of outer space: The UN space treaties	334
6.4	The legal framework regulating military uses of outer space: Other relevant international regimes	342
6.5	The legal framework regulating military uses of outer space: General public international law	350
6.6	Other legal regimes affecting military activities in outer space	359

6.7	Recent developments	377
6.8	Conclusion	381
7.	Legal aspects of launch services and space transportation	382
	<i>Peter van Fenema</i>	
7.1	Introduction	382
7.2	The main categories of actors and their relevance from a legal perspective	384
7.3	The existing regulatory framework	403
7.4	Legal aspects of launch safety and space traffic management	405
7.5	Legal aspects of market access and competition issues	417
7.6	Conclusion	452
8.	Legal aspects of satellite communications	456
	<i>Frans von der Dunk</i>	
8.1	Introduction: The definitional issues	456
8.2	The ITU regime and satellite communications	458
8.3	The UN 'regime' on direct broadcasting by satellite	493
8.4	Concluding remarks	500
9.	Legal aspects of satellite remote sensing	501
	<i>Fabio Tronchetti</i>	
9.1	Introduction	501
9.2	Remote sensing from space: Characteristics and applications	502
9.3	The evolution of remote sensing activities	505
9.4	The legal framework for remote sensing activities	513
9.5	Conclusion	553
10.	Legal aspects of satellite navigation	554
	<i>Lesley Jane Smith</i>	
10.1	Introduction	554
10.2	The current GNSS systems	556
10.3	Legal aspects of the use of GNSS in the transport sector	577
10.4	Regional and national GNSS: Legal aspects	594
10.5	Alternative heads of liability: Certification and augmentation	599
10.6	Civil aviation: Liability for navigational aids and development of CNS/ATM systems	602
10.7	GNSS and the maritime transport sector	607
10.8	The road sector and autonomous driving systems	610
10.9	GNSS in the context of the rail transport sector	613

10.10	Feasibility of a UNIDROIT GNSS Convention	614
10.11	Conclusion	615
11.	Legal aspects of public manned spaceflight and space station operations	618
	<i>Carla Sharpe and Fabio Tronchetti</i>	
11.1	Introduction	618
11.2	From single-state space stations to the International Space Station	620
11.3	The legal framework regulating ISS activities	626
11.4	The legal framework regulating ISS activities	638
11.5	Military uses of the International Space Station	653
11.6	The future of the International Space Station	657
11.7	Conclusion: The International Space Station as a model for future cooperation in space activities?	659
12.	Legal aspects of private manned spaceflight	662
	<i>Frans von der Dunk</i>	
12.1	Introduction	662
12.2	The key definitional issues	666
12.3	Legal issues of private sub-orbital manned spaceflight	672
12.4	Legal issues of private orbital manned spaceflight	697
12.5	Legal issues of both sub-orbital and orbital private manned spaceflight	708
12.6	Concluding remarks	715
13.	Environmental aspects of space activities	717
	<i>Lotta Viikari</i>	
13.1	Introduction	717
13.2	Environmental hazards	719
13.3	Space law from an environmental perspective	725
13.4	The way forward	756
13.5	Conclusion	765
14.	Legal aspects of space resource utilization	769
	<i>Fabio Tronchetti</i>	
14.1	Introduction	769
14.2	The (natural) resources of the moon and other celestial bodies	771
14.3	Extraterrestrial mining: Where do we stand now?	772

14.4	The legal status of celestial bodies and extraterrestrial natural resources	777
14.5	International seabed mining	792
14.6	The use of the geostationary orbit	798
14.7	Mineral activities in Antarctica	803
14.8	A legal regime for the exploitation of extraterrestrial natural resources	809
14.9	Conclusion	812
15.	International trade aspects of space services	814
	<i>Frans von der Dunk</i>	
15.1	Introduction: The development of an international trade regime	814
15.2	The general aspects of the GATT, GATS and WTO regimes	818
15.3	Launch services: International trade regime issues	836
15.4	The international trade regime for satellite communications	843
15.5	Prospective candidates for application of the GATS/WTO regime?	853
15.6	Concluding remarks	872
16.	Financing space ventures	874
	<i>Mark Sundahl</i>	
16.1	Introduction	874
16.2	The nature and challenges of financing space ventures	876
16.3	Secured transactions under Article 9 of the Uniform Commercial Code	882
16.4	The UNIDROIT Convention on International Interests in Mobile Equipment and the Space Assets Protocol	887
17.	Insurance in the context of space activities	910
	<i>Cécile Gaubert</i>	
17.1	Introduction	910
17.2	Third-party liability insurance	912
17.3	Property damage insurance	930
17.4	Space debris in the context of insurance	937
17.5	Astronauts' insurance	941
17.6	The role of the insurance broker	943
17.7	Conclusion	944
18.	Intellectual property rights in the context of space activities	949
	<i>Catherine Doldirina</i>	
18.1	Introduction	949

18.2	Copyright	952
18.3	Patent	972
18.4	Conclusions	989
19.	Dispute resolution regarding space activities	995
	<i>Maureen Williams</i>	
19.1	The background – the law in force: Public international law/space law	995
19.2	The landmarks and precedents for progressive development of the law	1014
19.3	Redesigning the system: The indispensable reform	1031
19.4	The conclusions so far: Sparkles of hope	1045
	<i>Index</i>	1047
