<b>Preface</b> . . . . .	vii
--------------------------	-----

## PART I

<b>1. Principles of Relativity</b> . . . . .	3
1.1 Galileo's Principle . . . . .	3
1.2 A Century of Electricity and Magnetism . . . . .	5
1.3 Maxwell's Equations . . . . .	7
1.4 Stellar Aberration . . . . .	8
1.5 The Michelson–Morley Experiment . . . . .	8
1.6 The Trouton–Noble Experiment . . . . .	13
Problems . . . . .	16
<b>2. The Physical Arguments</b> . . . . .	18
2.1 Physical Ideas . . . . .	18
2.2 Some Applications . . . . .	27
2.3 Velocity Addition . . . . .	35
2.4 The Twin Paradox . . . . .	37
2.5 The Pole in the Barn Paradox . . . . .	40
2.6 Coordinate Frames of Reference . . . . .	42
Problems . . . . .	44
<b>3. The Algebraic and Graphic Arguments</b> . . . . .	48
3.1 The Lorentz Transformation . . . . .	48
3.2 Other Applications . . . . .	51
3.3 Velocity Addition . . . . .	55
3.4 The Invariant Interval . . . . .	57
3.5 The Minkowski Diagram . . . . .	61
3.6 Use of the Minkowski Diagram . . . . .	66
3.7 Four-Vectors . . . . .	71
3.8 Velocity and Acceleration Four-Vectors . . . . .	72
3.9 The Propagation Four-Vector . . . . .	75
3.10 Doppler Effect . . . . .	78
3.11 Experimental Evidence—Kinematics . . . . .	81
Problems . . . . .	84
<b>4. Mathematical Tools</b> . . . . .	91
4.1 Matrices . . . . .	91
4.2 The Lorentz Transformation . . . . .	98
4.3 Vector Operators . . . . .	100
4.4 Tensors . . . . .	103

4.5	The Metric Inequality . . . . .	107
	Summary . . . . .	109
	Problems . . . . .	110
<b>5.</b>	<b>Dynamics . . . . .</b>	<b>113</b>
5.1	The Physical Assumptions . . . . .	114
5.2	The Euler–Lagrange Formalism . . . . .	121
5.3	The Momentum Four-Vector . . . . .	125
5.4	The Four-Force . . . . .	127
5.5	Torque . . . . .	134
5.6	Collisions . . . . .	136
5.7	Experimental Evidence—Dynamics . . . . .	142
	Problems . . . . .	144
<b>6.</b>	<b>Electromagnetic Theory . . . . .</b>	<b>148</b>
6.1	Electric and Magnetic Fields . . . . .	148
6.2	Lorentz Force . . . . .	153
6.3	Moving Magnet Problem . . . . .	157
6.4	Trouton–Noble Experiment . . . . .	161
6.5	Maxwell’s Equations . . . . .	163
6.6	Electromagnetic Potentials . . . . .	166
6.7	Energy–Momentum Tensor . . . . .	168
	Problems . . . . .	170
 <b>PART II</b>		
<b>7.</b>	<b>Differential Geometry I . . . . .</b>	<b>177</b>
7.1	The Scalar Invariant . . . . .	177
7.2	The Metric Tensor . . . . .	178
7.3	Vectors . . . . .	181
7.4	The Rectilinear Case . . . . .	183
7.5	The Polar Case . . . . .	185
7.6	Contravariant Metric Tensor . . . . .	190
7.7	Tensors . . . . .	191
	Summary of Tensor Algebra . . . . .	195
7.8	Parallel Displacement . . . . .	196
7.9	The Geodesic Path . . . . .	204
7.10	Parallel Displacement of Covariant Vectors . . . . .	208
7.11	Covariant Derivatives . . . . .	209
7.12	Space-Time Differential Geometry . . . . .	213
	Summary of Four-Vectors . . . . .	217
	Problems . . . . .	218
<b>8.</b>	<b>Uniform Acceleration . . . . .</b>	<b>221</b>
8.1	Nonrigid Bodies . . . . .	221
8.2	Accelerating a Point Mass . . . . .	224

8.3	A Uniformly Accelerated Frame . . . . .	228
8.4	Uniformly Accelerated Coordinates . . . . .	231
8.5	The Matter of Metric . . . . .	232
	Summary of Metric Relationships . . . . .	234
8.6	Kinematic Characteristics of the System . . . . .	235
8.7	Falling Bodies . . . . .	241
8.8	Geodesic Paths . . . . .	244
8.9	Falling Clocks . . . . .	249
8.10	A Supported Object . . . . .	252
8.11	Local Coordinates . . . . .	253
	Summary of Kinematic Relationships . . . . .	256
8.12	Dynamics . . . . .	257
8.13	Gravitational Force and Constants of Motion . . . . .	261
	Problems . . . . .	265
<b>9.</b>	<b>Rotation and the Electromagnetic Field . . . . .</b>	<b>269</b>
9.1	The Rotation Transformation . . . . .	269
9.2	Physical Interpretation . . . . .	271
9.3	The Geodesic Equation . . . . .	273
9.4	Dynamics . . . . .	274
9.5	General Electromagnetic Fields . . . . .	278
9.6	Nongeodesic Paths . . . . .	281
9.7	Generally Covariant Field Equations . . . . .	283
	Problems . . . . .	284
<b>10.</b>	<b>The Material Medium . . . . .</b>	<b>287</b>
10.1	The Energy–Momentum Tensor . . . . .	287
10.2	Dust Particles . . . . .	288
10.3	Ideal Gas . . . . .	290
10.4	Internal Forces . . . . .	290
10.5	The Total Tensor . . . . .	295
	Problems . . . . .	296
<b>11.</b>	<b>Differential Geometry II: Curved Surfaces . . . . .</b>	<b>298</b>
11.1	A Spherical Surface . . . . .	298
11.2	A Curvature Criterion . . . . .	304
11.3	Curvature Tensor on a Sphere . . . . .	306
11.4	Ricci Tensor and the Scalar Curvature . . . . .	307
	Problems . . . . .	309
<b>12.</b>	<b>General Relativity . . . . .</b>	<b>312</b>
12.1	The Principle of Equivalence . . . . .	313
12.2	Einstein's Field Equation . . . . .	315
12.3	Evaluation of the Constant . . . . .	318
12.4	The Schwarzschild Solution . . . . .	321
12.5	Kinematic Characteristics of the Field . . . . .	324

12.6	Falling Bodies . . . . .	328
12.7	Four-Velocity . . . . .	330
12.8	Dynamics . . . . .	330
12.9	Theory as Construct . . . . .	338
12.10	Three Tests of General Relativity . . . . .	339
12.11	New Tests and Challenges . . . . .	344
	Problems . . . . .	346
<b>13.</b>	<b>Astrophysics . . . . .</b>	<b>349</b>
13.1	Compact Objects . . . . .	349
13.2	Black Holes . . . . .	351
13.3	Rotating Black Holes . . . . .	358
13.4	Evidence for Compact Objects . . . . .	368
13.5	Gravity Waves . . . . .	377
	Problems . . . . .	388
<b>14.</b>	<b>Cosmology . . . . .</b>	<b>392</b>
14.1	The Cosmological Principle . . . . .	392
14.2	The Cosmological Constant . . . . .	393
14.3	Three-Dimensional Hypersurface . . . . .	394
14.4	General Solution of the Field Equation . . . . .	398
14.5	Einstein and de Sitter Solutions . . . . .	400
14.6	The Matter-Dominated Universe . . . . .	402
14.7	Critical Mass . . . . .	405
14.8	Measuring a Flat, Matter-Dominated Universe . . . . .	407
14.9	The Inflationary Universe . . . . .	416
	Problems . . . . .	423
<b>Appendixes</b>		
A.	The Lorentz Transformation . . . . .	425
B.	Calculus of Variations . . . . .	427
C.	The Geodesic Equations . . . . .	430
D.	The Geodesic Equation in Coordinate Form . . . . .	431
E.	Uniformly Accelerated Transformation Equations . . . . .	432
F.	The Riemann–Christoffel Curvature Tensor . . . . .	434
G.	Transformation to the Tangent Plane . . . . .	436
H.	General Lorentz Transformation and the Stress Tensor . . . . .	438
	Answers to Selected Problems . . . . .	439
	References . . . . .	443
	Index . . . . .	445
