

# STATIC FIELDS AND POTENTIALS

<b>Introduction</b>	<b>6</b>
<b>Chapter 1 Gravitational and electric forces and fields</b>	<b>7</b>
1 The story of planetary motion	7
2 Gravitational forces and fields	10
2.1 Newton's law and gravitational forces between two masses	10
2.2 Addition of forces: more than two masses	12
2.3 Introduction to the gravitational field	14
2.4 Vector and scalar fields	14
2.5 Defining the gravitational field	16
2.6 The force on a particle in a gravitational field	17
2.7 The gravitational field due to a point particle	18
3 A first look at charge	20
3.1 Some simple electrostatic phenomena	20
3.2 Electric charge	21
3.3 The distribution of electric charge	23
4 Electric forces and fields	28
4.1 Coulomb's law and the electrostatic forces between two charges	28
4.2 Coulomb's law	31
4.3 Defining the electric field	32
4.4 The force on a charge in an electric field	34
4.5 The electric field due to a point charge	35
4.6 Addition of electric fields	36
4.7 Representations of electric fields	37
4.8 Field lines in general	41
5 Applications of electric fields	42
5.1 Millikan's oil drop experiment	42
5.2 Ink-jet and electrostatic printing	44
5.3 Liquid crystal displays	48
5.4 The Earth's electric field	49
6 Closing items	49
<b>Chapter 2 Gravitational and electric potential</b>	<b>53</b>
1 Where does a star's energy come from?	53
2 Potential energy	54
2.1 Gravitational potential energy near the surface of the Earth	57
3 Gravitational and electric potential	61
3.1 Defining the electric potential	61
3.2 The relationship between field and potential	64
3.3 Equipotentials and field representations	66
3.4 Electrostatic screening	71
4 Capacitance and energy storage in electric fields	72
4.1 Capacitors	74
4.2 Energy storage in capacitors	77

5	Applications of potential and potential energy	78
5.1	Hydroelectric power	79
5.2	White dwarfs, red giants, neutron stars and black holes	80
5.3	Ion thrusters	83
5.4	Electrophoresis and DNA fingerprinting	86
5.5	Cathode ray and television tubes	88
6	Closing items	89
<b>Chapter 3 Electric currents</b>		<b>93</b>
1	An electric world	93
2	What is an electric current?	94
2.1	Currents in metals	94
2.2	Currents in insulators or semiconductors	95
2.3	Currents in solutions	96
2.4	Currents in plasmas	96
3	Currents in simple circuits	97
3.1	Basic definitions	97
3.2	Why currents flow	99
3.3	Resistance and simple circuits	100
3.4	Kirchhoff's laws	103
3.5	Circuits with a capacitor	109
4	Power, internal resistance and electromotive force	112
4.1	Power dissipated in a resistor	112
4.2	Batteries and electromotive force	114
5	Currents in the everyday world	118
5.1	Resistance sensors	118
5.2	Electric lights	120
5.3	Currents in the Earth and its atmosphere	123
5.4	Currents in living organisms	126
6	Closing items	127
<b>Chapter 4 Magnetic fields and the Lorentz force law</b>		<b>130</b>
1	The magic of magnetism	130
2	The magnetic field	131
2.1	Charged particles in electric and magnetic fields	131
2.2	Magnetic fields and magnetic field strengths	134
2.3	Representations of magnetic fields	138
2.4	Some fundamental questions about magnetic fields	140
3	The generation of magnetic fields	141
3.1	Magnetic field due to a current in a long straight wire	142
3.2	Magnetic field due to a current in a circular loop of wire	143
3.3	Magnetic field due to a current in two coils of wire	145
3.4	Magnetic field due to a current in a cylindrical solenoid	146
3.5	Magnetic field of the Earth	148
3.6	Biological magnetic fields	148
4	Magnetic materials	150
4.1	Permanent magnets	150
4.2	The response of substances to applied magnetic fields	150
4.3	Understanding ferromagnets	151
4.4	Magnetic materials in action	156

5	The motion of charged particles in uniform magnetic fields	157
5.1	Motion of a charged particle in a uniform magnetic field	157
5.2	The Lorentz force law	163
5.3	Devices involving uniform fields	165
5.4	Magnetic forces on current-carrying conductors	170
6	The motion of charged particles in non-uniform magnetic fields	175
6.1	Magnetic mirrors and magnetic bottles	175
6.2	Trapped particles in the Earth's magnetic field	177
7	Closing items	179
<b>Chapter 5 Consolidation and skills development</b>		<b>183</b>
1	Introduction	183
2	Overview of Chapters 1 to 4	183
3	Critical skills	187
4	Basic skills and knowledge test	191
5	Interactive questions	193
6	<i>Physica</i> problems	193
<b>Answers and comments</b>		<b>194</b>
