1	Introduction to Infrared Devices and Fundamentals of their Operation	1
	<i>C.T. Elliott and N.T. Gordon</i>	
1.1	Introduction	1
1.2	Types of IR detector	6
1.3	Emitters	17
	References	22
2	Assessment of Infrared Materials and Devices	23
	<i>N.T. Gordon and I.M. Baker</i>	
2.1	Introduction	23
2.2	Material Characterization	23
2.3	Device Characterization	29
2.4	Detector Comparisons	37
2.5	Emitter Comparisons	41
	References	42
3	IV-VI (Lead Chalcogenide) Infrared Sensors and Lasers	43
	<i>H. Zogg and Akihiro Ishida</i>	
3.1	Introduction	43
3.2	Some Material Properties	44
3.3	Growth Techniques	50
3.4	Infrared Sensors	53
3.5	Lead Salt Infrared Emitters	63
	References	73

4	Metal Silicide Schottky Infrared Detector Arrays	77
	<i>Masafumi Kimata</i>	
4.1	Introduction	77
4.2	Internal Photoemission	78
4.3	Silicon Substrate	82
4.4	Platinum Silicide	84
4.5	Cut-off Extension	86
4.6	Pixel Design	90
4.7	PtSi SB FPAs	93
4.8	Summary	95
	References	96
5	Pyroelectric Materials and Devices	99
	<i>R.W. Whatmore and R. Watton</i>	
5.1	Introduction	99
5.2	The Physics of Pyroelectric Detectors	101
5.3	Pyroelectric Materials and Their Selection	113
5.4	Pyroelectric Thermal Imaging	125
5.5	Pyroelectric Arrays, Design, Technology and Performance	132
	References	144
6	Uncooled Microbolometer Infrared Sensor Arrays	149
	<i>R.A. Wood</i>	
6.1	Introduction	149
6.2	Fabrication of Arrays of Thermal Sensors	151
6.3	Micromachined Microbolometer Design and Fabrication	151
6.4	Temperature-Sensitive Resistor Materials for Microbolometers	155
6.5	Microbolometer Micromachining Sequence	156
6.6	Typical Microbolometer Parameters	157
6.7	Thermal Isolation of Microbolometers	159
6.8	Infrared Absorption in Microbolometers	159
6.9	Readout of Two-dimensional Arrays of Microbolometers	159
6.10	Calculation of the Performance of Bolometer Arrays	162
6.11	Practical Infrared Cameras Using Microbolometer Array	171
6.12	Conclusion	173
	Acknowledgments	174
	References	174

7	InSb: Materials and Devices	177
	<i>W.F.H. Micklethwaite and A.J. Johnson</i>	
7.1	InSb: the New-Old IR Material	177
7.2	InSb is Different	177
7.3	Purification and Doping	181
7.4	Crystal Growth	182
7.5	Fabrication	184
7.6	Finishing	185
7.7	Useful Techniques	188
7.8	InSb Devices	189
	References	203
8	Growth, Properties and Infrared Device Characteristics of Strained InAsSb-Based Materials	205
	<i>R.M. Biefeld and S.R. Kurtz</i>	
8.1	Introduction	205
8.2	Growth and Characterization of InAsSb by Metal-Organic Chemical Vapor Deposition (MOCVD)	210
8.3	Infrared Device Results	215
8.4	Summary and Future Directions	230
	Acknowledgments	231
	References	231
9	Tl-Based III-V Alloy Semiconductors	233
	<i>H. Asahi</i>	
9.1	Introduction	233
9.2	Expected Properties of Tl-Based III-V Alloys	234
9.3	Growth Issues	237
9.4	TlInSb on InSb	238
9.5	TlInAs on InAs	240
9.6	TlInP on InP	241
9.7	TlGaP on GaAs	242
9.8	TlGaAs on GaAs	244
9.9	TlInGaP on InP	244
9.10	TlInGaAs on InP	245
9.11	Summary	247
	References	248

10	MCT Materials Aspects	251
	<i>P. Capper</i>	
10.1	Introduction	251
10.2	Bulk Growth Techniques	252
10.3	Liquid Phase Epitaxy (LPE)	258
10.4	Metal-Organic Vapor Phase Epitaxy (MOVPE)	265
10.5	Molecular Beam Epitaxy (MBE)	271
	References	276
11	Photoconductive and Non-equilibrium Devices in HgCdTe and Related Alloys	279
	<i>C.T. Elliott</i>	
11.1	Introduction	279
11.2	Photoconductive Detectors	280
11.3	Non-equilibrium Devices	296
11.4	Conclusions	308
	Appendix	309
	Further Reading	309
	References	309
12	Photovoltaic Detectors in MCT	313
	<i>M.B. Reine</i>	
12.1	Introduction	313
12.2	Historical Perspective on Photovoltaic Detectors in MCT	314
12.3	MCT Hybrid Focal Plane Array Configurations	317
12.4	Principles of Operation and Figures of Merit for MCT PV Detectors	323
12.5	Junction Current Mechanisms for MCT Photodiodes	331
12.6	MCT Junction Photodiode Architectures	344
12.7	Recent Advances in SW and MW MCT Photodiodes	350
12.8	Recent Advances in VLW MCT Photodiodes	354
12.9	Dual-Band MCT Detector Arrays	360
12.10	Summary, Conclusions and Trends	364
	Acknowledgments	366
	References	366
	Appendix A: Guide to the HgCdTe Literature	372
	Array	371
	Conclusion	373
	Acknowledgments	374
	References	374

13	Hg-Based Alternatives to MCT	377
	<i>A. Rogalski</i>	
13.1	Introduction	377
13.2	Crystal Growth	378
13.3	Some Physical Properties	381
13.4	HgZnTe Detectors	385
13.5	HgMnTe Detectors	393
13.6	Conclusions	397
	References	398
14	Reduced-Dimensionality HgTe-CdTe for the Infrared	401
	<i>J.R. Meyer and I. Vurgaftman</i>	
14.1	Introduction	401
14.2	Energy Bands and Effective Masses	401
14.3	MBE Growth	405
14.4	Absorption, Lifetime, and IR Detectors	407
14.5	Photoluminescence	409
14.6	IR Lasers	413
14.7	Summary	420
	References	420
15	Quantum Well Infra-red Detectors	423
	<i>M.J. Kane</i>	
15.1	Introduction	423
15.2	The QWIP as a Photoconductive Detector	426
15.3	The Microscopic Physics of the QWIP	430
15.4	Performance of AlGaAs/GaAs QWIPs	438
15.5	Optical Coupling Methods	443
15.6	Imaging Arrays	448
15.7	QWIPs in materials other than n-type AlGaAs/GaAs	450
15.8	Conclusions and Future Prospects	454
	References	454
