Introduction: <i>Why I hated calculus but love statistics</i>	ix
Acknowledgments	xvii
1	
What's the Point?	1
2	
Descriptive Statistics: <i>Who was the best baseball player of all time?</i>	15
Appendix to Chapter 2	34
3	
Deceptive Description: <i>"He's got a great personality!" and other true but grossly misleading statements</i>	36
4	
Correlation: <i>How does Netflix know what movies I like?</i>	58
Appendix to Chapter 4	65
5	
Basic Probability: <i>Don't buy the extended warranty on your \$99 printer</i>	68
5½	
The Monty Hall Problem	90
6	
Problems with Probability: <i>How overconfident math geeks nearly destroyed the global financial system</i>	95

7	The Importance of Data: <i>“Garbage in, garbage out”</i>	110
8	The Central Limit Theorem: <i>The LeBron James of statistics</i>	127
9	Inference: <i>Why my statistics professor thought I might have cheated</i>	143
	Appendix to Chapter 9	164
10	Polling: <i>How we know that 64 percent of Americans support the death penalty (with a sampling error ± 3 percent)</i>	169
	Appendix to Chapter 10	183
11	Regression Analysis: <i>The miracle elixir</i>	185
	Appendix to Chapter 11	208
12	Common Regression Mistakes: <i>The mandatory warning label</i>	212
13	Program Evaluation: <i>Will going to Harvard change your life?</i>	225
	Conclusion: <i>Five questions that statistics can help answer</i>	241
	Appendix: <i>Statistical software</i>	257
	Notes	261
