## **Part I Scientific Foundation 1**

<b>Chapter 1</b>	<b>Introduction to the Issues and Scientific Approach Unique to This Book</b>	<b>3</b>
	Legislative Landscape: The Unfortunate Adverse Impact on Painful Backs	4
	Deficiencies in Current Diagnostic Practices	5
	Inadequacies in Current Care and Prevention	10
	Mechanical Loading and the Process of Injury: A Low Back Tissue Injury Primer	17
	Excellent Clinicians and Excellent Practice	20
	Unique Scientific Foundation of This Book	20
	In Vitro Lab	21
	In Vivo Lab	22
	A Final Note	28
<b>Chapter 2</b>	<b>Epidemiological Studies and What They Really Mean</b>	<b>29</b>
	Influence of Randomized Controlled Trials and Other Epidemiological Approaches	29
	Misunderstandings of Epidemiology	31
	Multidimensional Links Among Biomechanical, Psychosocial, and Personal Variables	32
	How Do Biomechanical Factors Affect LBD?	40
	Links Between Personal Factors and LBD	44
	Studies of Exercise Intervention	45
	Practical Application: What the Evidence Supports	46
	What Works Clinically	47
	A Final Note	47
<b>Chapter 3</b>	<b>Functional Anatomy of the Lumbar Spine</b>	<b>49</b>
	Anatomy Trains	49
	Basic Neural Structure	49
	Vascular Anatomy	50
	Vertebrae	50
	Sacroiliac Joints	60
	Intervertebral Disc	60
	Muscles	68
	Ligaments	86
	Lumbodorsal Fascia (LDF)	90
	Quick Review of the Pelvis, Hips, and Related Musculature	91
	Clinically Relevant Aspects of Pain and Anatomic Structure	95
	A Final Note	96

<b>Chapter 4</b>	<b>Normal and Injury Mechanics of the Lumbar Spine</b> . . . . .	<b>97</b>
	Kinematic Properties of the Thoracolumbar Spine . . . . .	97
	Kinetics and Normal Lumbar Spine Mechanics . . . . .	101
	Dubious Lifting Mechanisms . . . . .	128
	Other Important Mechanisms of Normal Spine Mechanics . . . . .	131
	Injury Mechanisms . . . . .	133
	Biomechanical and Physiological Changes Following Injury . . . . .	147
	A Final Note . . . . .	151
<b>Chapter 5</b>	<b>Myths and Realities of Lumbar Spine Stability</b> . . . . .	<b>153</b>
	Why Spine Stability Is Important for Everyone . . . . .	154
	Stability: A Qualitative Analogy . . . . .	155
	Quantitative Foundation of Stability . . . . .	156
	Stability Myths, Facts, and Clinical Implications . . . . .	161
	A Final Note . . . . .	164
<b>Part II</b>	<b>Injury Prevention</b> . . . . .	<b>165</b>
<b>Chapter 6</b>	<b>LBD Risk Assessment</b> . . . . .	<b>167</b>
	Brief Review of the Risk Factors for LBD . . . . .	167
	NIOSH Approach to Risk Assessment . . . . .	168
	Snook Psychophysical Approach . . . . .	170
	Lumbar Motion Monitor (LMM) . . . . .	171
	Ergowatch . . . . .	172
	Biological Signal-Driven Model Approaches . . . . .	173
	A Final Note . . . . .	175
<b>Chapter 7</b>	<b>Reducing the Risk of Low Back Injury</b> . . . . .	<b>177</b>
	Lessons From the Literature . . . . .	177
	LBD Prevention for Workers . . . . .	180
	The Question of Back Belts . . . . .	199
	LBD Prevention for Employers . . . . .	205
	Injury Prevention Primer . . . . .	208
	A Note for Consultants . . . . .	211
	Reducing the Risk in Athletes . . . . .	212
	A Final Note . . . . .	213
<b>Part III</b>	<b>Low Back Rehabilitation</b> . . . . .	<b>215</b>
<b>Chapter 8</b>	<b>Building Better Rehabilitation Programs for Low Back Injuries</b> . .	<b>217</b>
	Pain-Reducing Mechanisms of Exercise . . . . .	218
	Five-Stage Back Training Program . . . . .	219
	Finding the Best Approach . . . . .	220
	Stages of Patient Progression . . . . .	222
	Guidelines for Developing the Best Exercise Regimen . . . . .	238
	A Final Note . . . . .	245

**Chapter 9 Evaluating the Patient . . . . . 247**

Most Crucial Element in Evaluation . . . . . 247

First Clinician–Patient Meeting . . . . . 250

Assessing Posture and Movement Quality . . . . . 254

Some Provocation Tests . . . . . 260

Some Functional Screens . . . . . 276

Testing Muscle Endurance . . . . . 286

A Final Note . . . . . 290

**Chapter 10 Developing the Exercise Program . . . . . 291**

Philosophy of Low Back Exercise Design . . . . . 291

Clinical Wisdom . . . . . 292

Thoughts on Mobility . . . . . 292

Identifying Safe and Effective Exercises . . . . . 296

Beginner’s Program for Pain Control and Stabilization . . . . . 300

Exercises That May Be Used in a Stabilization Program . . . . . 301

Special Conditions . . . . . 308

A Final Note . . . . . 311

**Chapter 11 Advanced Exercises . . . . . 313**

Safely Increasing Challenges . . . . . 314

Occupational and Athletic Work Hardening . . . . . 320

A Final Note . . . . . 325

Epilogue 327 • Handouts for Patients or Clients 328 • Appendix 349  
 Glossary 355 • References and Additional Readings 357  
 Index 395 • About the Author 404
