

TABLE OF CONTENTS

Plenary lectures	9
<i>O. Chapman</i> : Engaging children in learner-focused mathematical tasks	9
<i>R. Griffiths</i> : Working with children in public care who have difficulties in mathematics	21
<i>G. Krauthausen</i> : Digital tools in elementary mathematics education	33
<i>J. Mulligan</i> : Inspiring young children's mathematical thinking through pattern and structure	45
<i>J. Young-Loveridge & B. Bicknell</i> : Using multiplication and division tasks to support young children's part-whole thinking in mathematics	55
Research reports	67
<i>S.D. Anastasiadou, T. Chadjipadelis & I. Kofou</i> : The role of projects in helping Greek university students from Pre-school Education department to understand probability distributions	67
<i>J. Břehovský, P. Eisenmann, J. Ondrušová, J. Příbyl & J. Novotná</i> : Heuristic strategies in problem solving of 11-12-year-old pupils	75
<i>M.-P. Chopin & Ch. Roiné</i> : The anthropological and didactical constraints of the selection of pupils' tasks in elementary teaching of mathematics – An introduction to the concepts of didactic “blindness” and “visibility”.....	83
<i>S. Ferguson, D. Clarke & A. McDonough</i> : Tasks within tasks: The experiences of a low-attaining mathematics student	91
<i>J. Gunčaga, J. Kopáčová & A. Duatepe Paksu</i> : A Comparative study: Turkish and Slovak preservice primary mathematics teachers' skills about symmetry	99
<i>I. Helmane</i> : Effectiveness of hundreds chart in the acquisition of addition and subtraction skills in primary school	107
<i>M. Helmerich</i> : Bundling individual learning paths – Aiming at mathematical products in Open Learning Processes	115
<i>K. Highfield</i> : Playing with simple robotics: a tool for mathematics learning in the early years	122
<i>A. Hošpesová & S. Semerádová</i> : Didactical situations in the preschool period	130
<i>D. Jirotková & J. Kloboučková</i> : Critical areas in mathematics of primary school ...	138
<i>D. Jirotková & J. Slezáková</i> : Didactic environment Bus as a tool for development of early mathematical thinking	147
<i>D. Jirotková & R. Zemanová</i> : Student-teachers' empathy for pupils' thinking processes when solving problems	155
<i>R. Klose & C. Scheriber</i> : Primapodcast – A tool for vocal representation	162
<i>G. Krauthausen & P. Scherer</i> : Manifoldness of tasks within a substantial learning environment: Designing arithmetical activities for all	171
<i>K. Larsson</i> : Multiplicative thinking in relation to commutativity and forms of representation	179
<i>E. Levenson, R. Barkai & K. Larsson</i> : Functions of explanations: Israeli and Swedish elementary school curriculum documents	188
<i>T. Marcinek</i> : Using and assessing interpretation tasks in mathematics content courses for pre-service elementary teachers	196

<i>S. Maričić, K. Špijunović & N. Malinović Jovanović</i> : The role of tasks in the development of students' critical thinking in initial teaching of mathematics	204
<i>H. Moraová</i> : Mum, what's for lunch?: Analysis of images of women and men in a contemporary Czech mathematics textbook for 11-year-old pupils.....	212
<i>J. Novotná, A. Jančařík & K. Jančaříková</i> : Primary school teachers' attitudes to theatre activities in mathematics education	220
<i>G. Pavlovičová & E. Barčíková</i> : Investigation of geometrical thinking of pupils at the age of 11 to 12 through solving tasks	228
<i>S. Peclínovská</i> : Zero is an even-odd number	236
<i>M. Priolet</i> : "Reference boxes": Teaching and learning with reference tools in elementary mathematics	242
<i>I. Procházková</i> : Using the notice board to differentiate pupils in problem-solving activities: Designing and validating a practice through action research	249
<i>D.K. Pugalee & A. Seifert</i> : Including writing to extend cognitive level for mathematical tasks	257
<i>M. Pytlak</i> : Playing with three-dimensional geometry in the 3rd class of primary school	264
<i>C.M. Ribeiro, M. Mellone & A. Jakobsen</i> : Giving sense to students' productions: A particular task in teacher education	273
<i>M. Saboya & B. Dufour-Janvier</i> : The complexity of training teachers in the practical aspects of education: The importance of "exposés oraux".....	281
<i>A. Savard & E. Polotskaia</i> : Word problem solving task management and students' access to mathematics: Cases in elementary education	290
<i>J.A. Shahbari & W. Daher</i> : Model eliciting activities for promoting fractions' utilizing	298
<i>M. Stephan & G. McMamus</i> : Pre-interviewing as formative assessment	306
<i>E. Swoboda</i> : How to introduce young children to the repeating geometric patterns ..	314
<i>A. Ulovec, H. Moraová, F. Favilli, B. Grevholm, J. Novotná & M. Piccione</i> : Multiculturalism in theory and teachers' practice	322
<i>C. Wang, V. Cifarelli, M. Stephan, C. Martin, D.K. Pugalee & R. Lambert</i> : Assessment practices to support mathematics learning and understanding for students	331
Workshops	339
<i>N. Bisailon & L. Poirier</i> : From numbers to numeration, a new perspective	339
<i>R. Cabassut & I. Ferrando Palomares</i> : Modelling tasks in elementary mathematics	341
<i>B. Doig</i> : Learning geometry through paper-based experiences	343
<i>A. Jančařík, K. Jančaříková, J. Novotná & J. Machalíková</i> : Teaching and learning mathematics through math theatre activities	344
<i>E. Levenson & R. Barkai</i> : Mathematical creativity in elementary school	346
<i>M. Nührenbörger, E. Söbbeke, U. Häsel-Weide, D. Tubach & E. Wissing</i> : Discovering and reasoning mathematical relations in manipulatives and tasks ...	348
<i>I. Peled & S. Hershkovitz</i> : Modelling and curriculum in elementary school mathematics	350
<i>V. Petrášková & A. Hošpesová</i> : Beginning with financial literacy on the primary school level?	351

Posters	355
<i>A. Gomes, F. Martins, H. Pinto, I. Sebastião & C.M. Ribeiro: Improving teachers' mathematical and (Portuguese) language knowledge for teaching using tasks: portrayal of a project</i>	<i>355</i>
<i>R. Havlíčková: "Exhibition grounds": From the trial-and-error method towards problem solving strategy</i>	<i>356</i>
<i>M. Kaslová: Didactic mathematical games in different roles</i>	<i>357</i>
<i>M. Kořenová: Chess teaching program Figurka school</i>	<i>358</i>
<i>M. Králová: Misunderstanding: teacher – class</i>	<i>359</i>
<i>R. Krpec: Two different metacognitive approaches to solving of one problem</i>	<i>360</i>
<i>H. Moraová: Use and impact of word problems with non-stereotypical gender setting and roles</i>	<i>361</i>
<i>E. Partová: The role of abaci in understanding different constructions of basic addition facts</i>	<i>362</i>
<i>I. Procházková: Constructivist teaching – adopting different problem-solving strategies: the case of one diagnostic problem</i>	<i>363</i>
<i>A. Rakoušková: Attitudes toward a problem solving of pupils in Czech primary school</i>	<i>364</i>
<i>A.I. Silvestre & N. Ferreira: The use of classroom videos in pre-service teacher training: the notions of perimeter and area</i>	<i>365</i>
<i>A.I. Silvestre & J.P. da Ponte: Proportional reasoning: Grade 6 pupil's learning trajectories</i>	<i>366</i>
<i>A. Šteflíčková: Assessment and evaluation in CLIL</i>	<i>367</i>
<i>M. Tichá & A. Hošpesová: Posing problems with a given structure by pre-service teachers</i>	<i>368</i>
