<i>Foreword: Landscapes in Peril</i>	xi
1 Introduction <i>David B. Lindenmayer and Richard J. Hobbs</i>	1
Section 1: Classification of Landscapes and Terminology	7
2 The Whole Elephant: Classification and Terminology as Tools for Achieving Generality in Landscape Ecology <i>S. McIntyre</i>	9
3 Enacting Landscape Design: from Specific Cases to General Principles <i>Yrjö Haila</i>	22
4 Landscape Models for Use in Studies of Landscape Change and Habitat Fragmentation <i>David B. Lindenmayer and J. Fischer</i>	35
5 Synthesis: Landscape Classification <i>David. B. Lindenmayer and Richard J. Hobbs</i>	49
Section 2: Habitat, Habitat Loss and Patch Sizes	53
6 Remnant Geometry, Landscape Morphology, and Principles and Procedures for Landscape Design <i>Ralph Mac Nally</i>	55
7 Estimating Minimum Habitat for Population Persistence <i>Lenore Fahrig</i>	64
8 Habitat and Landscape Design: Concepts, Constraints and Opportunities <i>James R. Miller</i>	81
9 Synthesis: Habitat, Habitat Loss and Patch Sizes <i>David. B. Lindenmayer and Richard J. Hobbs</i>	96

Section 3: Structure, Degradation and Condition	99
10 Nature's Infinite Variety: Conservation Choice and Management for Dynamic Ecological Systems <i>J.C.Z. Woinarski</i>	101
11 The Diverse Impacts of Grazing, Fire and Weeds: How Ecological Theory Can Inform Conservation Management <i>Don A. Driscoll</i>	111
12 Forest Landscape Structure, Degradation and Condition: Some Commentary and Fundamental Principles <i>Jerry F. Franklin and Mark E. Swanson</i>	131
13 Synthesis: Structure, Degradation and Condition <i>David. B. Lindenmayer and Richard J. Hobbs</i>	146
Section 4: Edge Effects	149
14 Incorporating Edge Effects into Landscape Design and Management <i>Thomas D. Sisk</i>	151
15 Edge Effects <i>David B. Lindenmayer and J. Fischer</i>	165
16 Edges: Where Landscape Elements Meet <i>Gary W. Luck</i>	179
17 Synthesis: Edge Effects <i>David. B. Lindenmayer and Richard J. Hobbs</i>	195
Section 5: Total Vegetation Cover, Pattern, Patch Content	199
18 Emergent Properties of Land Mosaics: Implications for Land Management and Biodiversity Conservation <i>Andrew F. Bennett and James Q. Radford</i>	201
19 Assessing the Biodiversity Value of Stands and Patches in a Landscape Context <i>Philip Gibbons, S.V. Briggs, Andre Zerger, Danielle Ayers, Julian Seddon and Stuart Doyle</i>	215
20 Avoiding Irreversible Change: Considerations for Vegetation Cover, Vegetation Structure and Species Composition <i>Joern Fischer and David B. Lindenmayer</i>	229

- 21 Synthesis: Total Vegetation Cover, Pattern and Patch Content 245
David. B. Lindenmayer and Richard J. Hobbs
- Section 6: Connectivity, Corridors, Stepping Stones 249**
- 22 Corridors, Connectivity and Biological Conservation 251
F.K.A. Schmiegelow
- 23 Focal Species for Determining Connectivity Requirements
in Conservation Planning 263
Reed F. Noss
- 24 Connectivity, Corridors and Stepping Stones 280
Denis A. Saunders
- 25 Synthesis: Corridors, Connectivity and Stepping Stones 290
David. B. Lindenmayer and Richard J. Hobbs
- Section 7: Individual Species Management – Threatened Taxa and
Invasive Species 293**
- 26 Individual Species Management:
Threatened Taxa and Invasive Species 295
Daniel Simberloff
- 27 Managing Landscapes for Vulnerable, Invasive and
Disease Species 311
Erika Zavaleta and Jae Ryan Pasari
- 28 Tools for Conserving Managing Individual Plant Species
in Dynamic Landscapes 330
Mark Burgman, Jane Elith, Emma Gorrod and Bonnie Wintle
- 29 Synthesis: Individual Species Management –
Threatened Taxa and Invasive Species 343
David. B. Lindenmayer and Richard J. Hobbs
- Section 8: Ecosystems and Ecosystem Processes 347**
- 30 Ecosystems, Ecosystem Processes and Global Change:
Implications for Landscape Design 349
Adrian D. Manning
- 31 The Costs of Losing and of Restoring Ecosystem Services 365
H.A. Mooney

- 32 Managing Disturbance Across Scales: An Essential Consideration for Landscape Management and Design 376
Viki A. Cramer
- 33 Synthesis: Ecosystems and Ecosystem Processes 390
David. B. Lindenmayer and Richard J. Hobbs
- Section 9: Disturbance, Resilience and Recovery 393**
- 34 Disturbance, Resilience and Recovery: A Resilience Perspective on Landscape Dynamics 395
Brian Walker
- 35 Core Principles for Using Natural Disturbance Regimes to Inform Landscape Management 408
Malcolm L. Hunter Jr.
- 36 Synthesis: Disturbance, Resilience and Recovery 423
David. B. Lindenmayer and Richard J. Hobbs
- Section 10: Aquatic Ecosystems and Integrity 427**
- 37 Principles for Conserving Wetlands in Managed Landscapes 429
Aram J.K. Calhoun
- 38 Flowing Waters in the Landscape 445
P.S. Lake
- 39 Water in the Landscape: The Coupling of Aquatic Ecosystems and their Catchments 458
Peter Cullen
- 40 Synthesis: Aquatic Ecosystems and Integrity 473
David. B. Lindenmayer and Richard J. Hobbs
- Section 11: Bringing It All Together 477**
- 41 Does Conservation Need Landscape Ecology? A Perspective from Both Sides of the Divide 479
John A. Wiens
- 42 What Are We Conserving? Establishing Multiscale Conservation Goals and Objectives in the Face of Global Threats 494
J. Michael Scott and Timothy H. Tear

- 43 Goals, Targets and Priorities for Landscape-Scale Restoration 511
Richard J. Hobbs
- 44 A Contribution to the Development of a Conceptual Framework for Landscape Management: A Landscape State and Transition Model 527
Peter Cale
- 45 Principles of Landscape Design that Emerge from a Formal Problem-Solving Approach 546
Hugh P. Possingham and Emily Nicholson
- 46 From Perspectives to Principles: Where to From Here? 561
Richard J. Hobbs and David. B. Lindenmayer
- Index* 569
