Preface.....	xix
Acknowledgments.....	xxi
CHAPTER 1 Introduction	1
What is Electronic Trading?	2
What is Algorithmic Trading?	3
Trading Algorithm Classifications	3
Trading Algorithm Styles	4
Investment Cycle	5
Investment Objective	5
Information Content.....	6
Investment Styles	7
Investment Strategies	9
Research Data	15
Broker Trading Desks.....	16
Research Function.....	17
Sales Function.....	18
Implementation Types.....	19
Algorithmic Decision-Making Process	20
CHAPTER 2 Algorithmic Trading	23
Advantages.....	25
Disadvantages	26
Growth in Algorithmic Trading	27
Market Participants	28
Classifications of Algorithms.....	31
Types of Algorithms	31
Algorithmic Trading Trends	35
Day of Week Effect	37
Intraday Trading Profiles	39
Trading Venue Classification.....	42
Displayed Market.....	42
Dark Pool	42
Dark Pool Controversies	43
Types of Orders	44
Revenue Pricing Models.....	45
Order Priority	46
Execution Options.....	46

Algorithmic Trading Decisions.....	47
Macro Level Strategies	47
Micro Level Decisions	48
Limit Order Models	48
Smart Order Routers	48
Algorithmic Analysis Tools.....	49
Pre-Trade Analysis.....	49
Intraday Analysis	49
Post-Trade Analysis	49
High Frequency Trading.....	50
Auto Market Making.....	50
Quantitative Trading/Statistical Arbitrage.....	52
Rebate/Liquidity Trading	52
Direct Market Access.....	54
CHAPTER 3 Transaction Costs	57
What are Transaction Costs?	57
What is Best Execution?.....	58
What is the Goal of Implementation?.....	58
Unbundled Transaction Cost Components	59
Commission.....	59
Fees	59
Taxes	59
Rebates	60
Spreads	60
Delay Cost.....	60
Price Appreciation.....	61
Market Impact	61
Timing Risk.....	62
Opportunity Cost.....	62
Transaction Cost Classification.....	62
Transaction Cost Categorization.....	65
Transaction Cost Analysis	65
Measuring/Forecasting	66
Cost vs. Profit and Loss	67
Implementation Shortfall	67
Complete Execution	69
Opportunity Cost (Andre Perold).....	70
Expanded Implementation Shortfall (Wayne Wagner).....	71

Implementation Shortfall Formulation.....	74
Trading Cost/Arrival Cost.....	74
Evaluating Performance.....	75
Trading Price Performance.....	75
Benchmark Price Performance.....	75
VWAP Benchmark.....	76
Participation-Weighted Price Benchmark.....	77
Relative Performance Measure.....	78
Pretrade Benchmark.....	80
Index-Adjusted Performance Metric.....	80
Z-Score Evaluation Metric.....	81
Market Cost-Adjusted Z-Score.....	83
Adaptation Tactic.....	83
Comparing Algorithms.....	84
Nonparametric Tests.....	85
Paired Samples.....	86
Sign Test.....	86
Wilcoxon Signed Rank Test.....	87
Independent Samples.....	89
Mann–Whitney U Test.....	89
Median Test.....	91
Distribution Analysis.....	92
Chi-Square Goodness of Fit.....	93
Kolmogorov–Smirnov Goodness of Fit.....	94
Experimental Design.....	95
Proper Statistical Tests.....	95
Small Sample Size.....	95
Data Ties.....	96
Proper Categorization.....	96
Balanced Data Sets.....	96
Final Note on Posttrade Analysis.....	97
CHAPTER 4 Market Impact Models.....	99
Introduction.....	99
Definition.....	99
Example 1: Temporary Market Impact.....	100
Example 2: Permanent Market Impact.....	100
Graphical Illustrations of Market Impact.....	101
Illustration #1: Price Trajectory.....	101
Illustration #2: Supply–Demand Equilibrium.....	102

Illustration #3: Temporary Impact Decay Function.....	105
Example #3: Temporary Decay Formulation	108
Illustration #4: Various Market Impact Price Trajectories	108
Developing a Market Impact Model.....	109
Essential Properties of a Market Impact Model	110
The Shape of the Market Impact Function	112
Example: Convex Shape	114
Example: Linear Shape	114
Example: Concave Shape.....	114
Derivation of Models	115
Almgren and Chriss Market Impact Model	115
I-Star Market Impact Model	120
Model Formulation	120
I-Star: Instantaneous Impact Equation	121
The Market Impact Equation	122
Derivation of the Model.....	122
Cost Allocation Method.....	123
I* Formulation.....	126
Comparison of Approaches.....	128
CHAPTER 5 Probability and Statistics	129
Introduction	129
Random Variables.....	129
Probability Distributions	130
Example: Discrete Probability Distribution Function.....	131
Example: Continuous Probability Distribution Function.....	132
Descriptive Statistics	135
Probability Distribution Functions.....	136
Continuous Distribution Functions	137
Normal Distribution	137
Standard Normal Distribution	138
Student's <i>t</i> -Distribution	139
Log-Normal Distribution.....	141
Uniform Distribution.....	142
Exponential Distribution	143
Chi-Square Distribution	145
Logistic Distribution	146
Triangular Distribution.....	148
Discrete Distributions.....	149
Binomial Distribution.....	149
Poisson Distribution	150
End Notes.....	150

CHAPTER 6 Linear Regression Models	151
Introduction	151
Linear Regression Requirements	154
Regression Metrics	154
Linear Regression	156
True Linear Regression Model	156
Simple Linear Regression Model.....	156
Solving the Simple Linear Regression Model	157
Standard Error of the Regression Model	159
R^2 Goodness of Fit.....	159
<i>T</i> -test: Hypothesis Test.....	159
<i>F</i> -test: Hypothesis Test	159
Example: Simple Linear Regression.....	159
Multiple Linear Regression Model	161
Solving the Multiple Linear Regression Model.....	162
Standard Error of the Regression Model	164
R^2 Goodness of Fit.....	164
<i>T</i> -test: Hypothesis Test.....	164
<i>F</i> -test: Hypothesis Test	165
Example: Multiple Linear Regression	165
Matrix Techniques	167
Estimate Parameters	167
Compute Standard Errors of <i>b</i>	168
R^2 Statistic	169
<i>F</i> -Statistic	169
Log Regression Model.....	169
Example: Log-Transformation	169
Example: Log-Linear Transformation.....	171
Polynomial Regression Model.....	171
Fractional Regression Model	172
CHAPTER 7 Probability Models	175
Introduction	175
Developing a Probability Model.....	175
Comparison of Linear Regression Model to Probability Model	177
Power Function Model.....	177
Logit Model.....	178
Probit Model	179
Outcome Data.....	180
Grouping Data.....	182

	Solving Binary Output Models	182
	Step 1: Specify Probability Function	182
	Step 2: Set Up a Likelihood Function Based on Actual Outcome Results for all Observations. For Example, If We Have n Observations, the Loss Function is Specified as Follows.....	183
	Solving Probability Output Models	184
	Examples	186
	Example 7.1 Power Function.....	186
	Example 7.2 Logit Model	190
	Comparison of Power Function to Logit Model	191
	Example 7.3 Logistic Regression	191
	Conclusions.....	195
CHAPTER 8	Nonlinear Regression Models.....	197
	Introduction.....	197
	Regression Models.....	198
	Linear Regression Model	198
	Polynomial Regression Model	198
	Fractional Regression Model	199
	Log-linear Regression Model.....	200
	Logistic Regression Model	200
	Nonlinear Model	201
	Nonlinear Formulation.....	201
	Solving Nonlinear Regression Model.....	202
	Estimating Parameters.....	202
	Maximum Likelihood Estimation (MLE)	202
	Nonlinear Least Squares (Non-OLS).....	204
	Step I: Define the Model.....	204
	Step II: Define the Error Term.....	204
	Step III: Define a Loss Function—Sum of Square Errors.....	205
	Step IV: Minimize the Sum of Square Error	205
	Hypothesis Testing.....	205
	Evaluate Model Performance.....	206
	Sampling Techniques.....	207
	Random Sampling.....	208
	Sampling With Replacement	209
	Sampling Without Replacement	210
	Monte Carlo Simulation.....	210
	Bootstrapping Techniques.....	211
	Jackknife Sampling Techniques	212
	Important Notes on Sampling in Nonlinear Regression Models.....	218

CHAPTER 9 Machine Learning Techniques	221
Introduction	221
Types of Machine Learning.....	224
Examples	225
Cluster Analysis	225
Classification	228
Regression	229
Neural Networks	231
CHAPTER 10 Estimating I-Star Market Impact Model Parameters	233
Introduction	233
I-Star Market Impact Model	234
Scientific Method	235
Step 1: Ask a Question	235
Step 2: Research the Problem	235
Step 3: Construct a Hypothesis.....	235
Step 4: Test the Hypothesis	236
Step 6: Conclusions Communicate	236
Underlying Data Set.....	245
Data Definitions	248
Imbalance/Order Size	249
Average daily volume	249
Actual market volume.....	249
Stock volatility	249
POV Rate	249
Arrival Cost.....	250
Model Verification	250
Model Verification #1: Graphical Illustration.....	251
Model Verification #2: Regression Analysis	251
Model Verification #3: z-Score Analysis.....	251
Model Verification #4: Error Analysis	252
Stock Universe	252
Analysis Period	252
Time Period.....	252
Number of Data Points	252
Imbalance	252
Side.....	253
Volume	253
Turnover	253
VWAP.....	253

First Price	254
Average Daily Volume	254
Annualized Volatility	254
Size	254
POV Rate	255
Cost	255
Estimating Model Parameters	255
Sensitivity Analysis.....	257
Cost Curves	262
Statistical Analysis	262
Stock-Specific Error Analysis	265
CHAPTER 11 Risk, Volatility, and Factor Models	269
Introduction	269
Volatility Measures	270
Log>Returns.....	270
Average Return	270
Variance	270
Volatility.....	271
Covariance.....	271
Correlation.....	271
Dispersion.....	271
Value-at-Risk.....	272
Implied Volatility	272
Beta	273
Range.....	273
Forecasting Stock Volatility	274
Volatility Models	274
Determining Parameters via Maximum Likelihood Estimation	277
Historical Data and Covariance	280
False Relationships.....	281
Degrees of Freedom	283
Factor Models	288
Matrix Notation	289
Factor Model in Matrix Notation.....	290
Types of Factor Models.....	292
Index Model	292
Macroeconomic Factor Models.....	293
Statistical Factor Models.....	295

CHAPTER 12 Volume Forecasting Techniques	301
Introduction	301
Market Impact Model	301
Average Daily Volume	303
Methodology	303
Definitions	303
Monthly Volume Forecasting Model.....	304
Analysis.....	304
Regression Results	306
Observations Over the 19-Year Period: 2000–18	306
Observations Over the Most Recent 3-Year Period: 2016–18.....	308
Volumes and Stock Price Correlation.....	309
Forecasting Daily Volumes.....	309
Our Daily Volume Forecasting Analysis is as Follows.....	310
Variable Notation	311
ARMA Daily Forecasting Model.....	311
Analysis Goal.....	311
Step 1. Determine Which is More Appropriate: ADV or MDV and the Historical Look-Back Number of Days	312
Conclusion #1	312
Step 2. Estimate the <i>DayOfWeek(t)</i> Parameter	314
Conclusion #2	314
Step 3. Estimate the Autoregressive Parameter $\hat{\beta}$	315
Forecast Improvements	316
Daily Volume Forecasting Model.....	316
Conclusion #3	316
Forecasting Intraday Volumes Profiles	317
Forecasting Intraday Volume Profiles.....	320
Predicting Remaining Daily Volume.....	321
CHAPTER 13 Algorithmic Decision-Making Framework	323
Introduction	323
Equations.....	324
Variables.....	324
Important Equations	325
Algorithmic Decision-Making Framework.....	325
Select Benchmark Price	326
Comparison of Benchmark Prices	329
Specify Trading Goal	330
Specify Adaptation Tactic.....	337

Projected Cost	338
Comparison Across Adaptation Tactics	345
Modified Adaptation Tactics.....	346
How Often Should we Reoptimization Our Tactic?.....	347
CHAPTER 14 Portfolio Algorithms and Trade Schedule Optimization	349
Introduction	349
Trader's Dilemma	351
Variables.....	351
Transaction Cost Equations	352
Market Impact	353
Price Appreciation.....	353
Timing Risk.....	354
One-Sided Optimization Problem	354
Optimization Formulation.....	354
Constraint Description.....	355
Portfolio Optimization Techniques.....	358
Quadratic Programming Approach	358
Trade Schedule Exponential	360
Residual Schedule Exponential.....	361
Trading Rate Parameter.....	362
Comparison of Optimization Techniques	364
Portfolio Adaptation Tactics	368
Description of AIM and PIM for Portfolio Trading.....	370
How Often Should we Reoptimize?	371
Appendix	372
CHAPTER 15 Advanced Algorithmic Modeling Techniques	375
Introduction	375
Trading Cost Equations	375
Model Inputs	376
Trading Strategy.....	376
Percentage of Volume	377
Trading Rate.....	377
Trade Schedule.....	378
Comparison of <i>POV</i> Rate to Trade Rate	378
Trading Time	378
Trading Risk Components	379
Trading Cost Models—Reformulated.....	380
Market Impact Expression	380
Timing Risk Equation	382

Derivation of the 1/3 Factor..... 384
 Timing Risk For a Basket of Stock 387
 Comparison of Market Impact Estimates..... 388
 Forecasting Covariance 390
 Efficient Trading Frontier 391
 Single Stock Trade Cost Objective Function..... 393
 Portfolio Trade Cost Objective Function..... 394
 Managing Portfolio Risk..... 395
 Residual Risk Curve 395
 Minimum Trading Risk Quantity..... 397
 Maximum Trading Opportunity 398
 When to Use These Criteria? 400
 Program-Block Decomposition..... 400

CHAPTER 16 Decoding and Reverse Engineering Broker Models with Machine

Learning Techniques 405
 Introduction 405
 Pre-Trade of Pre-Trades..... 406
 I-Star Model Approach 407
 Neural Network Model Approach 413
 Portfolio Optimization 416
 What Should the Portfolio Manager Do? 419
 Deriving Portfolio Optimization Market Impact Models 419
 Example: Share Quantity Regression Model..... 420
 Example: Trade Value Regression Model 425

CHAPTER 17 Portfolio Construction with Transaction Cost Analysis 429

Introduction 429
 Portfolio Optimization and Constraints 430
 Transaction Costs in Portfolio Optimization 434
 Portfolio Management Process 437
 Example: Efficient Trading Frontier With and Without Short
 Positions 437
 Example: Maximizing Investor Utility 438
 Trading Decision Process 439
 What is the Appropriate Optimal Strategy to Use? 440
 Unifying the Investment and Trading Theories..... 441
 Which Execution Strategy Should the Trader Use? 443
 Cost-Adjusted Frontier..... 445
 Determining the Appropriate Level of Risk Aversion 447
 Best Execution Frontier 448

Portfolio Construction with Transaction Costs.....	449
Quest for Best Execution Frontier	451
Example	456
Important Findings	464
Conclusion	466
CHAPTER 18 Quantitative Analysis with TCA	469
Introduction	469
Quantitative Overlays.....	469
Market Impact Factor Scores	469
Cost Curves	469
Alpha Capture	470
Investment Capacity	470
Portfolio Optimization.....	470
Backtesting	470
Liquidation Cost.....	471
Sensitivity Analysis.....	471
Are The Existing Models Useful Enough For Portfolio Construction?.....	472
Current State of Vendor Market Impact Models	473
Pretrade of Pretrades	475
Applications	476
Example #1	476
Example #2	477
Example #3	477
Example #4	477
How Expensive is it to Trade?	478
Acquisition and Liquidation Costs.....	481
Portfolio Management—Screening Techniques	484
Backtesting Strategies	487
Market Impact Simulation	490
Simulation Scenario	491
Multi-Asset Class Investing.....	495
Investing in Beta Exposure and Other Factors	495
Example #5	495
Multi-Asset Trading Costs.....	498
Global Equity Markets	500
Multi-Asset Classes.....	501
Market Impact Factor Scores	508
Current State of Market Impact Factor Scores	510

Market Impact Factor Score Analysis	510
Alpha Capture Program	512
Example #6	513
Example #7	514
Alpha Capture Curves	516
CHAPTER 19 Machine Learning and Trade Schedule Optimization.....	519
Introduction	519
Multiperiod Trade Schedule Optimization Problem.....	520
Setting up the Problem.....	520
Trader's Dilemma Objective Function.....	521
Nonlinear Optimization Convergence	523
Newton's Method.....	525
Example #1	526
Example #2	527
Machine Learning	528
Neural Networks	530
Neural Network Errors	531
Machine Learning Training Experiment.....	531
Step I: Generating Simulated Trade Baskets	532
Step II: Compile Stock and Basket Data Statistics.....	532
Step III: Solve the Multiperiod Trade Schedule Optimization Problem	534
Step IV: Train the NNET.....	535
Step V. Calculate the Initial Parameter Values for the NNET.....	536
Principal Component Analysis.....	536
Stepwise Regression Analysis.....	536
Neural Network Structure	539
Neural Network Error	539
Performance Results	540
Conclusions.....	542
CHAPTER 20 TCA Analysis Using MATLAB, Excel, and Python	543
Introduction	543
Transaction Cost Analysis Functions	545
Transaction Cost Model.....	547
MATLAB Functions.....	549
Excel and Python Functions	549
TCA Report Examples.....	550
Conclusion	558

CHAPTER 21 Transaction Cost Analysis (TCA) Library 559
 Introduction 559
 TCA Library 560
 Transaction Cost Analysis Using the TCA Library 561
 List of TCA Functions 565

Bibliography 569

Index 577

Setting up the Problem 584
 Trader's Dilemma Objective Function 584
 Nonlinear Optimization Convergence 584
 Newton's Method 584
 Example #1 586
 Example #2 587
 Machine Learning 588
 Neural Networks 590
 Neural Network Error Function 591
 Machine Learning Training Experiment 591
 Step I: Generating Synthetic TraderBaskets 592
 Step II: Compute Stock and Basket Data Statistics 592
 Step III: Solve the Multiperiod Trade Schedule Optimization Problem 594
 Step IV: Train the NNET 595
 Step V: Calculate the Initial Parameter Values for the NNET 596
 Principal Component Analysis 596
 Stepwise Regression Analysis 596
 Neural Network Structures 599
 Neural Network Error Function 599
 Performance Results 599
 Conclusions 599

CHAPTER 20 TCA Analysis Using MATLAB, Excel, and Python 603
 Introduction 603
 Transaction Cost Analysis Functions 604
 Transaction Cost Model 604
 MATLAB Functions 605
 Excel and Python Functions 605
 TCA Report Examples 605
 Conclusion 605
