

CONTENTS

LIFE CYCLES AND PHENOLOGY

- Life cycles in polar arthropods – flexible or programmed? — H.V. DANKS 83
- Species at the edge of their range: The significance of the thermal environment for the distribution of congeneric *Craspedolepta* species (Sternorrhyncha: Psylloidea) living on *Chamerion angustifolium* (Onagraceae) — J.M. BIRD & I.D. HODKINSON 103
- Periods of dormancy and cohort-splitting in the millipede *Polydesmus angustus* (Diplopoda: Polydesmidae) — J.-F. DAVID, M.-L. CELERIER & J.-J. GEOFFROY 111
- Site latitude influences on the respiration rate, fat content and the ability of worker ants to rear larvae: A comparison of *Myrmica rubra* (Hymenoptera: Formicidae) populations over their European range — G.W. ELMES, J.C. WARDLAW, M.G. NIELSEN, V.E. KIPYATKOV, E.B. LOPATINA, A.G. RADCHENKO & B. BARR 117
- Clonal variability in sequences of morph production during the transition from parthenogenetic to sexual reproduction in the aphid *Rhopalosiphum padi* (Sternorrhyncha: Aphididae) — M. HULLÉ, D. MAURICE, C. RISPE & J.-C. SIMON 125
- Host-plant mediated influences on population development of *Sitobion avenae* (Sternorrhyncha: Aphididae) — A. HONĚK & Z. MARTINKOVÁ 135
- Comparison of development and growth of nettle-feeding larvae of Nymphalidae (Lepidoptera) under constant and alternating temperature regimes — S.R. BRYANT, J.S. BALE & C.D. THOMAS 143

IMPACTS AND RESPONSES TO CLIMATE CHANGE

- Impacts and responses at population level of herbivorous insects to elevated CO₂ — J.B. WHITTAKER 149

THERMAL BIOLOGY

- Insect cold tolerance: How many kinds of frozen? — B.J. SINCLAIR 157
- Chill injury at alternating temperatures in *Orchesella cincta* (Collembola: Entomobryidae) and *Pyrrhocoris apterus* (Heteroptera: Pyrrhocoridae) — Z. HANČ & O. NEDVĚD 165
- Temperature, development and establishment potential of *Thrips palmi* (Thysanoptera: Thripidae) in the United Kingdom — J.R. McDONALD, J.S. BALE & K.F.A. WALTERS 169
- Cold tolerance strategy of the freeze-intolerant chrysomelid, *Aulacophora nigripennis* (Coleoptera: Chrysomelidae), in warm-temperate regions — M. WATANABE & K. TANAKA 175
- Cold hardiness in diapause and non-diapause larvae of the summer fruit tortrix, *Adoxophyes orana* (Lepidoptera: Tortricidae) — P.G. MILONAS & M. SAVOPOULOU-SOULTANI 183
- The influence of thermal acclimation on the amylolytic activity and microanatomy of the alimentary tract of the oribatid mite *Galumna elimata* (Acari: Oribatei) — V. ŠUSTR & J. HUBERT 189

WATER RELATIONS AND RESPIRATION

- Desiccation stress and recovery in the anhydrobiotic nematode *Ditylenchus dipsaci* (Nematoda: Anguinidae) — D.A. WHARTON & O. AALDERS 199
- Intertidal respiration of *Anurida maritima* (Collembola: Neanuridae) — D. ZINKLER, R. RÜSSBECK, M. BIEFANG & H. BAUMGÄRTL 205
