

CONTENTS

REVIEWS

- Studying insect photoperiodism and rhythmicity: Components, approaches and lessons — H.V. DANKS 209
Role of water and moisture in diapause development (A review) — I. HODEK 223
Phenotypic plasticity and development of cold-season insects (Coleoptera: Leiodidae) and their response to climatic change — W. TOPP 233

ARTICLES

- Enhanced expression of genes in the brains of larvae of *Mamestra brassicae* (Lepidoptera: Noctuidae) exposed to short daylength or fed Dopa — M. URYU, Y. NINOMIYA, T. YOKOI, S. TSUZUKI & Y. HAYAKAWA 245
Sarcotoxin II from the flesh fly *Sarcophaga crassipalpis* (Diptera): A comparison of transcript expression in diapausing and nondiapausing pupae — J.P. RINEHART, S.J. DIAKOFF & D.L. DENLINGER 251
TIMELESS: A link between fly's circadian and photoperiodic clocks? — J. PAVELKA, K. SHIMADA & V. KOSTAL .. 255
Period gene expression in relation to seasonality and circadian rhythms in the linden bug, *Pyrrhocoris apterus* (Heteroptera) — M. HODKOVÁ, Z. SYROVÁ, D. DOLEŽEL & I. ŠAUMAN 267
Duration of development and number of nymphal instars are differentially regulated by photoperiod in the cricket *Modicogryllus siamensis* (Orthoptera: Gryllidae) — N. TANIGUCHI & K. TOMIOKA 275
Immunohistochemical localization of clock proteins (DBT and PER), and [His⁷]- and [Arg⁷]-corazonins in the cerebral ganglia of *Bombyx mori*: Are corazonins downstream regulators of circadian clocks? — S. QI-MIAO, S. TANAKA & M. TAKEDA 283
Photoperiodic clock of diapause termination in *Pseudopidorus fasciata* (Lepidoptera: Zygaenidae) — A. LI, F. XUE, A. HUA & J. TANG 287
Effect of temperature on development and reproduction in *Gastrophysa viridula* (Coleoptera: Chrysomelidae) — A. HONEK, V. JAROSIK & Z. MARTINKOVA 295

NOTE

- Photoperiodic receptor in the nymph of *Poecilocoris lewisi* (Heteroptera: Scutelleridae) — R. MIYAWAKI, S.I. TANAKA & H. NUMATA 301
