Contents

Preface VII

Part I Homology

1 Preview 3
1.1 Analyzing Images 3
1.2 Nonlinear Dynamics 13
1.3 Graphs 17
1.4 Topological and Algebraic Boundaries 19
1.5 Keeping Track of Directions 24
1.6 Mod 2 Homology of Graphs 26

2 Cubical Homology 39
2.1 Cubical Sets 39
2.1.1 Elementary Cubes 40
2.1.2 Cubical Sets 42
2.1.3 Elementary Cells 44
2.2 The Algebra of Cubical Sets 47
2.2.1 Cubical Chains 47
2.2.2 Cubical Chains in a Cubical Set 53
2.2.3 The Boundary Operator 54
2.2.4 Homology of Cubical Sets 60
2.3 Connected Components and $H_0(X)$ 66
2.4 Elementary Collapses 70
2.5 Acyclic Cubical Spaces 79
2.6 Homology of Abstract Chain Complexes 85
2.7 Reduced Homology 88
2.8 Bibliographical Remarks 91

3 Computing Homology Groups 93
3.1 Matrix Algebra over **Z** 94
3.2 Row Echelon Form 107
3.3 Smith Normal Form 117
3.4 Structure of Abelian Groups 125
3.5 Computing Homology Groups 132
3.6 Computing Homology of Cubical Sets 134
3.7 Preboundary of a Cycle—Algebraic Approach 139
3.8 Bibliographical Remarks 141

4 Chain Maps and Reduction Algorithms 143
4.1 Chain Maps 143
4.2 Chain Homotopy 149
4.3 Internal Elementary Reductions 155
4.3.1 Elementary Collapses Revisited 155
4.3.2 Generalization of Elementary Collapses 157
4.4 CCR Algorithm 165
4.5 Bibliographical Remarks 171

5 Preview of Maps 173
5.1 Rational Functions and Interval Arithmetic 174
5.2 Maps on an Interval 176
5.3 Constructing Chain Selectors 185
5.4 Maps of Γ^1 189

6 Homology of Maps 199
6.1 Representable Sets 199
6.2 Cubical Multivalued Maps 206
6.3 Chain Selectors 210
6.4 Homology of Continuous Maps 215
6.4.1 Cubical Representations 216
6.4.2 Rescaling 222
6.5 Homotopy Invariance 231
6.6 Bibliographical Remarks 234

7 Computing Homology of Maps 235
7.1 Producing Multivalued Representation 236
7.2 Chain Selector Algorithm 240
7.3 Computing Homology of Maps 242
7.4 Geometric Preboundary Algorithm (optional section) 244
7.5 Bibliographical Remarks 253

Part II Extensions

8 Prospects in Digital Image Processing 257
8.1 Images and Cubical Sets 257
8.2 Patterns from Cahn–Hilliard 259
8.3 Complicated Time-Dependent Patterns 266
8.4 Size Function 269
8.5 Bibliographical Remarks 277

9 Homological Algebra 279
9.1 Relative Homology 279
9.1.1 Relative Homology Groups 279
9.1.2 Maps in Relative Homology 286
9.2 Exact Sequences 289
9.3 The Connecting Homomorphism 292
9.4 Mayer–Vietoris Sequence 299
9.5 Weak Boundaries 303
9.6 Bibliographical Remarks 306

10 Nonlinear Dynamics 307
10.1 Maps and Symbolic Dynamics 308
10.2 Differential Equations and Flows 318
10.3 Ważewski Principle 320
10.4 Fixed-Point Theorems 324
10.4.1 Fixed Points in the Unit Ball 324
10.4.2 The Lefschetz Fixed-Point Theorem 326
10.5 Degree Theory 332
10.5.1 Degree on Spheres 333
10.5.2 Topological Degree 336
10.6 Complicated Dynamics 342
10.6.1 Index Pairs and Index Map 343
10.6.2 Topological Conjugacy 357
10.7 Computing Chaotic Dynamics 361
10.8 Bibliographical Remarks 375

11 Homology of Topological Polyhedra 377
11.1 Simplicial Homology 378
11.2 Comparison of Cubical and Simplicial Complexes 385
11.3 Homology Functor 388
11.3.1 Category of Cubical Sets 389
11.3.2 Connected Simple Systems 390
11.4 Bibliographical Remarks 393

Part III Tools from Topology and Algebra

12 Topology 397
12.1 Norms and Metrics in $\mathbf{R}^d$ 397
12.2 Topology 402
12.3 Continuous Maps 407
12.4 Connectedness 411
12.5 Limits and Compactness 415

13 Algebra 419
13.1 Abelian Groups 419
13.1.1 Algebraic Operations 419
13.1.2 Groups 420
13.1.3 Cyclic Groups and Torsion Subgroup 422
13.1.4 Quotient Groups 424
13.1.5 Direct Sums 426
13.2 Fields and Vector Spaces 427
13.2.1 Fields 427
13.2.2 Vector Spaces 429
13.2.3 Linear Combinations and Bases 430
13.3 Homomorphisms 433
13.3.1 Homomorphisms of Groups 433
13.3.2 Linear Maps 437
13.3.3 Matrix Algebra 438
13.4 Free Abelian Groups 441
13.4.1 Bases in Groups 441
13.4.2 Subgroups of Free Groups 446
13.4.3 Homomorphisms of Free Groups 447

14 Syntax of Algorithms 451
14.1 Overview 451
14.2 Data Structures 453
14.2.1 Elementary Data Types 453
14.2.2 Lists 454
14.2.3 Arrays 455
14.2.4 Vectors and Matrices 456
14.2.5 Sets 457
14.2.6 Hashes 458
14.3 Compound Statements 459
14.3.1 Conditional Statements 459
14.3.2 Loop Statements 459
14.3.3 Keywords **break** and **next** 460
14.4 Function and Operator Overloading 461
14.5 Analysis of Algorithms 462
