
Contents

<i>Preface</i>	v
<i>Contributors</i>	xi
PART I MICROELECTRODE TECHNIQUES	
1 Patch-Clamp Protocols to Study Cell Ionic Homeostasis Under Saline Conditions.....	3
<i>Ana María Velarde-Buendía, René Alberto Enríquez-Figueroa, and Igor Pottosin</i>	
2 Studying Plant Salt Tolerance with the Voltage Clamp Technique.....	19
<i>Zhong-Hua Chen, Dezhi Wu, Cornelia Eisenach, Adrian Hills, Guoping Zhang, and Michael R. Blatt</i>	
3 Using the Multifunctional Xylem Probe for in situ Studies of Plant Water and Ion Relations Under Saline Conditions.....	35
<i>Lars H. Wegner</i>	
4 Measuring Intracellular Ion Concentrations with Multi-Barrelled Microelectrodes.....	67
<i>Anthony J. Miller and Susan Smith</i>	
5 Single-Cell Sampling and Analysis (SiCSA).....	79
<i>Wieland Ericke</i>	
6 Non-invasive Flux Measurements Using Microsensors: Theory, Limitations, and Systems.....	101
<i>Ian Newman, Shao-Liang Chen, D. Marshall Porterfield, and Jian Sun</i>	
7 Quantifying Kinetics of Net Ion Fluxes from Plant Tissues by Non-invasive Microelectrode Measuring MIFE Technique.....	119
<i>Sergey Shabala, Tracey Ann Cuin, Lana Shabala, and Ian Newman</i>	
PART II IMAGING TECHNIQUES	
8 Quantitative Cryo-Analytical Scanning Electron Microscopy (CEDX): An Important Technique Useful for Cell-Specific Localization of Salt.....	137
<i>Margaret McCully and Martin Canny</i>	
9 Fluorescence Lifetime Imaging (FLIM) Measurements in Salinity Research.....	149
<i>Olga Babourina and Zed Rengel</i>	
10 Cytosolic Ca ²⁺ Determinations in Studying Plant Responses to Salinity and Oxidative Stress.....	163
<i>Anuphon Laohavisit, Renato Colaço, and Julia Davies</i>	
11 Infrared Thermography in Plant Phenotyping for Salinity Tolerance.....	173
<i>Richard A. James and Xavier R.R. Sirault</i>	

12	In vivo Imaging of Nitric Oxide and Reactive Oxygen Species Using Laser Scanning Confocal Microscopy	191
	<i>Yan-Jie Xie and Wen-Biao Shen</i>	
PART III BIOCHEMICAL ASSAYS		
13	Metabolomics for Salinity Research	203
	<i>Ute Roessner and Diane M. Beckles</i>	
14	Purification of Plant Plasma Membranes by Two-Phase Partitioning and Measurement of H ⁺ Pumping	217
	<i>Anette Lund and Anja Thoe Fuglsang</i>	
15	Determination of Reactive Oxygen Species in Salt-Stressed Plant Tissues	225
	<i>Andrés Alberto Rodríguez and Edith L. Taleisnik</i>	
16	Quantification of the Antioxidant Activity in Salt-Stressed Tissues	237
	<i>Jelena J. Dragišić Maksimović and Branka D. Živanović</i>	
17	Quantification of Abscisic Acid, Cytokinin, and Auxin Content in Salt-Stressed Plant Tissues	251
	<i>Petre I. Dobrev and Radomira Vankova</i>	
PART IV MOLECULAR TECHNIQUES		
18	Fluorescence-Activated Cell Sorting for Analysis of Cell Type-Specific Responses to Salinity Stress in <i>Arabidopsis</i> and Rice	265
	<i>Aurelie Evrard, Bastiaan O.R. Bargmann, Kenneth D. Birnbaum, Mark Tester, Ute Baumann, and Alexander A.T. Johnson</i>	
19	Transformation Using Controlled cDNA Overexpression System	277
	<i>Gábor Rigó, Csaba Papdi, and László Szabados</i>	
20	Transcriptome Analysis of Membrane Transporters in Response to Salinity Stress	291
	<i>Prasad Senadheera and Frans J.M. Maathuis</i>	
21	Marker-Assisted Selection in Plant Breeding for Salinity Tolerance	305
	<i>M. Ashraf, N.A. Akram, Mehboob-ur-Rahman, and M.R. Foolad</i>	
22	Transcriptomics on Small Samples	335
	<i>Stuart J. Roy, Simon J. Conn, Gwenda M. Mayo, Asmini Athman, and Matthew Gilliam</i>	
23	Plastid Transformation for Abiotic Stress Tolerance in Plants	351
	<i>K.C. Bansal, A.K. Singh, and S.H. Wani</i>	
24	Manipulating Expression of Tonoplast Transporters	359
	<i>Zhigang Li, Man Zhou, Qian Hu, Shane Reighard, Shuangrong Yuan, Ning Yuan, Bekir San, Dayong Li, Haiyan Jia, and Hong Luo</i>	
25	Using Heterologous Expression Systems to Characterize Potassium and Sodium Transport Activities	371
	<i>Alonso Rodríguez, Begoña Benito, and Olivier Cagnac</i>	

PART V OTHER METHODS

26 Isotope Techniques to Study Kinetics of Na ⁺ and K ⁺ Transport Under Salinity Conditions.....	389
<i>Dev T. Britto and Herbert J. Ronszucker</i>	
27 Trait Dissection of Salinity Tolerance with Plant Phenomics	399
<i>Bettina Berger, Bas de Regt, and Mark Tester</i>	
28 Measuring Soil Salinity.....	415
<i>Marcus Hardie and Richard Doyle</i>	
<i>Index</i>	427

Crawley, WA, Australia

K.C. BANERJEE • National Institute of Plant Genetic Resources, New Delhi, India

BARTMAN O.B. BRADSHAW • Center for Genome and Systems Biology, New York

University, New York, NY, USA

VITA RAUTMAN • Australian Centre for Plant Functional Genomics, University of Adelaide,

Geist Road, SA, Australia

DAVID M. BACILLON • Department of Plant Science, University of California, Davis,

CA, USA

RAMIRO BUSTO • Centre de Biotecnología y Genómica de Plantas, Universidad Politécnica

de Madrid, Madrid, Spain

BETTINA BERGER • The Ohio Accelerator, University of Adelaide, Urrbrae, SA, Australia

EMERICH D. BORNEMANN • Center for Genome and Systems Biology, New York University,

New York, NY, USA

MICHAEL A. BRAD • Laboratory of Plant Physiology and Biophysics, University of Glasgow,

Glasgow, UK

DEV T. BRITTO • Department of Biological Sciences, University of Toronto, Toronto,

ON, Canada

DAVID CAHILL • Depto de Biología, Biología Celular y Molecular de Ciencias Exactas,

Facultad Experimental del Zócalo, Zacatecas, Spain

MARTIN CAHILL • Research School of Biology, The Australian National University,

Canberra, ACT, Australia

WANG LIANG-KUO • College of Biological Sciences and Technology, Tsinghua University,

Beijing, China

DEBORAH HOE CHEN • School of Natural Sciences, University of Western Australia, Sydney,

WA, Australia

ROBERTO COLUCCI • Department of Plant Science, University of Cambridge, Cambridge, UK

SIMON J. COOPER • European Molecular Biology Laboratory, Grenoble, Grenoble, France

TOULON, France

TOULON, France

Montpellier, France

KEVIN CRUICKSHANK • Department of Plant Science, University of Cambridge, Cambridge, UK
