<b>M. Papajčik</b> and J. Podolský, Exact Spacetimes in Three-Dimensional Gravity, <b>f1</b> .....	9
<b>Ö. Tunç</b> , A. Araudo, and A. L. Müller, Non-thermal Processes in Protostellar Jets, <b>f1</b> .....	15
<b>A. Gálvez Ureña</b> , Maps for Ultra High Energy Cosmic Ray Anisotropies, <b>f1</b> .....	21
<b>B. Park</b> , A. Pitňa, J. Šafránková, Z. Němeček, and P. Basuvaraj, Multi-spacecraft Investigation of ICME-driven Interplanetary Shock Interaction on the Solar Wind Turbulence in the Inner Heliosphere, <b>f2</b> .....	28
<b>J. Mičko</b> , J. Souček, D. Píša, and O. Santolík, Solving Plasma Dispersion Relation for Type III Solar Radio Bursts, <b>f2</b> .....	35
<b>P. Basuvaraj</b> , F. Němec, L. Regoli, C. Fowler, Z. Němeček, and J. Šafránková, Electric and Magnetic Field Variations Associated with Martian Plasma Depletion Events, <b>f2</b> .....	43
<b>S. Ijaz</b> , J. Vaverka, J. Šafránková, and Z. Němeček, Investigating Short Electric Field Pulses using MAVEN/LPW 2015 Observations, <b>f2</b> .....	50
<b>N. Xirogiannopoulou</b> , O. Goncharov, J. Šafránková, and Z. Němeček, Dependence of Foreshock Structures on Solar Wind Conditions, <b>f2</b> .....	64
<b>M. Aghabozorgi Nafchi</b> , F. Němec, G. Pi, Z. Němeček, J. Šafránková, K. Grygorov, and J. Šimůnek, Modeling the Location and Shape of the Magnetopause Using Machine Learning Methods, <b>f2</b> .....	71
<b>A. Kolínská</b> , I. Kolmašová, O. Santolík, and C. Price, Lightning Activity over Central Europe Observed by the Optical Detector LIS Onboard ISS in Years 2017–2022, <b>f2</b> .....	78
<b>K. Drastichová</b> , F. Němec, J. Manninen, and M. Parrot, Simultaneous Observations of Whistler Mode Waves by the DEMETER Spacecraft and the Kannuslehto Station, <b>f2</b> .....	86
<b>R. Sgallová</b> , M. Volek, P. Srb, V. Veverka, and E. A. Curtis, Using Principal Component Analysis to Better Understand G-quadruplexes, <b>f4</b> .....	94
<b>C. Bartsch</b> , Recursion Relations for One-Loop Goldstone Boson Amplitudes, <b>f9</b> .....	102
<b>J. Říha</b> and M. Kolesár, Application of Bayesian Statistics to the Sector of Decay Constants in Three-flavour $\chi$ PT, <b>f9</b> .....	110
<b>M. Strzałka</b> , D. Kwiatkowski, Ł. Cywiński, and K. Roszak, Quantifying Qubit-environment Entanglement of NV Center Spin Qubits for Different Environment Size, <b>f3</b> ...	118
<b>H. H.-R. H. Randriatsara</b> and E. Holtanova, Magnitude of Internal Climate Variability Based on Pre-industrial CMIP6 Models over Central Europe, <b>f8</b> .....	125

<b>K. K. Yamoah, P. Štěpánek, and A. Farda, Data Processing of Air Temperature and Precipitation Series in Ghana, f8</b> .....	135
<b>L. Cehakova, Students in the Role of Teachers, f12</b> .....	142
<b>J. Doležalová, The Use of Stories in Science Education — A Search for Research Methods and Their Effectiveness, f12</b> .....	148
<b>K. Vagnerova and J. Houfková, Children's Inquiry Work as a Way of Supporting Cognitive Talent in Primary School Children, f12</b> .....	154
<b>A. Krejčí and M. Kekule, Qualitative Analysis of Students' Strategies in Answering Questions Accompanying Textbook Text, f12</b> .....	162
<b>T. Kopriva, Long-term Retention of Knowledge and Experiments in Physics Education — A Review of Literature, f12</b> .....	166
<b>J. Legerská, Teaching Quantum Physics on a High School Level, f12</b> .....	171
<b>V. Kumar, N. Lausti, and M. Hejduk, Mechanics of the Dual-frequency Paul Trap, f2</b> .....	178
<b>N. Lausti, A. Antony, A. Rendek, and M. Hejduk, Development of Electron-Ion Point Paul Trap, f2</b> .....	185
<b>N. Lausti, V. Kumar, and M. Hejduk, Electrical Properties of a Coaxial Electron-Ion Trap, f2</b> .....	191
<b>O. E. Hernández Alvarez, S. Rednyk, L. Uvarova, Š. Roučka, P. Dohnal, R. Plašil, and J. Glosík, Time-resolved Action Spectroscopy for Studies of State-changing Collisions Between <math>H_3^+</math> and <math>H_2</math> in an Ion Trap, f2</b> .....	197
<b>L. Uvarova, S. Rednyk, O. E. Hernández Alvarez, Š. Roučka, P. Dohnal, R. Plašil, and J. Glosík, Measurement of Kinetic Temperature of <math>H_3^+</math> Ions in 22-pole Ion Trap, f2</b> .....	203
<b>M. Kassayová, L. Uvarova, P. Dohnal, Š. Roučka, R. Plašil, and J. Glosík, Penning Ionization of <math>N_2</math> by Helium Metastable Atoms, f2</b> .....	209
<b>Z. Kuglerová, J. Chalupský, T. Burian, R. Dudžák, L. Juha, and P. Vagovič, Determination of Thermalized Fraction of Intense Short-wavelength Radiation Absorbed in Solids: from UV to X-ray Lasers, f2</b> .....	215
<b>Š. Jelínek, R. Dudžák, T. Burian, V. Hájková, L. Juha, J. Wild, and J. Chalupský, Using Ablative Imprints and Phase Recovery Algorithm to Characterise Focused Laser Beams, f2</b> .....	221
<b>S. Agarwal, S. Singh, M. Krupka, V. Istokskaia, T. Burian, R. Dudzak, J. Dostal, J. Krasa, and L. Juha, Development of Scintillator Stack Spectrometer for Laser-Plasma Experiments at PALS, f2</b> .....	229
<b>I. Naiko, P. Kudrna, Z. Hubička, M. Čada, A. Ostapenko, K. Jirátová, H. Kudrnová, J. Olejníček, and S. Cichoň, Nickel-Cobalt Oxide Catalysts Prepared by a Combination of Electrochemical Process and Plasma Jet Sputtering, f2</b> .....	235
<b>B. Stachová, J. Blaško, J. Országh, Š. Matejčík, S. Bromley, and D. Bodewits, Electron Induced Fluorescence of CO, f2</b> .....	239

<b>M. Omezzine Gnioua, A. Spesyvyi, and P. Španěl, Experimental and Theoretical Studies of Gas Phase Ion Mobility and Energetics: Protonated Saturated and Unsaturated Aldehydes in Helium, f2</b> .....	244
<b>M. Kuřka, L. Satrapinsky, D. Kováčik, and M. Stano, Grafting of Acrylic Acid on Microporous Polypropylene Membranes Using Plasma Activation in Argon or Oxygen for Application as Separators in Alkaline Water Electrolyzers, f2</b> .....	251
<b>M. Mařařová, M. Klas, P. Čermák, and Š. Matejčík, Characterization of Field Emission Current Generated in Microdischarges, f2</b> .....	258
<b>E. Mařař, Š. Matejčík, and M. Sabo, Application of Ion Mobility Spectrometry for Laser Desorption of Explosives, f2</b> .....	265
