CONTENTS

Foreword xi

Acknowledgments xiii

1 Introduction: Intuitive Topology 1

1.1 Introduction: Intuitive Topology 1

2 Background on Sets and Functions 9

2.1 Sets 9

2.2 Functions 16

2.3 Equivalence Relations 25

2.4 Induction 28

2.5 Cardinal Numbers 32

2.6 Groups 41

3 Topological Spaces 53

3.1 Introduction 53
3.2 Definitions and Examples 54
3.3 Basics on Open and Closed Sets 60
3.4 The Subspace Topology 65
3.5 Continuous Functions 67

4 More on Open and Closed Sets and Continuous Functions 73

4.1 Introduction 73
4.2 Basis for a Topology 73
4.3 Limit Points 79
4.4 Interior, Boundary and Closure 81
4.5 More on Continuity 84

5 New Spaces from Old 87

5.1 Introduction 87
5.2 Product Spaces 88
5.3 Infinite Product Spaces (Optional) 96
5.4 Quotient Spaces 101
5.5 Unions and Wedges 104

6 Connected Spaces 109

6.1 Introduction 109
6.2 Definition, Examples and Properties 110
6.3 Connectedness in the Real Line 113
6.4 Path-connectedness 116
6.5 Connectedness of Unions and Finite Products 121
6.6 Connectedness of Infinite Products (Optional) 125

7 Compact Spaces 127

7.1 Introduction 127
7.2 Definition, Examples and Properties 128
7.3 Hausdorff Spaces and Compactness 131
7.4 Compactness in the Real Line 135
7.5 Compactness of Products 137
7.6 Finite Intersection Property (Optional) 140

8 Separation Axioms **143**

8.1 Introduction 143
8.2 Definition and Examples 143
8.3 Regular and Normal spaces 148
8.4 Separation Axioms and Compactness 154

9 Metric Spaces **157**

9.1 Introduction 157
9.2 Definition and Examples 158
9.3 Properties of Metric Spaces 162
9.4 Basics on Sequences 166

10 The Classification of Surfaces **169**

10.1 Introduction 169
10.2 Surfaces and Higher-Dimensional Manifolds 174
10.3 Connected Sums of Surfaces 185
10.4 The Classification Theorem 191
10.5 Triangulations of Surfaces 195
10.6 Proof of the Classification Theorem 198
10.7 Euler Characteristics and Uniqueness 208

11 Fundamental Groups and Covering Spaces **215**

11.1 Introduction 215
11.2 Homotopy of Functions and Paths 217
11.3 An Operation on Paths 223
11.4 The Fundamental Group 228
11.5 Covering Spaces 235
11.6 Fundamental Group of the Circle and Related Spaces 245
11.7 The Fundamental Groups of Surfaces 252
