Presentations

Structure-property relationships for multi-component crystals of nitropyrazoles
Nurunnisa Atceken, Jack Hemingway, Carole A. Morrison, Imogen L. Christopher, David M. Williamson, Colin R. Pulham 8

Energetic functionalization of 2,5-diaminotetrazole
Maximilian Benz, Thomas M. Klapötke, Jörg Stierstorfer 19

Effect of mechanical impact on PBX disk investigated by DMA
Manfred A. Bohn, Michael J. Herrmann 24

Development of capacitive sensors for the study of detonation
James Edgeley, Christopher Braithwaite 41

In silico mutagenicity prediction by similarity search and machine learning algorithm:
Optimisation and validation of the method for High Energetic Materials
Mailys Fournier, Brigitte Defoort, Raphaël Terreux 51

Quantitative properties through semantic learning
Allen Garcia, Connor O’Ryan, Gaurav Kumar, Peter W. Chung 68

Kinetic predictions concerning the long-term stability of TKX-50
Alexander G. Harter, Jasmin T. Lechner, Thomas M. Klapötke, Jörg Stierstorfer 78

Time-temperature superposition applied to PBX damage evolution
Kieran Heal, David M. Williamson 83

Preparation and stabilisation of amorphous energetic materials
Monica C. Chandwani, Colin R. Pulham, Carole A. Morrison, Rajen B. Patel 91

The impact of polymorphism on impact sensitivity - a computational study
Imogen L. Christopher, Adam A. L. Michalchuck, Carole A. Morrison, Colin R. Pulham 97

Tailoring the properties of FOX-7 using co-crystallisation
Akachai Khumsri, Stuart R. Kennedy, Gary S. Nichol, David M. Williamson, Colin R. Pulham 105

Research output software for energetic materials based on observational modelling (RoseBoom©) <i>Thomas M. Klapötke, Sabrina Wahler</i>	110
Adjustability of energetic coordination compounds: comparison of three 1-(azidoalkyl)-5H-tetrazole ligands and their energetic coordination compounds <i>Moritz Kofen, Marcus Lommel, Jörg Stierstorfer, Thomas M. Klapötke</i>	114
Ultrasound-induced damage in high solid load polymer-bonded explosives <i>Stefan de Koster, Hayleigh Lloyd, Sandra Blaak, Antoine van der Heijden, Denise Meuken</i> ...	119
Synthesis of energetic materials using flow chemistry <i>Dimitris Kyprianou</i>	127
Evaluation of thermal diffusivity of solid propellants by flash method <i>Julien Le Clanche, Martin Monloubou, Steven Kerampran</i>	135
Impact and friction sensitivity of acidic PETN <i>Tobias Lenz, Thomas M. Klapötke, Jörg Stierstorfer, Moritz Mühlemann, Guillaume Lemarchand, Ralf Weber</i>	142
Continuous-flow synthesis of dichloroglyoxime <i>Patrick Lieber</i>	150
Predicting the technology readiness level of NTREM papers <i>Sinead O'Brien, Dr William Proud</i>	155
Additive manufacture of energetic materials: assessing the printability of energetic composites <i>Michael O'Donnell</i>	168
Development of an automated approach for chemical synthesis knowledge graphs directly from text corpora <i>Connor O'Ryan, Peter W. Chung, Ian Michel-Tyler, John Fischer, Ruth Doherty</i>	177
Effect of the fuel used on the burning mechanism of nanothermite compositions <i>Mateusz Polis, Agnieszka Stolarczyk, Tomasz Jarosz</i>	185
Multiphoton excitation for standoff detection of fuels in plastic containers <i>Thomas de Prinse, Thomas Slattery, Jillian Moffatt, Thomas Payten, Georgios Tsiminis, Elizaveta Klantsataya, Tak W. Kee, Nigel A. Spooner</i>	192
Progress towards defining the UK methodology for the stability testing of energetic materials <i>Liam Sullivan, Ruth Tunnell, David Tod, Nigel Rutter</i>	202
A computational study of ballistic modifiers in the fizz reaction zone of double base propellants <i>Lisette R. Warren, Jack Tait, Aaron Rowell, Patrick McMaster, Colin R. Pulham, Carole A. Morrison</i>	221

Posters

Optimization of thermobaric explosives formulations by numerical modeling of detonation <i>Shaikha Al Darmaki, Jovica Bogdanov, Danica M. Bajić</i>	240
Application of thermochemical computer code in the prediction of nano-scale nitramines performance <i>Salama Alheara, Danica M. Bajić</i>	249
In-situ characterization of solvent mediated cocrystallization of HNIW/HMX <i>Kivanc Aydinçak</i>	259
Boron-based thermobaric explosive computational modeling and possible optimization paths <i>Danica M. Bajić, Shaikha Al Darmaki</i>	270
The structural combination of TKX-50 and MAD-X1: synthesis and characterization of 5-(3-Nitro-1,2,4-triazol-1-yl-5-yl)-tetrazol-1-ol <i>Lukas Bauer, Maximilian Benz, Thomas M. Klapötke, Cedric Pignot, Jörg Stierstorfer</i>	278
Influence of diameter of explosive charge and thickness of steel confinement on detonation velocity of ANFO explosives <i>Vječislav Bohanek, Mario Dobrilović, Philipp Hartlieb, Bartul Marunić</i>	285
Energetic azoxy compounds as crystallization modifiers in melt-cast explosives <i>Szymon Boroński, Mateusz Szala, Waldemar A. Trzciński</i>	291
Synthesis, characterization, and functional group substitution of energetic triazines <i>Shannon E. Creegan, Davin G. Piercey, Matthias Zeller, Edward F. C. Byrd</i>	297
Solvent free polyurethanic binders for pyrotechnic compositions <i>Florin M. Dîrloman, Traian Rotariu, Gabriela Toader, Bogdan G. Pulpea, Mihai I. Ungureanu, Neculai D. Zvincu, Adrian N. Rotariu, Liviu C. Matache</i>	303
Trinitro-Orcinol (C ₇ H ₅ N ₃ O ₈) as anion in energetic metal compounds <i>Simon M. J. Endraß, Thomas M. Klapötke, Jörg Stierstorfer</i>	311

Thermal, calorimetric and morphologic characterisation of polyurethane based composite flare pyrotechnic material <i>Cristiana Epure, Ovidiu Iorga, Tudor V. Tiganeşcu, Andreea E. Moldovan, Alexandru Marin, Raluca E. Gînghină, Horia R. Botiş</i>	318
Direct alkylation of nitroguanidine by reaction with alkylamines – investigation of reactivity and optimization <i>Mateusz Gratzke, Konrad Skrobisz</i>	324
Detonation performance of urea hydrogen peroxide <i>Francis Halleux, Jean-François Pons, Ian Wilson, Romuald Van Riet, Bart Simoens, Michel Lefebvre</i>	333
Predicting the impact sensitivity of two possible lead azide replacements <i>Jack Hemingway, Colin R. Pulham, Peter Portius, Carole A. Morrison</i>	338
Melt crystallization of ammonium dinitramide suspensions with additives investigated by means of X-ray diffraction <i>Michael J. Herrmann, Ulrich Förter-Barth, Thomas Heintz</i>	346
The study on the crosslinking and curing of poly(glycidyl azide) (GAP) <i>Michał Chmielarek, Katarzyna Cieślak, Paweł Maksimowski</i>	354
Preparation and characterization of the butacene based composite propellants <i>Halil İpek, Taner Atalar, Ali Fatih Zeybek, Değer Çetin</i>	362
Towards the phlegmatizing of TATP: influence of vacuum oils on its sensitivity to impact and friction <i>Laurence Jeunieau, Bart Simoens, Romuald Van Riet, Michel Lefebvre</i>	368
Preparation and properties of some polynitroaromatic compounds containing nitroamino groups <i>Mantas Jonušis, Jelena Tamulienė, Jonas Šarlauskas</i>	372
Modern method for crater volume evaluation <i>Jindrich Kucera, Jan Matl, Jiri Pachman</i>	387
Tracking acceleration of projectiles using Photonic Doppler Velocimetry <i>Martin Künzel, Jindrich Kucera, Karel Kubat</i>	393
OPTIMEX: First attempts in detonation temperature measurements <i>Martin Künzel, Jindrich Kucera, Jiri Pachman</i>	399
Synthesis of 1,3-bis(2-nitroxyethyl)-1-nitrourea and 1,3-bis(2-nitroxyethyl)-1,3-dinitrourea <i>Miroslav Labaj, Lukáš Marek, Zdeněk Jalový</i>	407
Comparing long-term stability predictions of commonly known secondary explosives <i>Jasmin T. Lechner, Alexander G. Harter, Thomas M. Klapötke, Jörg Stierstorfer</i>	412
Structural clarification and characterization of a metal-free primary explosive based on 4-amino-2,3,6-trinitrophenol <i>Marcus Lommel, Thomas M. Klapötke, Jörg Stierstorfer</i>	420

Burn rate, combustion heat and flame temperature measurements for metal powders and alloys used in composite energetic materials <i>Alexandru Marin, Munteanu Mihail, Ovidiu Iorga, Tudor-Viorel Ţiganescu, Şchiopu Andrei</i> ..	425
Towards a crystal structure for nitrocellulose <i>Edmund Morris, Colin R. Pulham, Patrick McMaster, Carole A. Morrison</i>	435
Experimental vapor pressures of 3,5-dihydroxy-2,4,6-trinitrotoluene (TNO) via transpiration method supported by the quantitative HPLC <i>Andreas Neuer, Simon M. J. Endraß, Greta Bikelytė, Thomas M. Klapötke</i>	440
Determination of camphor concentration profile in deterred single base propellant 5/7SFL <i>Thi Van Nguyen, Quang Hieu Pham, Quang Phat Tran, Phu Soan Le, Van Toai Pham, Phuong Thao Nguyen Thi</i>	449
Preparing and properties of ecological pyrotechnic compositions <i>Milan Olšovský, Milan Krištof, Petr Kuna, Šimon Budzák</i>	455
The effect of accelerated ageing on the mechanical properties, chemical composition and morphostructure of a HTPB-AP-Al rocket propellant <i>Elena-Ramona Oncioiu, Nicoleta Grigoriu, Ovidiu Iorga, Tudor-Viorel Ţiganescu, Adriana-Elena Bratu, Mihail Munteanu</i>	459
Synthesis and emphasized study of TATB/nitramines cocrystals via coagglomeration method <i>Veerabhadragouda B. Patil, Petr Bělina, Svatopluk Zeman</i>	469
The influence of Catocene on properties of heterogeneous solid rocket propellants with reduced quantity of HCl in combustion products <i>Paulina Paziewska, Katarzyna Gańczyk-Specjalska, Rafał Lewczuk, Rafał Bogusz</i>	483
Assessing the trade-off between prediction accuracy and interpretability for topic modeling on energetic materials corpora <i>Monica Puerto, Mason Kellett, Rodanthi Nikopoulou, Mark D. Fuge, Ruth Doherty, Peter W. Chung, Zois Boukouvalas</i>	493
Behavior of ADN-prills in microfluidic emulsion crystallization process <i>Ligia Radulescu</i>	502
Evaluation of nitropyrazole based nitrate esters as melt-castable energetic materials <i>Elena Reinhardt, Tobias Lenz, Jörg Stierstorfer, Thomas M. Klapötke</i>	507
Spectroscopic, structural and energetic properties of pentanitroaniline <i>Christian Riedelsheimer, Thomas M. Klapötke, Burkhard Krumm</i>	513
Comparison of 1-vinyl 5H-tetrazole and 1-allyl-5H-tetrazole as ligands in energetic transition metal complexes <i>Markus Rösch, Jörg Stierstorfer, Thomas M. Klapötke</i>	522

PBX compositions based on high explosives and polymeric binders with adjustable water solubility <i>Traian Rotariu, Andreea E. Moldovan, Gabriela Toader, Sorin Eșanu, Florin M. Dîrloman, Raluca E. Ginghină, Ana M. Gavrilă</i>	527
Differences between sample form and it's effect on sensitivity of composite propellants containing BCHMX as a new energetic additive <i>Filip Sazceck, Ondrej Vodochodsky, Robert Matyas, Jiri Pachman</i>	534
Cylinder test of emulsion explosives: possibilities of detonation pressure estimation <i>Jakub Selesovsky, Jiri Pachman, Jindrich Kucera</i>	541
Lithium 2,2,2-trinitroethyl nitrocarbamate monohydrate as colorant in red-burning pyrotechnics <i>Alexander Schweiger, Jörg Stierstorfer, Thomas M. Klapötke</i>	547
Reduced sensitivity RDX and HMX crystallized and spheriodized in propylene carbonate <i>Radovan Skácel, Jan Šabach, Markéta Zikmundová, Veronika Kožená, Martin Kubíček</i>	553
Prediction of ANFO's charge diameter effect on detonation parameters using hydrodynamic and thermochemical codes <i>Barbara Štimac Tumara, Muhamed Sućeska, Siniša Stanković, Vinko Škrlec</i>	559
Ballistic modification of extruded double base propellants <i>Megan Tierney</i>	568
Oxetan-3-one as promising building block for energetic monomers <i>Michael Voggenreiter, Jörg Stierstorfer, Thomas M. Klapötke, Ivan Gospodinov, Thomas Fessard</i>	574
Tunable energetic materials from 4-nitro-1,2,3-triazole <i>Dominique R. Wozniak, Ben Salfer, Matthias Zeller, Edward F. C. Byrd, Davin G. Piercey</i> ...	579
Comparison of plastic bonded enhanced blast explosive with TNT and Comp-B in terms of thermal and blast properties <i>Arda Yılmaz, Ali Fatih Zeybek, Serhat Bilgen, İnci Ecem Metin, Değer Çetin, Tarık Yücel</i> ...	586
In search of new commercially available bonding agents for RDX/HTPB compositions <i>Karol Zalewski, Zbigniew Chytek, Waldemar A. Trzciński</i>	594
