**Presentations**

Structure-property relationships for multi-component crystals of nitropyrazoles  
*Nurunnisa Atceken, Jack Hemingway, Carole A. Morrison, Imogen L. Christopher, David M. Williamson, Colin R. Pulham* ..... 8

Energetic functionalization of 2,5-diaminotetrazole  
*Maximilian Benz, Thomas M. Klapötke, Jörg Stierstorfer* ..... 19

Effect of mechanical impact on PBX disk investigated by DMA  
*Manfred A. Bohn, Michael J. Herrmann* ..... 24

Development of capacitive sensors for the study of detonation  
*James Edgeley, Christopher Braithwaite* ..... 41

In silico mutagenicity prediction by similarity search and machine learning algorithm:  
Optimisation and validation of the method for High Energetic Materials  
*Mailys Fournier, Brigitte Defoort, Raphaël Terreux* ..... 51

Quantitative properties through semantic learning  
*Allen Garcia, Connor O’Ryan, Gaurav Kumar, Peter W. Chung* ..... 68

Kinetic predictions concerning the long-term stability of TKX-50  
*Alexander G. Harter, Jasmin T. Lechner, Thomas M. Klapötke, Jörg Stierstorfer* ..... 78

Time-temperature superposition applied to PBX damage evolution  
*Kieran Heal, David M. Williamson* ..... 83

Preparation and stabilisation of amorphous energetic materials  
*Monica C. Chandwani, Colin R. Pulham, Carole A. Morrison, Rajen B. Patel* ..... 91

The impact of polymorphism on impact sensitivity - a computational study  
*Imogen L. Christopher, Adam A. L. Michalchuck, Carole A. Morrison, Colin R. Pulham* ..... 97

Tailoring the properties of FOX-7 using co-crystallisation  
*Akachai Khumsri, Stuart R. Kennedy, Gary S. Nichol, David M. Williamson, Colin R. Pulham* 105

## Posters

|  |     |
|--|-----|
| Optimization of thermobaric explosives formulations by numerical modeling of detonation<br><i>Shaikha Al Darmaki, Jovica Bogdanov, Danica M. Bajić</i> .....   | 240 |
| Application of thermochemical computer code in the prediction of nano-scale nitramines performance<br><i>Salama Alheara, Danica M. Bajić</i> .....   | 249 |
| In-situ characterization of solvent mediated cocrystallization of HNIW/HMX<br><i>Kivanc Aydinçak</i> .....   | 259 |
| Boron-based thermobaric explosive computational modeling and possible optimization paths<br><i>Danica M. Bajić, Shaikha Al Darmaki</i> .....   | 270 |
| The structural combination of TKX-50 and MAD-X1: synthesis and characterization of 5-(3-Nitro-1,2,4-triazol-1-yl)-tetrazol-1-ol<br><i>Lukas Bauer, Maximilian Benz, Thomas M. Klapötke, Cedric Pignot, Jörg Stierstorfer</i> ..... | 278 |
| Influence of diameter of explosive charge and thickness of steel confinement on detonation velocity of ANFO explosives<br><i>Vječislav Bohanek, Mario Dobrilović, Philipp Hartlieb, Bartul Marunić</i> .....                       | 285 |
| Energetic azoxy compounds as crystallization modifiers in melt-cast explosives<br><i>Szymon Boroński, Mateusz Szala, Waldemar A. Trzciński</i> .....   | 291 |
| Synthesis, characterization, and functional group substitution of energetic triazines<br><i>Shannon E. Creegan, Davin G. Piercey, Matthias Zeller, Edward F. C. Byrd</i> .....   | 297 |
| Solvent free polyurethanic binders for pyrotechnic compositions<br><i>Florin M. Dîrloman, Traian Rotariu, Gabriela Toader, Bogdan G. Pulpea, Mihai I. Ungureanu, Neculai D. Zvincu, Adrian N. Rotariu, Liviu C. Matache</i> .....  | 303 |
| Trinitro-Orcinol (C <sub>7</sub> H <sub>5</sub> N <sub>3</sub> O <sub>8</sub> ) as anion in energetic metal compounds<br><i>Simon M. J. Endraß, Thomas M. Klapötke, Jörg Stierstorfer</i> .....                                    | 311 |

|   |     |
|---|-----|
| Thermal, calorimetric and morphologic characterisation of polyurethane based composite flare pyrotechnic material<br><i>Cristiana Epure, Ovidiu Iorga, Tudor V. Tiganescu, Andreea E. Moldovan, Alexandru Marin, Raluca E. Ginghină, Horia R. Botiș</i> ..... | 318 |
| Direct alkylation of nitroguanidine by reaction with alkylamines – investigation of reactivity and optimization<br><i>Mateusz Gratzke, Konrad Skrobisz</i> .....  | 324 |
| Detonation performance of urea hydrogen peroxide<br><i>Francis Halleux, Jean-François Pons, Ian Wilson, Romuald Van Riet, Bart Simoens, Michel Lefebvre</i> .....   | 333 |
| Predicting the impact sensitivity of two possible lead azide replacements<br><i>Jack Hemingway, Colin R. Pulham, Peter Portius, Carole A. Morrison</i> .....  | 338 |
| Melt crystallization of ammonium dinitramide suspensions with additives investigated by means of X-ray diffraction<br><i>Michael J. Herrmann, Ulrich Förter-Barth, Thomas Heintz</i> .....  | 346 |
| The study on the crosslinking and curing of poly(glycidyl azide) (GAP)<br><i>Michał Chmielarek, Katarzyna Cieślak, Paweł Maksimowski</i> .....  | 354 |
| Preparation and characterization of the butacene based composite propellants<br><i>Halil İpek, Taner Atalar, Ali Fatih Zeybek, Değer Çetin</i> .....  | 362 |
| Towards the phlegmatizing of TATP: influence of vacuum oils on its sensitivity to impact and friction<br><i>Laurence Jeunieau, Bart Simoens, Romuald Van Riet, Michel Lefebvre</i> .....  | 368 |
| Preparation and properties of some polynitroaromatic compounds containing nitroamino groups<br><i>Mantas Jonušis, Jelena Tamulienė, Jonas Šarlauskas</i> .....  | 372 |
| Modern method for crater volume evaluation<br><i>Jindrich Kucera, Jan Matl, Jiri Pachman</i> .....  | 387 |
| Tracking acceleration of projectiles using Photonic Doppler Velocimetry<br><i>Martin Künzel, Jindrich Kucera, Karel Kubat</i> .....   | 393 |
| OPTIMEX: First attempts in detonation temperature measurements<br><i>Martin Künzel, Jindrich Kucera, Jiri Pachman</i> .....   | 399 |
| Synthesis of 1,3-bis(2-nitroxyethyl)-1-nitrourea and 1,3-bis(2-nitroxyethyl)-1,3-dinitrourea<br><i>Miroslav Labaj, Lukáš Marek, Zdeněk Jalový</i> .....   | 407 |
| Comparing long-term stability predictions of commonly known secondary explosives<br><i>Jasmin T. Lechner, Alexander G. Harter, Thomas M. Klapötke, Jörg Stierstorfer</i> .....  | 412 |
| Structural clarification and characterization of a metal-free primary explosive based on 4-amino-2,3,6-trinitrophenol<br><i>Marcus Lommel, Thomas M. Klapötke, Jörg Stierstorfer</i> .....  | 420 |

|   |     |
|---|-----|
| Burn rate, combustion heat and flame temperature measurements for metal powders and alloys used in composite energetic materials<br><i>Alexandru Marin, Munteanu Mihail, Ovidiu Iorga, Tudor-Viorel Ţiganescu, Şchiopu Andrei</i> ..  | 425 |
| Towards a crystal structure for nitrocellulose<br><i>Edmund Morris, Colin R. Pulham, Patrick McMaster, Carole A. Morrison</i> .....   | 435 |
| Experimental vapor pressures of 3,5-dihydroxy-2,4,6-trinitrotoluene (TNO) via transpiration method supported by the quantitative HPLC<br><i>Andreas Neuer, Simon M. J. Endraß, Greta Bikelytė, Thomas M. Klapötke</i> .....   | 440 |
| Determination of camphor concentration profile in deterred single base propellant 5/7SFL<br><i>Thi Van Nguyen, Quang Hieu Pham, Quang Phat Tran, Phu Soan Le, Van Toai Pham, Phuong Thao Nguyen Thi</i> .....   | 449 |
| Preparing and properties of ecological pyrotechnic compositions<br><i>Milan Olšovský, Milan Krištof, Petr Kuna, Šimon Budzák</i> .....  | 455 |
| The effect of accelerated ageing on the mechanical properties, chemical composition and morphostructure of a HTPB-AP-Al rocket propellant<br><i>Elena-Ramona Oncioiu, Nicoleta Grigoriu, Ovidiu Iorga, Tudor-Viorel Ţiganescu, Adriana-Elena Bratu, Mihail Munteanu</i> ..... | 459 |
| Synthesis and emphasized study of TATB/nitramines cocrystals via coagglomeration method<br><i>Veerabhadragouda B. Patil, Petr Bělina, Svatopluk Zeman</i> .....   | 469 |
| The influence of Catocene on properties of heterogeneous solid rocket propellants with reduced quantity of HCl in combustion products<br><i>Paulina Paziewska, Katarzyna Gańczyk-Specjalska, Rafał Lewczuk, Rafał Bogusz</i> .....  | 483 |
| Assessing the trade-off between prediction accuracy and interpretability for topic modeling on energetic materials corpora<br><i>Monica Puerto, Mason Kellett, Rodanthi Nikopoulou, Mark D. Fuge, Ruth Doherty, Peter W. Chung, Zois Boukouvalas</i> .....                    | 493 |
| Behavior of ADN-prills in microfluidic emulsion crystallization process<br><i>Ligia Radulescu</i> .....   | 502 |
| Evaluation of nitropyrazole based nitrate esters as melt-castable energetic materials<br><i>Elena Reinhardt, Tobias Lenz, Jörg Stierstorfer, Thomas M. Klapötke</i> .....   | 507 |
| Spectroscopic, structural and energetic properties of pentanitroaniline<br><i>Christian Riedelsheimer, Thomas M. Klapötke, Burkhard Krumm</i> .....   | 513 |
| Comparison of 1-vinyl 5H-tetrazole and 1-allyl-5H-tetrazole as ligands in energetic transition metal complexes<br><i>Markus Rösch, Jörg Stierstorfer, Thomas M. Klapötke</i> .....  | 522 |

|  |     |
|--|-----|
| PBX compositions based on high explosives and polymeric binders with adjustable water solubility<br><i>Traian Rotariu, Andreea E. Moldovan, Gabriela Toader, Sorin Eșanu, Florin M. Dîrloman, Raluca E. Ginghină, Ana M. Gavrilă</i> ..... | 527 |
| Differences between sample form and it's effect on sensitivity of composite propellants containing BCHMX as a new energetic additive<br><i>Filip Sazecek, Ondrej Vodochodsky, Robert Matyas, Jiri Pachman</i> .....                        | 534 |
| Cylinder test of emulsion explosives: possibilities of detonation pressure estimation<br><i>Jakub Selesovsky, Jiri Pachman, Jindrich Kucera</i> .....  | 541 |
| Lithium 2,2,2-trinitroethyl nitrocarbamate monohydrate as colorant in red-burning pyrotechnics<br><i>Alexander Schweiger, Jörg Stierstorfer, Thomas M. Klapötke</i> .....  | 547 |
| Reduced sensitivity RDX and HMX crystallized and spheriodized in propylene carbonate<br><i>Radovan Skácel, Jan Šabach, Markéta Zikmundová, Veronika Kožená, Martin Kubíček</i> .....   | 553 |
| Prediction of ANFO's charge diameter effect on detonation parameters using hydrodynamic and thermochemical codes<br><i>Barbara Štimac Tumara, Muhamed Sućeska, Siniša Stanković, Vinko Škrlec</i> .....                                    | 559 |
| Ballistic modification of extruded double base propellants<br><i>Megan Tierney</i> .....   | 568 |
| Oxetan-3-one as promising building block for energetic monomers<br><i>Michael Voggenreiter, Jörg Stierstorfer, Thomas M. Klapötke, Ivan Gospodinov, Thomas Fessard</i> .....   | 574 |
| Tunable energetic materials from 4-nitro-1,2,3-triazole<br><i>Dominique R. Wozniak, Ben Salfer, Matthias Zeller, Edward F. C. Byrd, Davin G. Piercey</i> ...   | 579 |
| Comparison of plastic bonded enhanced blast explosive with TNT and Comp-B in terms of thermal and blast properties<br><i>Arda Yılmaz, Ali Fatih Zeybek, Serhat Bilgen, İnci Ecem Metin, Değer Çetin, Tarık Yücel</i> ...                   | 586 |
| In search of new commercially available bonding agents for RDX/HTPB compositions<br><i>Karol Zalewski, Zbigniew Chytek, Waldemar A. Trzciński</i> .....  | 594 |
