

Preface	xix
Part I: Introduction to Neurobiology	1
Chapter 1 A Preview of Neurobiology	2
Chapter 2 Organization of Nervous Systems	20
Part II: Cellular Aspects of Neurobiology	37
Chapter 3 Origin of Membrane Potential	39
Chapter 4 Mechanism of Nerve Action Potential	66
Chapter 5 Synaptic Transmission at the Neuromuscular Junction	92
Chapter 6 Synaptic Transmission in the Central Nervous System	114
Part III: Motor Control Systems	137
Chapter 7 Neural Control of Muscle Contraction	138
Chapter 8 Spinal Cord Mechanisms	164
Chapter 9 Brain Motor Mechanisms	188
Chapter 10 Sensorimotor Integration	210
Chapter 11 The Autonomic Nervous System	236
Chapter 12 The Hypothalamus	259
Part IV: Sensory Systems	281
Chapter 13 An Overview of Sensory Systems	282
Chapter 14 The Somatic Senses	298
Chapter 15 The Visual System: Retina	318
Chapter 16 The Visual System: Higher Visual Processing	352
Chapter 17 Hearing and Other Vibration Senses	379
Chapter 18 Chemical Senses	402
Part V: Neuronal Plasticity and Higher Cortical Function	427
Chapter 19 Neural Development	430
Chapter 20 Synaptic Plasticity	465
Chapter 21 Language and Cognition	496
Advanced Topic 1: Derivations of the Nernst and Goldman Equations	512
Advanced Topic 2: Electrical Properties of Cells	518
Advanced Topic 3: Analysis of Ion Channel Gating	525
Glossary	539
Index	557
