What is psychology?	4
So much to explore...	6
Looking for answers	8
Psychology's close relatives	10
Chapter 1: Experiments	13
Psychologists ask questions about how people think, feel or behave. They then find a way to test possible answers.	
Chapter 2: The core functions of the mind	23
How do we sense our surroundings, learn language or remember things?	
Chapter 3: Thinking things through	45
How do we make judgments and decisions? And do they always make sense?	
Chapter 4: Differences between people	59
We're all unique but we're also very similar. How do psychologists define the differences between us?	

Chapter 5: Growing up and up 79

We turn from a tiny cell to a baby, to a child, to an adult. Psychologists call this development.

Chapter 6: We are social creatures 89

Discover how our behaviour is affected by the people around us.

Chapter 7: Brains and mental health 109

Meet your brain, and find out about brain illnesses, injuries and other mental health problems.
