
CONTENTS

Environmental sampling – Wastewater and sludge Sampler Education Volume 5 of 5

Chapter 1	1
Introduction	1
1.1 General background	1
1.2 Regulatory requirements	10
1.3 International standards and guidelines	11
Chapter 2	13
Basic knowledge	13
2.1 Material characteristics	13
2.2 Types of sample	17
Chapter 3	25
Reading and understanding a sampling plan	25
3.1 Objectives of sampling	25
3.2 Quality objectives	26
3.3 Sampling target	27
3.4 The sampling location	27
3.5 Identification of critical conditions	29
3.6 Role of the parties involved in sampling	29
Chapter 4	31
Sampling methods	31
4.1 Principles and equipment – wastewater	31
4.2 Principles and equipment – sludge	42
4.3 Preparation for sampling	46
Chapter 5	49
Sampling on site	49
5.1 Identification of sampling location	49
5.2 Sampling procedure for wastewater	49
5.3 Measurements during wastewater sampling	54
5.4 Subsampling of wastewater	60
5.5 Sampling process for sludge	61
5.6 Subsampling of sludge	66
Chapter 6	71
Sample handling	71
6.1 Package, storage and preservation	71
6.2 Transport and delivery	74

Chapter 7	77
Documentation.....	77
7.1 Sampling identification	77
7.2 Sample labelling	77
7.3 Field record	78
7.4 Chain of custody report	79
7.5 Writing sampling reports	79
7.6 Archiving	80
Chapter 8	83
Quality and performance control.....	83
8.1 Sampling quality requirements	83
8.2 Tools for quality management of wastewater and sludge sampling	84
8.3 Preparing for sampling	87
8.4 Sampling validation	90
8.5 Sampling quality control	92
8.6 Evaluation of sampling uncertainty	93
8.7 Expression and reporting of sampling uncertainty	94
Chapter 9	97
Health and safety	97
9.1 Hazards	97
9.2 Safety equipment	98
9.3 Best practice on hygiene and safety	98
Chapter 10	101
Glossary.....	101
Chapter 11	111
References	111
Appendices	113
A1. Example of a sampling field report form	113
A2. Example of a chain of custody report form	115
