

# I. Discrete Subgroups of Lie Groups

E. B. Vinberg, V. V. Gorbatsevich  
and O. V. Shvartsman

## Contents

|  |    |
|--|----|
| Chapter 0. Introduction .....  | 5  |
| Chapter 1. Discrete Subgroups of Locally Compact Topological Groups .....                  | 7  |
| §1. The Simplest Properties of Lattices .....  | 7  |
| 1.1. Definition of a Discrete Subgroup. Examples .....                                     | 7  |
| 1.2. Commensurability and Reducibility of Lattices .....                                   | 10 |
| §2. Discrete Groups of Transformations .....   | 12 |
| 2.1. Basic Definitions and Examples .....  | 12 |
| 2.2. Covering Sets and Fundamental Domains of a Discrete Group<br>of Transformations ..... | 15 |
| §3. Group-Theoretical Properties of Lattices in Lie Groups .....                           | 17 |
| 3.1. Finite Presentability of Lattices .....   | 17 |
| 3.2. A Theorem of Selberg and Some of Its Consequences .....                               | 18 |
| 3.3. The Property (T) .....  | 18 |
| §4. Intersection of Discrete Subgroups with Closed Subgroups .....                         | 20 |
| 4.1. $\Gamma$ -Closedness of Subgroups .....   | 20 |
| 4.2. Subgroups with Good $\Gamma$ -Hereditiy .....   | 22 |
| 4.3. Quotient Groups with Good $\Gamma$ -Hereditiy .....                                   | 23 |
| 4.4. $\Gamma$ -closure .....   | 24 |
| §5. The Space of Lattices of a Locally Compact Group .....                                 | 25 |
| 5.1. Chabauty's Topology .....   | 25 |
| 5.2. Minkowski's Lemma .....   | 25 |
| 5.3. Mahler's Criterion .....  | 26 |
| §6. Rigidity of Discrete Subgroups of Lie Groups .....                                     | 27 |
| 6.1. Space of Homomorphisms and Deformations .....   | 27 |
| 6.2. Rigidity and Cohomology .....   | 28 |

|  |   |    |
|--|---|----|
| 6.3.   | Deformation of Uniform Subgroups .....  | 30 |
| §7.  | Arithmetic Subgroups of Lie Groups .....  | 31 |
| 7.1.   | Definition of an Arithmetic Subgroup .....  | 31 |
| 7.2.   | When Are Arithmetic Groups Lattices (Uniform Lattices)? ...                               | 32 |
| 7.3.   | The Theorem of Borel and Harish-Chandra<br>and the Theorem of Godement .....              | 34 |
| 7.4.   | Definition of an Arithmetic Subgroup of a Lie Group .....                                 | 35 |
| §8.  | The Borel Density Theorem .....   | 37 |
| 8.1.   | The Property (S) .....  | 37 |
| 8.2.   | Proof of the Density Theorem .....  | 37 |
| Chapter 2. Lattices in Solvable Lie Groups ..... |   | 39 |
| §1.  | Discrete Subgroups in Abelian Lie Groups .....  | 39 |
| 1.1.   | Historical Remarks .....  | 39 |
| 1.2.   | Structure of Discrete Subgroups in Simply-Connected<br>Abelian Lie Groups .....           | 39 |
| 1.3.   | Structure of Discrete Subgroups in Arbitrary Connected<br>Abelian Groups .....            | 40 |
| 1.4.   | Use of the Language of the Theory of Algebraic Groups .....                               | 41 |
| 1.5.   | Extendability of Lattice Homomorphisms .....  | 41 |
| §2.  | Lattices in Nilpotent Lie Groups .....  | 42 |
| 2.1.   | Introductory Remarks and Examples .....   | 42 |
| 2.2.   | Structure of Lattices in Nilpotent Lie Groups .....                                       | 43 |
| 2.3.   | Lattice Homomorphisms in Nilpotent Lie Groups .....                                       | 45 |
| 2.4.   | Existence of Lattices in Nilpotent Lie Groups<br>and Their Classification .....           | 46 |
| 2.5.   | Lattices and Lattice Subgroups in Nilpotent Lie Groups .....                              | 47 |
| §3.  | Lattices in Arbitrary Solvable Lie Groups .....   | 48 |
| 3.1.   | Examples of Lattices in Solvable Lie Groups<br>of Low Dimension .....                     | 48 |
| 3.2.   | Topology of Solvmanifolds of Type $R/\Gamma$ .....  | 49 |
| 3.3.   | Some General Properties of Lattices in Solvable Lie Groups ...                            | 50 |
| 3.4.   | Mostow's Structure Theorem .....  | 51 |
| 3.5.   | Wang Groups .....   | 51 |
| 3.6.   | Splitting of Solvable Lie Groups .....  | 52 |
| 3.7.   | Criteria for the Existence of a Lattice in a Simply-Connected<br>Solvable Lie Group ..... | 55 |
| 3.8.   | Wang Splitting and its Applications .....   | 55 |
| 3.9.   | Algebraic Splitting and its Applications .....  | 58 |
| 3.10.  | Linear Representability of Lattices .....   | 60 |
| §4.  | Deformations and Cohomology of Lattices in Solvable Lie Groups ..                         | 61 |
| 4.1.   | Description of Deformations of Lattices in Simply-Connected<br>Lie Groups .....           | 61 |
| 4.2.   | On the Cohomology of Lattices in Solvable Lie Groups .....                                | 63 |

|  |     |
|--|-----|
| §5. Lattices in Special Classes of Solvable Lie Groups .....                 | 64  |
| 5.1. Lattices in Solvable Lie Groups of Type (I) .....                       | 64  |
| 5.2. Lattices in Lie Groups of Type (R) .....                                | 65  |
| 5.3. Lattices in Lie Groups of Type (E) .....                                | 65  |
| 5.4. Lattices in Complex Solvable Lie Groups .....                           | 66  |
| 5.5. Solvable Lie Groups of Small Dimension, Having Lattices .....           | 66  |
| Chapter 3. Lattices in Semisimple Lie Groups .....                           | 67  |
| §1. General Information .....  | 68  |
| 1.1. Reducibility of Lattices .....  | 68  |
| 1.2. The Density Theorem .....   | 68  |
| §2. Reduction Theory .....   | 69  |
| 2.1. Geometrical Language. Construction of a Reduced Basis .....             | 69  |
| 2.2. Proof of Mahler's Criterion .....                                       | 72  |
| 2.3. The Siegel Domain .....   | 72  |
| §3. The Theorem of Borel and Harish-Chandra (Continuation) .....             | 75  |
| 3.1. The Case of a Torus .....   | 75  |
| 3.2. The Semisimple Case (Siegel Domains) .....                              | 77  |
| 3.3. Proof of Godement's Theorem in the Semisimple Case .....                | 78  |
| §4. Criteria for Uniformity of Lattices. Covolumes of Lattices .....         | 79  |
| 4.1. Unipotent Elements in Lattices .....                                    | 79  |
| 4.2. Covolumes of Lattices in Semisimple Lie Groups .....                    | 80  |
| §5. Strong Rigidity of Lattices in Semisimple Lie Groups .....               | 82  |
| 5.1. A Theorem on Strong Rigidity .....                                      | 82  |
| 5.2. Satake Compactifications of Symmetric Spaces .....                      | 83  |
| 5.3. Plan of the Proof of Mostow's Theorem .....                             | 85  |
| §6. Arithmetic Subgroups .....   | 86  |
| 6.1. The Field Restriction Functor .....                                     | 87  |
| 6.2. Construction of Arithmetic Lattices .....                               | 90  |
| 6.3. Maximal Arithmetic Subgroups .....                                      | 92  |
| 6.4. The Commensurator .....   | 94  |
| 6.5. Normal Subgroups of Arithmetic Groups and<br>Congruence-Subgroups ..... | 96  |
| 6.6. The Arithmeticity Problem .....   | 96  |
| §7. Cohomology of Lattices in Semisimple Lie Groups .....                    | 97  |
| 7.1. One-dimensional Cohomology .....  | 98  |
| 7.2. Higher Cohomologies .....   | 100 |
| Chapter 4. Lattices in Lie Groups of General Type .....                      | 102 |
| §1. Bieberbach's Theorems and their Generalizations .....                    | 102 |
| 1.1. Bieberbach's Theorems .....   | 102 |
| 1.2. Lattices in $E(n)$ and Flat Riemannian Manifolds .....                  | 106 |
| 1.3. Generalization of the First Bieberbach Theorem .....                    | 106 |
| §2. Deformations of Lattices in Lie Groups of General Type .....             | 108 |

2.1. Description of the Space of Deformations of Uniform Lattices . . . . . 108

2.2. The Levi-Mostow Decomposition for Lattices in Lie Groups of General Type . . . . . 109

§3. Some Cohomological Properties of Lattices . . . . . 111

3.1. On the Cohomological Dimension of Lattices . . . . . 111

3.2. The Euler Characteristic of Lattices in Lie Groups . . . . . 112

3.3. On the Determination of Properties of Lie Groups by the Lattices in Them . . . . . 113

    3.1. The Property (S) . . . . . 113

References . . . . . 116

Chapter 2. Lattices in Solvable Lie Groups . . . . . 117

2.1. Geometrical Language, Construction of a Reduced Basis . . . . . 117

2.2. Proof of Mautner's Criterion . . . . . 117

2.3. The Siegel Domains as a Discrete Subgroup . . . . . 117

3.1. The Group of Automorphisms of a Solvable Lie Group . . . . . 117

3.2. The Semisimple Case (Siegel Domain) . . . . . 117

3.3. Proof of Godement's Theorem on the Semisimple Case . . . . . 117

4.1. Uniformity of Lattices in Solvable Lie Groups . . . . . 117

4.2. Covolumes of Lattices in Solvable Lie Groups . . . . . 117

5.1. A Theorem on Strong Rigidity . . . . . 117

5.2. Satake Compactifications of Symmetric Spaces . . . . . 117

5.3. Plan of the Proof of Mostow's Theorem . . . . . 117

5.4. Arithmetic Subgroups of Solvable Lie Groups . . . . . 117

6.1. The Field Extension . . . . . 117

6.2. Construction of Arithmetic Lattices . . . . . 117

6.3. Maximal Arithmetic Subgroups . . . . . 117

6.4. The Commensurator and the Discrete Subgroup . . . . . 117

6.5. Special Arithmetic Subgroups . . . . . 117

7.1. The Arithmetic Problem . . . . . 117

7.2. Cohomology of Lattices in Semisimple Lie Groups . . . . . 117

7.3. Criteria for Existence of Arithmetic Lattices . . . . . 117

7.4. Higher Cohomologies . . . . . 117

7.5. Wang Splitting and its Applications . . . . . 117

Chapter 4. Lattices in Lie Groups of General Type . . . . . 117

4.1. Linear Representations of Lattices . . . . . 117

4.2. Blichfeldt's Theorem and its Generalizations . . . . . 117

4.3. Blichfeldt's Theorem . . . . . 117

4.4. Lattices in  $SO(n)$  and Poincaré-Minkowski . . . . . 117

4.5. Generalization of the First Blichfeldt Theorem . . . . . 117

4.6. Deformations of Lattices in Lie Groups of General Type . . . . . 117
