

I. Foundations of Lie Theory

A. L. Onishchik, E. B. Vinberg

Translated from the Russian

by A. Kozłowski

Contents

Introduction	4
Chapter 1. Basic Notions	6
§1. Lie Groups, Subgroups and Homomorphisms	6
1.1 Definition of a Lie Group	6
1.2 Lie Subgroups	7
1.3 Homomorphisms of Lie Groups	9
1.4 Linear Representations of Lie Groups	9
1.5 Local Lie Groups	11
§2. Actions of Lie Groups	12
2.1 Definition of an Action	12
2.2 Orbits and Stabilizers	12
2.3 Images and Kernels of Homomorphisms	14
2.4 Orbits of Compact Lie Groups	14
§3. Coset Manifolds and Quotients of Lie Groups	15
3.1 Coset Manifolds	15
3.2 Lie Quotient Groups	17
3.3 The Transitive Action Theorem and the Epimorphism Theorem	18
3.4 The Pre-image of a Lie Group Under a Homomorphism	18
3.5 Semidirect Products of Lie Groups	19
§4. Connectedness and Simply-connectedness of Lie Groups	21
4.1 Connected Components of a Lie Group	21
4.2 Investigation of Connectedness of the Classical Lie Groups	22
4.3 Covering Homomorphisms	24
4.4 The Universal Covering Lie Group	26

4.5 Investigation of Simply-connectedness of the Classical Lie Groups	27
Chapter 2. The Relation Between Lie Groups and Lie Algebras	29
§1. The Lie Functor	29
1.1 The Tangent Algebra of a Lie Group	29
1.2 Vector Fields on a Lie Group	31
1.3 The Differential of a Homomorphism of Lie Groups	32
1.4 The Differential of an Action of a Lie Group	34
1.5 The Tangent Algebra of a Stabilizer	35
1.6 The Adjoint Representation	35
§2. Integration of Homomorphisms of Lie Algebras	37
2.1 The Differential Equation of a Path in a Lie Group	37
2.2 The Uniqueness Theorem	38
2.3 Virtual Lie Subgroups	38
2.4 The Correspondence Between Lie Subgroups of a Lie Group and Subalgebras of Its Tangent Algebra	39
2.5 Deformations of Paths in Lie Groups	40
2.6 The Existence Theorem	41
2.7 Abelian Lie Groups	43
§3. The Exponential Map	44
3.1 One-Parameter Subgroups	44
3.2 Definition and Basic Properties of the Exponential Map	44
3.3 The Differential of the Exponential Map	46
3.4 The Exponential Map in the Full Linear Group	47
3.5 Cartan's Theorem	47
3.6 The Subgroup of Fixed Points of an Automorphism of a Lie Group	48
§4. Automorphisms and Derivations	48
4.1 The Group of Automorphisms	48
4.2 The Algebra of Derivations	50
4.3 The Tangent Algebra of a Semi-Direct Product of Lie Groups	51
§5. The Commutator Subgroup and the Radical	52
5.1 The Commutator Subgroup	52
5.2 The Maltsev Closure	53
5.3 The Structure of Virtual Lie Subgroups	54
5.4 Mutual Commutator Subgroups	55
5.5 Solvable Lie Groups	56
5.6 The Radical	57
5.7 Nilpotent Lie Groups	58
Chapter 3. The Universal Enveloping Algebra	59
§1. The Simplest Properties of Universal Enveloping Algebras	59
1.1 Definition and Construction	60

1.2	The Poincaré–Birkhoff–Witt Theorem	61
1.3	Symmetrization	63
1.4	The Center of the Universal Enveloping Algebra	64
1.5	The Skew-Field of Fractions of the Universal Enveloping Algebra	64
§2.	Bialgebras Associated with Lie Algebras and Lie Groups	66
2.1	Bialgebras	66
2.2	Right Invariant Differential Operators on a Lie Group	67
2.3	Bialgebras Associated with a Lie Group	68
§3.	The Campbell–Hausdorff Formula	70
3.1	Free Lie Algebras	70
3.2	The Campbell–Hausdorff Series	71
3.3	Convergence of the Campbell–Hausdorff Series	73
Chapter 4. Generalizations of Lie Groups		74
§1.	Lie Groups over Complete Valued Fields	74
1.1	Valued Fields	74
1.2	Basic Definitions and Examples	75
1.3	Actions of Lie Groups	75
1.4	Standard Lie Groups over a Non-archimedean Field	76
1.5	Tangent Algebras of Lie Groups	76
§2.	Formal Groups	78
2.1	Definition and Simplest Properties	78
2.2	The Tangent Algebra of a Formal Group	79
2.3	The Bialgebra Associated with a Formal Group	80
§3.	Infinite-Dimensional Lie Groups	80
3.1	Banach Lie Groups	81
3.2	The Correspondence Between Banach Lie Groups and Banach Lie Algebras	82
3.3	Actions of Banach Lie Groups on Finite-Dimensional Manifolds	83
3.4	Lie-Fréchet Groups	84
3.5	ILB- and ILH-Lie Groups	85
§4.	Lie Groups and Topological Groups	86
4.1	Continuous Homomorphisms of Lie Groups	87
4.2	Hilbert’s 5-th Problem	87
§5.	Analytic Loops	88
5.1	Basic Definitions and Examples	88
5.2	The Tangent Algebra of an Analytic Loop	89
5.3	The Tangent Algebra of a Diassociative Loop	90
5.4	The Tangent Algebra of a Bol Loop	91
