Group Extensions and Covering Orduce

Preface to the Second Edition

Alimet Land

Preface to the First Edition	V	iii
Notation		χv
CHAPTER 1		
Fundamental Concepts of Group Theory		1
<ul><li>1.1. Binary Operations, Semigroups, and Groups</li><li>1.2. Examples of Groups</li><li>1.3. Subgroups and Cosets</li></ul>	III. Frimitive Fermutation Grou  E.s. Classification of Sharplysiss  Lie Nethicu Groups	1
1.4. Homomorphisms and Quotient Groups		17
1.5. Endomorphisms and Automorphisms		25
1.6. Permutation Groups and Group Actions	epresentations of Groups	)1
CHAPTER 2		
Free Groups and Presentations	5.3. Characters 8.4. Tensor Productsund Repres	44
	25. Applications to Finite Grou	44 50 56
CHAPTER 3		
Decompositions of a Group		63
<ul><li>3.1. Series and Composition Series</li><li>3.2. Some Simple Groups</li></ul>	i.s. p-Soluble Groups	63 71 80
old. Direct Decempositions		

Start Torsion-Free Groups

diff.2. Free Products of Groups

CHAPTER 4	
Abelian Groups	93
4.1. Torsion Groups and Divisible Groups	93
4.2. Direct Sums of Cyclic and Quasicyclic Gr	
4.3. Pure Subgroups and p-Groups	106
4.4. Torsion-Free Groups	114
CHAPTER 5	
Soluble and Nilpotent Groups	121
<ul><li>5.1. Abelian and Central Series</li><li>5.2. Nilpotent Groups</li></ul>	121 129
5.3. Groups of Prime-Power Order	139
5.4. Soluble Groups	147
J Jordon Oroups	
CHAPTER 6	
Free Groups and Free Products	159
6.1. Further Properties of Free Groups	159
6.2. Free Products of Groups	167
<ul><li>6.3. Subgroups of Free Products</li><li>6.4. Generalized Free Products</li></ul>	174 184
0.4. Generalized Free Froducts	104
CHAPTER 7	
Finite Permutation Groups	192
	192
7.2. Primitive Permutation Groups	197
7.3. Classification of Sharply k-Transitive Per	
7.4. The Mathieu Groups	208
Representations of Groups	213
8.1. Representations and Modules	213
8.2. Structure of the Group Algebra	223
8.3. Characters	226
8.4. Tensor Products and Representations	235
8.5. Applications to Finite Groups	246
CHAPTER 9	
Finite Soluble Groups	252
9.1. Hall π-Subgroups	252
9.2. Sylow Systems and System Normalizers	261
9.3. p-Soluble Groups	269
9.4. Supersoluble Groups	274
9.5. Formations	277

CHAPTER 14 Finiteness Properties 416 14.1. Finitely Generated Groups and Finitely Presented Groups 416 14.2. Torsion Groups and the Burnside Problems 422 14.3. Locally Finite Groups 429 14.4. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators 439  CHAPTER 15	Contents	xiii
The Transfer and Its Applications  10.1. The Transfer Homomorphism 10.2. Grün's Theorems 10.3. Frobenius's Criterion for p-Nilpotence 10.4. Thompson's Criterion for p-Nilpotence 10.5. Fixed-Point-Free Automorphisms 10.6. Grun's Theory of Group Extensions 11.1. Group Extensions and Covering Groups 11.2. Homology Groups and Cohomology Groups 11.3. The Gruenberg Resolution 11.4. Group-Theoretic Interpretations of the (Co)homology Groups 11.5. The Gruenberg Resolution 11.6. Group-Theoretic Interpretations of the (Co)homology Groups 11.7. Locally Nilpotent Groups 12.1. Locally Nilpotent Groups 12.2. Some Special Types of Locally Nilpotent Groups 12.3. Engel Elements and Engel Groups 12.4. Classes of Groups Defined by General Series 12.5. Locally Soluble Groups 13.6. Locally Soluble Groups 13.1. Joins and Intersections of Subnormal Subgroups 13.2. Permutability and Subnormality 13.3. The Minimal Condition on Subnormal Subgroups 13.4. Groups in Which Normality Is a Transitive Relation 13.5. Automorphism Towers and Complete Groups 14.6. Finitely Generated Groups and Finitely Presented Groups 14.6. Finitely Generated Groups and Finitely Presented Groups 14.6. Finiteness Properties 14.1. Finitely Generated Groups and Finitely Presented Groups 14.2. Groups with the Maximal or Minimal Condition 14.3. Locally Finite Groups 14.4. 2-Groups with the Maximal or Minimal Condition 14.5. Finiteness Properties of Conjugates and Commutators 15.1. Soluble Linear Groups 16.1. Soluble Linear Groups	CHAPTER 10	
10.1. The Transfer Homomorphism       285         10.2. Grün's Theorems       292         10.3. Frobenius's Criterion for p-Nilpotence       295         10.4. Thompson's Criterion for p-Nilpotence       298         10.5. Fixed-Point-Free Automorphisms       305         CHAPTER 11         The Theory of Group Extensions       310         11.1. Group Extensions and Covering Groups       310         11.2. Homology Groups and Cohomology Groups       326         11.3. The Gruenberg Resolution       333         11.4. Group-Theoretic Interpretations of the (Co)homology Groups       341         CHAPTER 12         Generalizations of Nilpotent and Soluble Groups       356         12.1. Locally Nilpotent Groups       363         12.2. Some Special Types of Locally Nilpotent Groups       369         12.2. Locally Soluble Groups       369         12.2. Locally Soluble Groups       381         CHAPTER 13         Subnormal Subgroups       385         13.1. Joins and Intersections of Subnormal Subgroups       385         13.2. Permutability and Subnormality       393         13.3. The Minimal Condition on Subnormal Subgroups       385         13.4. Groups in Which Normality Is a Transitive Relation		285
10.2. Grün's Theorems 10.3. Frobenius's Criterion for p-Nilpotence 10.4. Thompson's Criterion for p-Nilpotence 10.5. Fixed-Point-Free Automorphisms 10.5. Fixed-Point-Free Automorphisms 10.6. Fixed-Point-Free Automorphisms 10.7. Fixed-Point-Free Automorphisms 10.8. Theory of Group Extensions 11.1. Group Extensions and Covering Groups 11.2. Homology Groups and Cohomology Groups 11.3. The Gruenberg Resolution 11.4. Group-Theoretic Interpretations of the (Co)homology Groups 11.5. Homology Groups and Cohomology Groups 11.6. Group-Theoretic Interpretations of the (Co)homology Groups 12.1. Locally Nilpotent Groups 12.2. Some Special Types of Locally Nilpotent Groups 12.3. Engel Elements and Engel Groups 12.4. Classes of Groups Defined by General Series 12.5. Locally Soluble Groups 13.1. Joins and Intersections of Subnormal Subgroups 13.2. Permutability and Subnormality 13.3. The Minimal Condition on Subnormal Subgroups 13.4. Groups in Which Normality Is a Transitive Relation 13.5. Automorphism Towers and Complete Groups 14.6. Transitive Relation 14.7. Finitely Generated Groups and Finitely Presented Groups 14.8. Croups with the Maximal or Minimal Condition 14.9. Finiteness Properties 14.1. Finitely Generated Groups and Finitely Presented Groups 14.2. Torsion Groups and the Burnside Problems 14.2. Torsion Groups and the Burnside Problems 14.3. Locally Finite Groups 14.4. 2-Groups with the Maximal or Minimal Condition 14.5. Finiteness Properties of Conjugates and Commutators 15.1. Soluble Linear Groups 15.1. Soluble Linear Groups	DEL ZESTSTELLE INDESSES LA RESERVA DE LA RES	
10.3. Frobenius's Criterion for $p$ -Nilpotence29510.4. Thompson's Criterion for $p$ -Nilpotence29810.5. Fixed-Point-Free Automorphisms305CHAPTER 11The Theory of Group Extensions31011.1. Group Extensions and Covering Groups31011.2. Homology Groups and Cohomology Groups32611.3. The Gruenberg Resolution33311.4. Group-Theoretic Interpretations of the (Co)homology Groups341CHAPTER 12Generalizations of Nilpotent and Soluble Groups35612.1. Locally Nilpotent Groups36312.2. Some Special Types of Locally Nilpotent Groups36312.3. Engel Elements and Engel Groups36912.4. Classes of Groups Defined by General Series37612.5. Locally Soluble Groups381CHAPTER 13Subnormal Subgroups38513.1. Joins and Intersections of Subnormal Subgroups38513.2. Permutability and Subnormality39313.3. The Minimal Condition on Subnormal Subgroups39613.4. Groups in Which Normality Is a Transitive Relation40213.5. Automorphism Towers and Complete Groups408CHAPTER 14Finiteness Properties41644.1. Finitely Generated Groups and Finitely Presented Groups41644.2. Torsion Groups and the Burnside Problems42244.3. Locally Finite Groups42944.4. 2-Groups with the Maximal or Minimal Condition43744.5. Finiteness Properties of Conjugates and Commu		
10.4. Thompson's Criterion for p-Nilpotence 10.5. Fixed-Point-Free Automorphisms 305  CHAPTER 11  The Theory of Group Extensions 310  11.1. Group Extensions and Covering Groups 311.2. Homology Groups and Cohomology Groups 326  11.3. The Gruenberg Resolution 333  11.4. Group-Theoretic Interpretations of the (Co)homology Groups 341  CHAPTER 12  Generalizations of Nilpotent and Soluble Groups 356  12.1. Locally Nilpotent Groups 369  12.2. Some Special Types of Locally Nilpotent Groups 369  12.3. Engel Elements and Engel Groups 369  12.4. Classes of Groups Defined by General Series 376  12.5. Locally Soluble Groups 381  CHAPTER 13  Subnormal Subgroups 385  13.1. Joins and Intersections of Subnormal Subgroups 386  13.2. Permutability and Subnormality 393  13.3. The Minimal Condition on Subnormal Subgroups 386  13.4. Groups in Which Normality Is a Transitive Relation 402  13.5. Automorphism Towers and Complete Groups 408  CHAPTER 14  Finiteness Properties 416  41. Finitely Generated Groups and Finitely Presented Groups 416  42. Torsion Groups and the Burnside Problems 422  14.3. Locally Finite Groups 429  14.4. 2-Groups with the Maximal or Minimal Condition 437  14.5. Finiteness Properties of Conjugates and Commutators 430  CHAPTER 15  Infinite Soluble Groups 450		24.00
10.5. Fixed-Point-Free Automorphisms  CHAPTER 11 The Theory of Group Extensions  11.1. Group Extensions and Covering Groups  11.2. Homology Groups and Cohomology Groups  11.3. The Gruenberg Resolution  13.3 The Gruenberg Resolution  CHAPTER 12 Generalizations of Nilpotent and Soluble Groups  22.1. Locally Nilpotent Groups  336  12.2. Some Special Types of Locally Nilpotent Groups  349  12.4. Classes of Groups Defined by General Series  340  25. Locally Soluble Groups  381  CHAPTER 13  Subnormal Subgroups  385  385  38.1. Joins and Intersections of Subnormal Subgroups  386  387  388  CHAPTER 13  Subnormal Subgroups  389  381  381  385  385  382. Permutability and Subnormality  393  383  384. Groups in Which Normality Is a Transitive Relation  402  385  406  CHAPTER 14  Finiteness Properties  416  417  418. Finitely Generated Groups and Finitely Presented Groups  418  429  430  CHAPTER 15  Infinite Soluble Groups  450  450  CHAPTER 15  Infinite Soluble Linear Groups  450  450  450		
CHAPTER 11 The Theory of Group Extensions  11.1. Group Extensions and Covering Groups 11.2. Homology Groups and Cohomology Groups 11.3. The Gruenberg Resolution 11.4. Group-Theoretic Interpretations of the (Co)homology Groups 341  CHAPTER 12 Generalizations of Nilpotent and Soluble Groups 356 12.1. Locally Nilpotent Groups 363 12.2. Some Special Types of Locally Nilpotent Groups 363 12.3. Engel Elements and Engel Groups 364 12.5. Locally Soluble Groups 376 12.5. Locally Soluble Groups 385 12.6. Locally Soluble Groups 386 12.7. Locally Soluble Groups 387  CHAPTER 13 Subnormal Subgroups 387 388 389 380 380 381 381 381 381 382 383 384 385 385 385 386 387 388 388 389 389 389 389 389 389 389 389		
The Theory of Group Extensions  11.1. Group Extensions and Covering Groups  11.2. Homology Groups and Cohomology Groups  12.3. The Gruenberg Resolution  13.3 The Gruenberg Resolution  13.4 Group-Theoretic Interpretations of the (Co)homology Groups  CHAPTER 12  Generalizations of Nilpotent and Soluble Groups  12.1. Locally Nilpotent Groups  12.2. Some Special Types of Locally Nilpotent Groups  12.3. Engel Elements and Engel Groups  12.4. Classes of Groups Defined by General Series  12.5. Locally Soluble Groups  385  CHAPTER 13  Subnormal Subgroups  385  13.1. Joins and Intersections of Subnormal Subgroups  386  13.2. Permutability and Subnormality  13.3. The Minimal Condition on Subnormal Subgroups  387  13.4. Groups in Which Normality Is a Transitive Relation  402  13.5. Automorphism Towers and Complete Groups  408  CHAPTER 14  Finiteness Properties  41. Finitely Generated Groups and Finitely Presented Groups  41. Locally Finite Groups  42. Croups with the Maximal or Minimal Condition  437  44. 2-Groups with the Maximal or Minimal Condition  437  44. 5. Finiteness Properties of Conjugates and Commutators  439  CHAPTER 15  Infinite Soluble Groups  450	TO.S.	rabal
The Theory of Group Extensions  11.1. Group Extensions and Covering Groups  11.2. Homology Groups and Cohomology Groups  12.3. The Gruenberg Resolution  13.3 The Gruenberg Resolution  13.4 Group-Theoretic Interpretations of the (Co)homology Groups  CHAPTER 12  Generalizations of Nilpotent and Soluble Groups  12.1. Locally Nilpotent Groups  12.2. Some Special Types of Locally Nilpotent Groups  12.3. Engel Elements and Engel Groups  12.4. Classes of Groups Defined by General Series  12.5. Locally Soluble Groups  385  CHAPTER 13  Subnormal Subgroups  385  13.1. Joins and Intersections of Subnormal Subgroups  386  13.2. Permutability and Subnormality  13.3. The Minimal Condition on Subnormal Subgroups  387  13.4. Groups in Which Normality Is a Transitive Relation  402  13.5. Automorphism Towers and Complete Groups  408  CHAPTER 14  Finiteness Properties  41. Finitely Generated Groups and Finitely Presented Groups  41. Locally Finite Groups  42. Croups with the Maximal or Minimal Condition  437  44. 2-Groups with the Maximal or Minimal Condition  437  44. 5. Finiteness Properties of Conjugates and Commutators  439  CHAPTER 15  Infinite Soluble Groups  450	CILADTED 11	
11.1. Group Extensions and Covering Groups 11.2. Homology Groups and Cohomology Groups 12.3. The Gruenberg Resolution 13.3 The Gruenberg Resolution 13.4 Group-Theoretic Interpretations of the (Co)homology Groups 341  CHAPTER 12 Generalizations of Nilpotent and Soluble Groups 356 12.1. Locally Nilpotent Groups 361 12.2. Some Special Types of Locally Nilpotent Groups 362 12.3. Engel Elements and Engel Groups 363 12.4. Classes of Groups Defined by General Series 376 12.5. Locally Soluble Groups 385  CHAPTER 13 Subnormal Subgroups 385 13.1. Joins and Intersections of Subnormal Subgroups 386 13.2. Permutability and Subnormality 397 13.3. The Minimal Condition on Subnormal Subgroups 396 13.4. Groups in Which Normality Is a Transitive Relation 402 13.5. Automorphism Towers and Complete Groups 408  CHAPTER 14 Finiteness Properties 416 41. Finitely Generated Groups and Finitely Presented Groups 416 42. Torsion Groups and the Burnside Problems 422 424 43. Locally Finite Groups 445 44. 2-Groups with the Maximal or Minimal Condition 447 44. 2-Groups with the Maximal or Minimal Condition 447 45. Finiteness Properties of Conjugates and Commutators 450  CHAPTER 15 Infinite Soluble Groups 450		210
11.2. Homology Groups and Cohomology Groups 11.3. The Gruenberg Resolution 11.4. Group-Theoretic Interpretations of the (Co)homology Groups 333 11.4. Group-Theoretic Interpretations of the (Co)homology Groups 341  CHAPTER 12  Generalizations of Nilpotent and Soluble Groups 356 12.1. Locally Nilpotent Groups 363 12.2. Some Special Types of Locally Nilpotent Groups 363 12.3. Engel Elements and Engel Groups 369 12.4. Classes of Groups Defined by General Series 376 12.5. Locally Soluble Groups 381  CHAPTER 13  Subnormal Subgroups 385 13.1. Joins and Intersections of Subnormal Subgroups 386 13.2. Permutability and Subnormality 393 13.3. The Minimal Condition on Subnormal Subgroups 396 13.4. Groups in Which Normality Is a Transitive Relation 402 13.5. Automorphism Towers and Complete Groups 408  CHAPTER 14  Finiteness Properties 416 42. Torsion Groups and the Burnside Problems 422 14.3. Locally Finite Groups 429 14.4. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators 439  CHAPTER 15  Infinite Soluble Groups 450  15.1. Soluble Linear Groups		
11.3. The Gruenberg Resolution 11.4. Group-Theoretic Interpretations of the (Co)homology Groups 341  CHAPTER 12 Generalizations of Nilpotent and Soluble Groups 356 12.1. Locally Nilpotent Groups 363 12.2. Some Special Types of Locally Nilpotent Groups 369 12.3. Engel Elements and Engel Groups 369 12.4. Classes of Groups Defined by General Series 376 12.5. Locally Soluble Groups 381  CHAPTER 13  Subnormal Subgroups 385 13.1. Joins and Intersections of Subnormal Subgroups 386 13.2. Permutability and Subnormality 393 13.3. The Minimal Condition on Subnormal Subgroups 396 13.4. Groups in Which Normality Is a Transitive Relation 402 13.5. Automorphism Towers and Complete Groups 408  CHAPTER 14  Finiteness Properties 416 41. Finitely Generated Groups and Finitely Presented Groups 429 43. Locally Finite Groups 429 44. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators 439  CHAPTER 15  Infinite Soluble Groups 450  15.1. Soluble Linear Groups		
CHAPTER 12 Generalizations of Nilpotent and Soluble Groups  356 12.1. Locally Nilpotent Groups 356 12.2. Some Special Types of Locally Nilpotent Groups 363 12.3. Engel Elements and Engel Groups 369 12.4. Classes of Groups Defined by General Series 376 12.5. Locally Soluble Groups 385 381 CHAPTER 13 Subnormal Subgroups 385 13.1. Joins and Intersections of Subnormal Subgroups 386 13.2. Permutability and Subnormality 393 13.3. The Minimal Condition on Subnormal Subgroups 386 13.4. Groups in Which Normality Is a Transitive Relation 387 138. Automorphism Towers and Complete Groups 408 CHAPTER 14 Finiteness Properties 416 41.1. Finitely Generated Groups and Finitely Presented Groups 429 43. Locally Finite Groups 429 44. 2-Groups with the Maximal or Minimal Condition 437 44.5. Finiteness Properties of Conjugates and Commutators 439 CHAPTER 15 Infinite Soluble Groups 450 450		
CHAPTER 12 Generalizations of Nilpotent and Soluble Groups  12.1. Locally Nilpotent Groups  12.2. Some Special Types of Locally Nilpotent Groups  12.3. Engel Elements and Engel Groups  12.4. Classes of Groups Defined by General Series  12.5. Locally Soluble Groups  381  CHAPTER 13  Subnormal Subgroups  13.1. Joins and Intersections of Subnormal Subgroups  13.2. Permutability and Subnormality  13.3. The Minimal Condition on Subnormal Subgroups  13.4. Groups in Which Normality Is a Transitive Relation  13.5. Automorphism Towers and Complete Groups  408  CHAPTER 14  Finiteness Properties  416  14.1. Finitely Generated Groups and Finitely Presented Groups  416  14.2. Torsion Groups and the Burnside Problems  422  14.3. Locally Finite Groups  429  14.4. 2-Groups with the Maximal or Minimal Condition  437  14.5. Finiteness Properties of Conjugates and Commutators  CHAPTER 15  Infinite Soluble Groups  450  15.1. Soluble Linear Groups		
Generalizations of Nilpotent and Soluble Groups  12.1. Locally Nilpotent Groups  12.2. Some Special Types of Locally Nilpotent Groups  12.3. Engel Elements and Engel Groups  12.4. Classes of Groups Defined by General Series  12.5. Locally Soluble Groups  12.6. Locally Soluble Groups  12.7. Locally Soluble Groups  13.8 Subnormal Subgroups  13.1. Joins and Intersections of Subnormal Subgroups  13.2. Permutability and Subnormality  13.3. The Minimal Condition on Subnormal Subgroups  13.4. Groups in Which Normality Is a Transitive Relation  13.5. Automorphism Towers and Complete Groups  14.6 Finiteness Properties  14.1. Finitely Generated Groups and Finitely Presented Groups  14.2. Torsion Groups and the Burnside Problems  14.2. Torsion Groups with the Maximal or Minimal Condition  14.3. Locally Finite Groups  14.4. 2-Groups with the Maximal or Minimal Condition  14.5. Finiteness Properties of Conjugates and Commutators  CHAPTER 15  Infinite Soluble Groups  450  15.1. Soluble Linear Groups	11.4. Group-Theoretic Interpretations of the (Co)homology Groups	341
Generalizations of Nilpotent and Soluble Groups  12.1. Locally Nilpotent Groups  12.2. Some Special Types of Locally Nilpotent Groups  12.3. Engel Elements and Engel Groups  12.4. Classes of Groups Defined by General Series  12.5. Locally Soluble Groups  12.6. Locally Soluble Groups  12.7. Locally Soluble Groups  13.8 Subnormal Subgroups  13.1. Joins and Intersections of Subnormal Subgroups  13.2. Permutability and Subnormality  13.3. The Minimal Condition on Subnormal Subgroups  13.4. Groups in Which Normality Is a Transitive Relation  13.5. Automorphism Towers and Complete Groups  14.6 Finiteness Properties  14.1. Finitely Generated Groups and Finitely Presented Groups  14.2. Torsion Groups and the Burnside Problems  14.2. Torsion Groups with the Maximal or Minimal Condition  14.3. Locally Finite Groups  14.4. 2-Groups with the Maximal or Minimal Condition  14.5. Finiteness Properties of Conjugates and Commutators  CHAPTER 15  Infinite Soluble Groups  450  15.1. Soluble Linear Groups	CHAPTER 12	
12.2. Some Special Types of Locally Nilpotent Groups 12.3. Engel Elements and Engel Groups 12.4. Classes of Groups Defined by General Series 13.6 12.5. Locally Soluble Groups 381  CHAPTER 13  Subnormal Subgroups 385 13.1. Joins and Intersections of Subnormal Subgroups 386 13.2. Permutability and Subnormality 397 13.3. The Minimal Condition on Subnormal Subgroups 396 13.4. Groups in Which Normality Is a Transitive Relation 13.5. Automorphism Towers and Complete Groups 408  CHAPTER 14  Finitely Generated Groups and Finitely Presented Groups 416 41.1. Finitely Generated Groups and Finitely Presented Groups 416 42. Torsion Groups and the Burnside Problems 422 43. Locally Finite Groups 44. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators 439  CHAPTER 15 Infinite Soluble Groups 450		356
12.2. Some Special Types of Locally Nilpotent Groups 12.3. Engel Elements and Engel Groups 12.4. Classes of Groups Defined by General Series 13.6 12.5. Locally Soluble Groups 381  CHAPTER 13  Subnormal Subgroups 385 13.1. Joins and Intersections of Subnormal Subgroups 386 13.2. Permutability and Subnormality 397 13.3. The Minimal Condition on Subnormal Subgroups 396 13.4. Groups in Which Normality Is a Transitive Relation 13.5. Automorphism Towers and Complete Groups 408  CHAPTER 14  Finitely Generated Groups and Finitely Presented Groups 416 41.1. Finitely Generated Groups and Finitely Presented Groups 416 42. Torsion Groups and the Burnside Problems 422 43. Locally Finite Groups 44. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators 439  CHAPTER 15 Infinite Soluble Groups 450	12.1. Locally Nilpotent Groups	356
12.3. Engel Elements and Engel Groups 12.4. Classes of Groups Defined by General Series 13.6 12.5. Locally Soluble Groups 381  CHAPTER 13  Subnormal Subgroups 385 13.1. Joins and Intersections of Subnormal Subgroups 386 13.2. Permutability and Subnormality 393 13.3. The Minimal Condition on Subnormal Subgroups 396 13.4. Groups in Which Normality Is a Transitive Relation 402 13.5. Automorphism Towers and Complete Groups 408  CHAPTER 14  Finiteness Properties 416 14.1. Finitely Generated Groups and Finitely Presented Groups 416 14.2. Torsion Groups and the Burnside Problems 422 14.3. Locally Finite Groups 429 14.4. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators 439  CHAPTER 15 Infinite Soluble Groups 450 15.1. Soluble Linear Groups		
12.4. Classes of Groups Defined by General Series  12.5. Locally Soluble Groups  381  CHAPTER 13  Subnormal Subgroups  385  13.1. Joins and Intersections of Subnormal Subgroups  385  13.2. Permutability and Subnormality  393  13.3. The Minimal Condition on Subnormal Subgroups  396  13.4. Groups in Which Normality Is a Transitive Relation  402  13.5. Automorphism Towers and Complete Groups  408  CHAPTER 14  Finiteness Properties  416  14.1. Finitely Generated Groups and Finitely Presented Groups  416  14.2. Torsion Groups and the Burnside Problems  422  14.3. Locally Finite Groups  429  14.4. 2-Groups with the Maximal or Minimal Condition  437  14.5. Finiteness Properties of Conjugates and Commutators  439  CHAPTER 15  Infinite Soluble Groups  450  15.1. Soluble Linear Groups		
12.5. Locally Soluble Groups  CHAPTER 13 Subnormal Subgroups  385  13.1. Joins and Intersections of Subnormal Subgroups 385  13.2. Permutability and Subnormality 393  13.3. The Minimal Condition on Subnormal Subgroups 396  13.4. Groups in Which Normality Is a Transitive Relation 402  13.5. Automorphism Towers and Complete Groups  408  CHAPTER 14 Finiteness Properties 416  14.1. Finitely Generated Groups and Finitely Presented Groups 416  14.2. Torsion Groups and the Burnside Problems 422  14.3. Locally Finite Groups 429  14.4. 2-Groups with the Maximal or Minimal Condition 437  14.5. Finiteness Properties of Conjugates and Commutators  439  CHAPTER 15  Infinite Soluble Groups 450  15.1. Soluble Linear Groups		
CHAPTER 13 Subnormal Subgroups  385 13.1. Joins and Intersections of Subnormal Subgroups 385 13.2. Permutability and Subnormality 393 13.3. The Minimal Condition on Subnormal Subgroups 396 13.4. Groups in Which Normality Is a Transitive Relation 402 13.5. Automorphism Towers and Complete Groups  408  CHAPTER 14 Finiteness Properties 416 14.1. Finitely Generated Groups and Finitely Presented Groups 416 14.2. Torsion Groups and the Burnside Problems 422 14.3. Locally Finite Groups 429 14.4. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators 439  CHAPTER 15 Infinite Soluble Groups 450 15.1. Soluble Linear Groups		381
Subnormal Subgroups  13.1. Joins and Intersections of Subnormal Subgroups 13.2. Permutability and Subnormality 13.3. The Minimal Condition on Subnormal Subgroups 13.4. Groups in Which Normality Is a Transitive Relation 13.5. Automorphism Towers and Complete Groups  CHAPTER 14 Finiteness Properties 416 14.1. Finitely Generated Groups and Finitely Presented Groups 416 14.2. Torsion Groups and the Burnside Problems 422 14.3. Locally Finite Groups 429 14.4. 2-Groups with the Maximal or Minimal Condition 437 14.5. Finiteness Properties of Conjugates and Commutators  CHAPTER 15 Infinite Soluble Groups 450 15.1. Soluble Linear Groups		
13.1. Joins and Intersections of Subnormal Subgroups 13.2. Permutability and Subnormality 13.3. The Minimal Condition on Subnormal Subgroups 13.4.
