Preface	ix
Prologue: The greatest monument and a road map for a quest	1
<b>I Our physical world</b>	<b>15</b>
Preview of part I	15
1. Matter and the forces that move it	17
2. The rise of the classical field	22
3. Time unified with space	34
4. The geometry of spacetime	47
5. The rise and fall and rise of particles	56
Recap of part I	65
<b>II The road to quantum field theory</b>	<b>67</b>
Preview of part II	67
1. Getting the best deal: from least time to extremal action	69
2. Global versus local	80
3. Enter the quantum	84
Recap of part II	99
<b>III Becoming a quantum field theorist</b>	<b>101</b>
Preview of part III	101
1. How to become a quantum field theorist (almost) instantly	103
2. Origin of forces: range and exchange	112
3. Attraction or repulsion: a mysterious but all important sign	123
Recap of part III	135

<b>IV</b>	<b>A universe of fields</b>	137
	Preview of part IV	137
	1. Everybody is a field: Dirac set the electron free	139
	2. Theoretical physics, like music, starts with harmony but then tries to move on	149
	3. Quantum electrodynamics, perturbation theory, and cultural taboos	162
	4. The road to gauge theory	173
	Recap of part IV	181
	A well-deserved rest	183
<b>V</b>	<b>Quantum field theory and the four fundamental interactions</b>	185
	Preview of part V	185
	1. Antimatter!	187
	2. Too strong and too mean but ultimately free	192
	3. The weak and the electroweak interactions	211
	Addendum to chapter V.3	239
	4. Grand unification	243
	5. Gravity and curved spacetime	261
	6. Quantum gravity: The Holy Grail of theoretical physics?	279
	Recap of part V	295
<b>VI</b>	<b>Quantum field theory is more intellectually complete than quantum mechanics</b>	297
	Preview of part VI	297
	1. A question of identity	299
	2. Exclusion, inclusion, and quantum statistics	312
	3. Intellectual completeness	324
	Recap of part VI	329
	Parting comments and some unsolicited advice	331
	Timeline	345
	A short list of mathematical symbols	347
	Bibliography	351
	Index	353
