

Preface	7
----------------------	---

PHYSICS

S. Saito, Y. Nakano, P. Dohnal, L. Uvarova, R. Plašil, Š. Roučka, and J. Glosík, State Selective Recombination of H_3^+ Ions at Low Temperatures: Kinetic Modelling and Experimental Study on Plasma Deexcitation, f2	9
A. Salohub, J. Šafránková, and Z. Němeček, Wave Activity Upstream of the Dayside Bow Shock: Statistical Study, f2	16
N. Xirogiannopoulou, O. Goncharov, J. Šafránková, and Z. Němeček, Statistical Analysis of Foreshock Plasmoids and SLAMS, f2	22
M. Aghabozorgi Nafchi, F. Němec, G. Pi, Z. Němeček, and J. Šafránková, Statistical Analysis of Parameters Controlling the Magnetopause Location, f2	31
P. Basuvaraj, F. Němec, Z. Němeček and J. Šafránková, Observing the Martian Ionospheric Plasma Depletion Events by the MAVEN and Mars Express Spacecraft, f2	38
S. Ijaz, J. Vaverka, J. Šafránková, and Z. Němeček, Comparison of Solitary Waves and Dust Impact Signals Detected by Electric Field Instruments Onboard MAVEN Spacecraft, f2	48
B. Park, A. Pitňa, J. Šafránková, and Z. Němeček, Change of Characteristic Ion Length Scales and Spectral Properties of Magnetic Field Fluctuations Across Different Types of Interplanetary Shocks, f2	55
A. Kolínská, I. Kolmašová, O. Santolík, E. Defer, and S. Pedeboy, Electromagnetic Radiation of Cloud-to-ground Lightning Flashes Detected by Broadband Receiver BLESKA and Narrowband SAETTA Stations, f2	65
J. Palacký and Š. Roučka, Temporal Limit of Langmuir Probe Measurement in Collisional Plasma, f2	70
O. E. Hernández Alvarez, J. Palacký, E. Vanko, S. Rednyk, Š. Roučka, P. Dohnal, R. Plašil, and J. Glosík, Design of Ion Trap Experiment for Studies of H_3^+ Rotational Relaxation, f2	77
M. Kassayová, L. Uvarova, S. Saito, S. Rednyk, E. Vanko, P. Dohnal, Š. Roučka, R. Plašil and J. Glosík, Precise Determination of C_2H_2 Reactant Density Using CRDS Technique for 22-pole Radiofrequency Ion Trap Experiment, f2	84
H. Mishra, M. Tichy, and P. Kudrna, Diagnostics of $He+N_2+CO_2$ Plasmas in Non-segmented Cylindrical Cathode Magnetron by DC Supply, f2	89
I. Naiko, P. Kudrna, Z. Hubička, M. Čada, A. Kapran, and A. Ostapenko, Preparation of Metal Oxides Thin Films by Hollow Cathode Plasma Jet, f2	97
E. Mařaš, L. Moravský, and Š. Matejčík, Ion Mobility Spectrometry Diagnostics of NO_2 Generated in kHz Driven DBD Plasma Jet in Argon, f2	102

Z. Turek, H. Mishra, P. Kudrna, and M. Tichý, Plasma Diagnostics of Titanium Nitride for Plasmonic Study Generated Through Hollow Cathode Plasma Jet, f2	107
M. Cíbiková, M. Klas, P. Čermák, and Š. Matejčík, Characterization of Microdischarges Generated by Pulse Electric Field, f2	113
S. Agarwal, S. Singh, M. Krupka, T. Burian, R. Dudzak, J. Dostal, J. Wild, J. Krasa, and L. Juha, The Study of Hot Electrons Generated by TW Laser Radiation in Sn Foil, f2	118
Š. Jelínek, J. Chalupský, V. Hájková, V. Vozda, L. Juha, T. Burian, R. Dudžák, U. Zastrau, M. Makita, and M. Nakatsutsumi, Direct Characterization of Ultra-intense Focused Laser Beams Utilizing Ablative Imprints, f2	126
Z. Kuglerová, J. Chalupský, V. Vozda, L. Fekete, L. Juha, L. Vyšín, C. Menoni, L. Rush, and J. J. Rocca, Characterization of EUV Laser Beams by Ablation Imprints in PMMA Created at Varied Target–Focus Distances, f2	133
J. Blaško, B. Stachová, J. Országh, P. Papp, and Š. Matejčík, Electron Induced Processes on Pyridine, f2	140
B. Stachová J. Blaško, J. Országh, and Š. Matejčík, Fluorescence of Neutral Fragments of Acetone, f2	145
M. Omezzine Gnioua and P. Španěl, Calculations of Structures and Energetics of Organic Ions Relevant to Gas Phase Ion Chemistry, f2	151
M. Protsak, P. Pleskunov, K. Biliak, D. Nikitin, M. Tosca, and A. Choukourov, Zirconium Nitride Nanoparticles Prepared by Reactive Magnetron Sputtering, f4	162
K. Biliak, D. Nikitin, M. Protsak, M. Tosca, P. Pleskunov, and A. Choukourov, Simultaneous Deposition of Gas-phase Aggregated Ag and Cu Nanoparticles into Liquid PEG as a Way to Produce Plasmonic Nanofluids, f4	167
M. Tosca, P. Pleskunov, D. Nikitin, K. Biliak, M. Protsak, and A. Choukourov, Synthesis of Oligoethylene–Boron Targets for Laser-triggered p+B Nuclear Fusion, f4	172
H. Gedeonová and M. Hudec, Determining the Mass Limit of the $SU(4)$ Gauge Leptoquark, f9 ...	177
Z. Gruberová, Search for Lepton Flavour Universality Violation in Tau Lepton Decays at Belle II, f9	182
K. Julaha, N. Zíková, V. Ždímal, and S. Mbengue, Planetary Boundary Layer Effect on Vertical Transport of Black Carbon Concentration Under Different Meteorological Conditions, f8	187
J. Radovič, M. Belda, J. Resler, P. Krč, M. Bureš, K. Eben, J. Geletič, and O. Vlček, Sensitivity Tests of the Initial and Boundary Conditions of the PALM Model, f8	196
A. P. Prieto Pérez, P. Huszár, and J. Karlický, Extreme PM and Ozone Pollution over Central Europe: Interactions of the Urban Canopy Meteorological Forcing and Radiative Effects of Urban Emissions, f8	204
T. Fürstová, Search of Science Textbooks Analysis, f12	211
A. Krejčí, Future Use of Eye-tracking in Education, f12	216

A. Nikitin, D. Mandikova, I. Pavelkova, M. Chval, M. Snetinova, and P. Kacovsky, Design of a Research on Students' Perception of Physics Demonstrations, f12	222
J. Šmahel, First Year Conclusions of Experimental Implementation of Using Mentors Method in Physics at Grammar School, f12	226
F. Hložek, Telescopes in the Physics Education in the Czech Republic, f12	231
