

## CONTENTS

Foreword, by <i>John M. Haas</i>	xv
Translator's Note, by <i>John A. Di Camillo</i>	xix
Preface	xxiii

### Part One General Bioethics

#### **Chapter 1**

#### **Origins, Development, and Definitions of Bioethics**

The Rise of Bioethics as a "New" Discipline, and the Origins of the Term	3
Major Bioethics Centers in the World	5
From Medical Ethics to Bioethics	13
The Problem of a Definition	19
Bioethics, Anthropology, and Interdisciplinary Study	24
Summary	30

#### **Chapter 2**

#### **Epistemological Justification, the Foundation of Bioethical Judgments, and Research Methodology in Bioethics**

The Epistemological Justification of Bioethics	35
The Relationship between Biomedical Science and Bioethics	38
Bioethical Models and Questions of Meta-ethics	43
<i>Bioethical models</i>	43
<i>Cognitivism and noncognitivism: Hume's law</i>	44
<i>Descriptive ethics and the sociobiological model</i>	49
<i>The subjectivist or liberal-radical model</i>	51
<i>The pragmatic-utilitarian model</i>	53
<i>The contractualist model</i>	55
<i>The phenomenological model</i>	55
<i>Principlist ethics</i>	56
<i>The personalist model</i>	57
Research Method in Bioethics	60
Moral Law and Civil Law	61
Secular Bioethics and Catholic Bioethics	65
Summary	67

### **Chapter 3**

#### **Forms, Origins, and Meaning of Human Life**

Life and Its Forms	77
Life and Teleology	80
For and Against Evolutionary Theory	81
Against Reductionism	88
The Philosophical Problem within the Biological Problem	91
Anthropocentric Ethics and Anti-anthropocentric Ethics	94
Summary	100

### **Chapter 4**

#### **The Human Person and His Body**

Humanizing Medicine	105
The Human Person and His Centrality	106
The Body and Its Values	111
<i>The dualist or intellectualist concept</i>	112
<i>The monistic concept</i>	114
<i>The personalist concept of man and of corporality</i>	115
The Transcendence of the Person	122
The Person, Health, and Illness	126
Health and Illness: A Brief Historical Overview	129
<i>The classical period</i>	129
<i>The modern and postmodern period</i>	130
<i>The human body: commercialized and de-formed</i>	132
Summary	136

### **Chapter 5**

#### **Bioethics and Its Principles**

Ethics as Life and as a Science	151
Objective Morality and Subjective Morality	156
Human Freedom	161
<i>Freedom as self-determination</i>	161
<i>Freedom as self-realization</i>	162
<i>Freedom as a relationship</i>	162
<i>Integral definition of freedom</i>	162
<i>The need for moral formation</i>	162
Norms, Values, and Natural Law	163
The Natural Moral Law as the "Way to the End"	167
The Essential Unity of Nature and Reason	168
Knowledge of the Natural Moral Law	169
The Natural Law Is "Living"	170
Teleological Ethics and Deontological Ethics	171
Perspectives in Contemporary Ethics	173

<i>Anthropological silence</i>	174
<i>Distortion of the notion of "transcendental"</i>	174
Discourse Ethics (Habermas)	175
<i>Presuppositions of discourse ethics</i>	175
<i>Characteristics of discourse ethics</i>	175
<i>Procedural reason</i>	175
<i>Intersubjectivity takes the place of universality</i>	176
Some Corollaries and Principles of Personalist Bioethics	176
<i>The principle of defense of physical life</i>	176
<i>The principle of freedom and responsibility</i>	179
<i>The principle of totality, or the therapeutic principle</i>	180
<i>The principle of sociality and subsidiarity</i>	182
Principles of North American Bioethics	183
Situations of Conflict and the Principles for Resolution	189
<i>The lesser evil (the possible good)</i>	189
<i>The principle of double effect (indirect voluntary)</i>	190
Summary	192

## **Chapter 6**

### **Bioethics and Medicine**

The Complexity of Medicine and Ethical Convergence	201
Medicine as Science and Ethical Demands	202
The Temptation of Technology	206
Impact on Society	207
The Environmental Component	212
Aims, Limits, and Risks of Medicine	213
<i>Respect for reality</i>	213
<i>Medicine as relational knowledge</i>	214
<i>Medicine as the ability to restore</i>	215
<i>The therapeutic relationship</i>	216
<i>Impossible medicine and false hopes</i>	218
The Physician-Patient Relationship	219
<i>The nature of the physician-patient relationship</i>	219
<i>The foundation of the medical act</i>	222
<i>Models of the physician-patient relationship</i>	224
<i>The meaning of the patient's good</i>	227
<i>Extent and quality of information and consent</i>	229
The Call for Virtue in the Physician-Patient Relationship	231
Summary	233

## **Chapter 7**

### **Bioethics Committees**

Why Bioethics Committees?	241
Necessary Preconditions for the Establishment of Bioethics Committees	243

Reintegrating the Anthropological Unity of Medical Knowledge and Medical Practice	246
The Problem of Standard Values and Criteria	248
Overcoming the Politicization of Medicine: Patients' Rights and Physicians' Rights	249
Parameters for the Formulation of Ethical Judgments	251
Functions and Characteristics of Bioethics Committees	253
The Ideal Characteristics of Bioethics Committees	256
The International Situation	259
<i>United States of America</i>	260
<i>Australia</i>	262
<i>Japan</i>	264
<i>Europe</i>	265
<i>Italy</i>	274
Conclusions and Outlook	282
UNESCO and Its Bioethics Committee	283
Summary	285

Part Two  
Particular Bioethics

**Chapter 8**  
**Bioethics, Genetics, and Prenatal Diagnosis**

Genetic Engineering and Manipulation	297
<i>Relevance and delimitation of the topic</i>	297
<i>Some important stages in the development of     genetic engineering</i>	304
<i>Levels and aims of intervention: Prospects and     risks for the new postgenomic medicine</i>	310
Levels of intervention	310
Aims	312
<i>Ethical approaches and ethical judgment criteria</i>	313
<i>The nonmanipulability of causal origin</i>	316
<i>Ethical principles</i>	321
<i>Specific ethical norms</i>	323
<i>Problems with postnatal genetic diagnosis and screening</i>	326
Postnatal genetic testing to verify a diagnosis of illness	326
Premarital and preconception diagnosis	327
Genetic screening of employees	328
The Human Genome Project and related ethical issues	331
Genetic tests in forensic medicine	333
Genetic tests for insurance purposes	334
<i>Gene therapy</i>	335
<i>Genetic engineering for the modification     and enhancement of human beings</i>	337

<i>Patenting the products of biotechnology</i>	340
Prenatal Diagnosis	344
<i>History and medical indications</i>	347
<i>Methods and technical procedures</i>	349
Noninvasive techniques	350
Minimally invasive techniques	352
Invasive techniques	353
<i>Results and outcomes after genetic testing</i>	357
<i>Ethical guidelines for prenatal genetic diagnosis</i>	358
Summary	365
<b>Chapter 9</b>	
<b>Bioethics, Sexuality, and Human Procreation</b>	
Scope and Current Relevance of the Topic	373
Developments in Catholic Morality on the Topic of Sexuality	382
Anthropological presuppositions regarding sexuality and procreation	384
Sexuality as Reciprocal Recognition	387
Physical Sex and Psychological Sex	390
Freedom and Responsibility with regard to Sex	391
Conjugality and Procreativity	392
The Meanings of Conjugality and the Conjugal Act	394
Ethics of Responsible Procreation and Contraception	395
<i>The principle of responsibility</i>	397
<i>The principle of the truth of love</i>	399
<i>The principle of sincerity</i>	409
Summary	412
<b>Chapter 10</b>	
<b>Bioethics and Abortion</b>	
The Bioethical Vantage Point	419
The New Conceptus in Light of Genetics and Human Biology	422
The Human Character of the Embryo	426
The Ontological and Ethical Value of the New Conceptus	434
<i>The law as a preventive measure</i>	434
<i>The moment of ensoulment</i>	436
<i>Self-conscious awareness</i>	438
<i>Essential behavior and relation</i>	439
<i>Recognizing the human image</i>	440
<i>The intention to procreate and contraceptive abortion</i>	441
<i>Philosophical conclusion: the biological and the human</i>	442
<i>Ethical conclusion</i>	445
Abortion from the Viewpoint of Legal Ethics	446
"Therapeutic Abortion": The Conflict between	447

the Life of the Mother and the Life of the Conceptus	442
<i>The "indications" for therapeutic abortion</i>	449
<i>Ethical assessment of "therapeutic abortion"</i>	450
<i>The dramatic cases</i>	452
<i>Conclusion</i>	454
Eugenic Abortion	455
Abortion Law and Conscientious Objection	455
<i>Conscience and its demands of freedom and truth</i>	456
<i>The normative character of the law and         the bond of conscience</i>	457
<i>Conscientious objection and elective abortion</i>	459
"Hidden" Forms of Abortion	464
The Prevention of Spontaneous Abortion	468
Summary	470

## **Chapter 11**

### **Bioethics and Human Fertilization Technologies**

Definition of the Ethical Problem	475
Some Distinctions	477
Artificial Insemination	478
<i>Historical notes and statistics</i>	478
<i>Medical indications, techniques, and results</i>	480
Medical indications	480
Techniques	481
Results	482
<i>Ethical assessment of intracorporeal artificial insemination</i>	483
<i>Moral aspects of homologous artificial insemination</i>	485
<i>The permissibility of the various means         and methods of obtaining semen</i>	487
<i>Ethical assessment of heterologous artificial insemination</i>	489
<i>Gamete intrafallopian transfer (GIFT) and         other techniques of intracorporeal fertilization</i>	491
In Vitro Fertilization and Embryo Transfer	494
<i>Importance and current relevance of the topic</i>	494
<i>Historical notes on IVF-ET</i>	495
<i>Medical indications, methods, and success rates</i>	497
<i>Complications of IVF-ET</i>	501
Ovarian hyperstimulation syndrome	501
Possible increase in the incidence of fetal malformations	501
Asynchrony of endometrial and embryonic development	503
Ectopic pregnancies	504
Multiple pregnancies	504
<i>Ethical problems concerning IVF-ET</i>	506
Extracorporeal homologous artificial fertilization:	508
loss of embryos and of conjugal unity	

Extracorporeal heterologous artificial fertilization	513
Repercussions on marital and parental unity	515
The identity of the unborn child	516
The eugenic incentive	517
Surrogate mothers	518
<i>In vitro fertilization and experimentation</i>	520
<i>Aberrant forms of fertilization and gestation</i>	522
<i>Artificial fertilization changes the meaning of human relations</i>	523
<i>What should be the fate of frozen embryos: adoption for birth?</i>	526
<i>Artificial fertilization in ethics and law</i>	527
<i>Concluding considerations</i>	531
Sex Selection or Determination	532
<i>Motives for sex selection or sex predetermination</i>	532
<i>Hypothetical and experimental methods before conception</i>	533
<i>Methods proposed for after conception</i>	534
<i>Natural methods and sex selection</i>	534
<i>Ethical assessment</i>	535
The ends or motives	535
The admissibility of methods and techniques	536
From Child as Therapy to Therapeutic Cloning	536
<i>Stem cells</i>	537
<i>Therapeutic cloning</i>	538
<i>The ANT technique</i>	539
Summary	540

## **Chapter 12**

### **Bioethics and Sterilization**

Historical Notes and Various Forms of Sterilization	549
Contraceptive Sterilization in the World	551
The Situation in Italy	553
The Techniques	555
Moral Assessment	558
The Inviolability of the Person and of His Physical Integrity	560
The Unitotality of the Human Being	563
The Principles of Optionality and Totality	564
The Request for Voluntary Sterilization as a Symptom	565
Corollaries and Specific Cases of Particular Gravity	567
<i>The extreme case</i>	567
<i>The mentally ill woman and the case of intra- or extramarital violence</i>	569
Sterilization and the Law	573
Voluntary Sterilization and Libertarian Neo-Natural Law Theory	575
Summary	577

## **Chapter 13**

### **Bioethics and Human Experimentation**

Clinical Drug Trials	581
<i>Experimentation is necessary</i>	581
<i>The technical meaning of pharmacological experimentation</i>	583
<i>History, practice, and legislation</i>	588
Experiments on oneself	588
Experiments on volunteer subjects	588
Experiments on those sentenced to death	588
Experiments on prisoners in the Nazi concentration camps	588
The Nuremberg Code	589
The Declaration of Helsinki	589
<i>International Ethical Guidelines for Biomedical Research Involving Human Subjects</i>	590
European directives	590
Decrees and circulars of the Ministry of Health	594
<i>Ethics of human experimentation</i>	596
The fundamental ethical values	596
Practical ethical guidelines regarding human experimentation	601
<i>Ethical assessment and specific cases</i>	605
Experimentation on healthy volunteers	607
Experimentation on oneself	607
Experimentation on detainees	607
Experimentation on children and minors	608
Experimentation by means of randomized clinical trials	609
Experimentation on Human Fetuses and Embryos	610
<i>The novelty of the issue</i>	610
<i>Therapeutic intrauterine interventions</i>	612
<i>Interventions for purely scientific research</i>	613
<i>Experiments on aborted human fetuses</i>	615
<i>The extraction of fetal tissues for the purpose of transplantation</i>	617
"Proposal of an Ethical Commitment for Researchers in the Biomedical Field"	618
Summary	621

## **Chapter 14**

### **Bioethics and Organ Transplants**

Scientific and Technological Advances	627
Terminology and Historical-Descriptive Notes	629
Liver Transplants from Living Donors	631
"Non-life-saving" Transplants of Visible Parts	632
"Crossover" Transplants	632

Legislative Prospects and International Cooperation	635
The Italian Legal Situation	636
The Ethical Aspect of the Problem: General Principles	639
<i>Defending the lives of the donor and the recipient</i>	639
<i>Protecting the personal identity of the recipient     and the recipient's descendents</i>	641
<i>Informed consent</i>	642
<i>The problem of determination of death in transplants     from a cadaver</i>	644
The Current Debate on Brain Death	646
The Case of Heterologous Transplant	649
Tissue Grafts	651
The Anencephalic Newborn as Organ Donor	655
Summary	658

## Chapter 15

### Bioethics, Euthanasia, and Death with Dignity

Definition of Terms and History of the Problem	663
The Present Cultural Context	667
<i>The secularization of thought and life</i>	668
<i>Rationalistic and humanitarian scientism</i>	671
<i>The imbalance in medicine between technology     and humanization</i>	673
The Teaching of the Church's Magisterium	674
Summary of Moral Teaching on Euthanasia	679
<i>The rejection of euthanasia properly speaking</i>	679
<i>The proportionate use of therapeutic means</i>	683
<i>The administration of normal care and palliative care</i>	686
<i>The refusal of therapeutic obstinacy and dysthanasia</i>	688
<i>The use of analgesics</i>	692
<i>Telling the truth to a terminally ill patient</i>	692
Review of Some Deontological and Legal Documents	694
<i>Recommendation of the Council of Europe</i>	694
<i>Advance directives</i>	696
<i>Principles of European Medical Ethics</i>	698
<i>A proposed resolution in the European Parliament</i>	700
<i>Initiatives for the legalization of euthanasia</i>	701
<i>The bill proposed by the Health and Hygiene Committee     of the Italian Senate</i>	703
<i>The Italian Code of Medical Ethics of 2006</i>	704
The Present Legislative Situation Worldwide	705
Pediatric Euthanasia: The Gröningen Protocol	706
Euthanasia as a Legal Problem	708
Euthanasia and Suicide	709
Summary	711

## Chapter 16

### Bioethics and Technology

The Insatiability of History	717
Technological and Scientific Progress, Anthropology, and Ethics	720
Computer Science and Anthropology	722
<i>Reassuring consequences of computer science     at the anthropological and cultural level</i>	722
<i>Problematic aspects of the emergence of computer science</i>	723
Ethical Requirements vis-à-vis the Computer Science Culture	724
Some Specific Ethical Frontiers of Applied Technology	725
<i>Genetic modification</i>	725
<i>The use of atomic energy</i>	726
<i>Environmental pollution</i>	729
Technology as the Sole Horizon Transforms Man into an Automaton	730
Summary	735
Bibliography	741
Names Index	829
Subject Index	833
