	Preface to the Second Edition	vii
	Preface to the First Edition	ix
	List of Tables	xiv
	List of Figures	xv
	List of Examples	xvii
	Table of Notation	xxv
1	Preparations	1
1	The Problem	1
2	Measure Theory and Integration	7
3	Probability Theory	13
4	Group Families	16
5	Exponential Families	23
6	Sufficient Statistics	32
7	Convex Loss Functions	45
8	Convergence in Probability and in Law	54
9	Problems	62
10	Notes	78
2	Unbiasedness	83
1	UMVU Estimators	83
2	Continuous One- and Two-Sample Problems	91
3	Discrete Distributions	100
4	Nonparametric Families	109
5	The Information Inequality	113
6	The Multiparameter Case and Other Extensions	124
7	Problems	129
8	Notes	143

3	Equivariance	147
1	First Examples	147
2	The Principle of Equivariance	158
3	Location-Scale Families	167
4	Normal Linear Models	176
5	Random and Mixed Effects Models	187
6	Exponential Linear Models	193
7	Finite Population Models	198
8	Problems	207
9	Notes	223
4	Average Risk Optimality	225
1	Introduction	225
2	First Examples	233
3	Single-Prior Bayes	239
4	Equivariant Bayes	245
5	Hierarchical Bayes	253
6	Empirical Bayes	262
7	Risk Comparisons	272
8	Problems	282
9	Notes	305
5	Minimaxity and Admissibility	309
1	Minimax Estimation	309
2	Admissibility and Minimaxity in Exponential Families	322
3	Admissibility and Minimaxity in Group Families	338
4	Simultaneous Estimation	346
5	Shrinkage Estimators in the Normal Case	354
6	Extensions	366
7	Admissibility and Complete Classes	376
8	Problems	389
9	Notes	420
6	Asymptotic Optimality	429
1	Performance Evaluations in Large Samples	429
2	Asymptotic Efficiency	437
3	Efficient Likelihood Estimation	443
4	Likelihood Estimation: Multiple Roots	451
5	The Multiparameter Case	461
6	Applications	468
7	Extensions	475
8	Asymptotic Efficiency of Bayes Estimators	487
9	Problems	496
10	Notes	515
	References	521

Author Index	565
Subject Index	574

List of Contents

18	1.4.1 Location-Scale Families
25	1.5.1 Some One- and Two-Parameter Exponential Families
42	1.8.1 Illustration of the Relationship of the Gamma and Weibull Distributions
107	2.3.1 $k \times k$ Contingency Table Estimation
118	2.5.1 Risk of James-Stein Estimator
119	2.5.2 Maximum Component Risk
127	2.6.1 Three Information Matrices
134	2.6.2 Risk of a Superior Estimator
162	4.6.1 Bayes and Empirical Bayes Risk
167	4.6.2 Hierarchical and Empirical Bayes Estimators
179	4.7.1 Poisson Bayes and Empirical Bayes Risk
364	5.2.1 Maximum Component Risk
367	5.2.2 Expected Value of the Shrinkage Factor
372	5.6.1 Minimax Robust Bayes Estimator
