	Preface	<i>xiii</i>
1	Introduction to Lipidomics	1
	<i>Harald C. Köfeler, Kim Ekroos, and Michal Holčapek</i>	
1.1	Preface	1
1.2	Historical Perspective	2
1.3	Sampling and Preanalytics	4
1.4	Reference Materials and Biological Reference Ranges	4
1.5	Clinical Lipidomics	7
1.6	Identification and Annotation	8
1.7	Quantitation	9
1.8	Lipid Ontology	10
	References	11
	Part I Analytical Methodologies in Lipidomics	13
2	Preanalytics for Lipidomics Analysis	15
	<i>Gonçalo Vale and Jeffrey G. McDonald</i>	
2.1	Safety	15
2.2	Introduction	15
2.3	Sample Origin	16
2.4	Sample Collection	17
2.5	Tissue Homogenization	19
2.5.1	Mortar and Pestle	20
2.5.2	Rotor–Stator	21
2.5.3	Blender	21
2.5.4	Potter–Elvehjem	22
2.5.5	Bead Mill	22
2.6	Liquid–Liquid Extraction (LLE)	22
2.6.1	Folch Method	24
2.6.2	Bligh and Dyer (BD) Method	27
2.6.3	Modified Folch and Bligh/Dyer (BD) Methods	27

2.6.4	Rose and Oaklander (RO) Method	28
2.6.5	Matyash or Methyl- <i>tert</i> -Butyl Ether (mTBE) Method	28
2.6.6	BUME Method	28
2.6.7	Alshehry Method	29
2.6.8	Three-Phase Lipid Extraction (3PLE)	29
2.7	Resuspension and Solubilization	30
2.8	Automation	31
2.9	Tips and Tricks	34
	References	38
3	Direct Infusion (Shotgun) Electrospray Mass Spectrometry	41
	<i>Marcus Höring and Gerhard Liebisch</i>	
3.1	Introduction	41
3.2	Complexity of Crude Lipid Extracts	42
3.2.1	Main Lipid Classes in Mammalian Samples	42
3.2.2	Bond Types as Structural Features	43
3.2.3	Fatty Acids as the Major Building Blocks	44
3.2.4	Lipid Species and Double-Bond Series	45
3.3	Introduction to Mass Spectrometry of Lipids	46
3.3.1	Annotation of Lipid Structures Analyzed by MS	46
3.3.2	Isomers	48
3.3.3	Isobars and the Type-II Isotopic Overlap	49
3.4	Overview of Direct Infusion MS Workflows	50
3.5	Sample Preparation	50
3.5.1	Preanalytics – Sample Stability	50
3.5.2	Lipid Extraction	54
3.5.3	Solvents, Additives, and Lipid Concentration	54
3.5.4	Sample Derivatization	55
3.6	Direct Infusion	55
3.7	Mass Spectrometry Analysis	56
3.7.1	Electrospray Ionization of Lipids	56
3.7.2	Tandem Mass Spectrometry	57
3.7.3	Multidimensional MS Shotgun Lipidomics	61
3.7.4	High-Resolution Mass Spectrometry	61
3.8	Lipid Identification	65
3.8.1	Identification by MS/MS	65
3.8.2	Identification by HRMS	65
3.8.3	Consideration of Type-II Overlap	67
3.8.4	Identification Hierarchy	67
3.8.5	Caveats/Pitfalls	69
3.9	Lipid Quantification	70
3.9.1	Internal Standards	70
3.9.2	Type-I Isotopic Effect	71
3.9.3	Evaluation and Correction of Isotopic Overlap	71
3.9.4	Species Response	73

3.9.5	Calculation of Concentration	76
3.10	Data Analysis/Software	78
3.11	Limitations	79
3.12	Selected Applications	79
3.12.1	Analysis of Plasma	79
3.12.2	Analysis of Tissues and Cells	80
3.12.3	Analysis of Lipid Metabolism	80
3.13	Outlook	81
	References	82
4	Liquid Chromatography – and Supercritical Fluid Chromatography – Mass Spectrometry	91
	<i>Michal Holčapek, Ondřej Peterka, Michaela Chocholoušková, and Denise Wolrab</i>	
4.1	Introduction	91
4.2	Lipid Class Separation	93
4.2.1	Normal-Phase Liquid Chromatography	94
4.2.2	Hydrophilic Interaction Liquid Chromatography	95
4.2.3	Supercritical Fluid Chromatography	97
4.3	Lipid Species Separation	99
4.3.1	Reversed-Phase Liquid Chromatography	99
4.3.2	Nonaqueous Reversed-Phase Liquid Chromatography	102
4.4	Other Separation Approaches	103
4.4.1	Silver Ion Chromatography	103
4.4.2	Chiral Chromatography	105
4.4.3	Multidimensional Approaches	106
	References	108
5	Mass Spectrometry Imaging of Lipids	117
	<i>Shane R. Ellis and Jens Soltwisch</i>	
5.1	Introduction	117
5.2	Sample Preparation for Mass Spectrometry Imaging of Lipids	118
5.2.1	Tissue Samples	118
5.2.2	Sectioning and Mounting	119
5.2.3	Cell Culture	119
5.2.4	Pre-processing	119
5.2.5	Handling and Storage	120
5.2.6	Formalin-Fixed Paraffin-Embedded Tissue	120
5.3	Desorption/Ionization Techniques used for MSI of Lipids	120
5.3.1	Matrix-Assisted Laser Desorption/Ionization (MALDI)	120
5.3.2	Secondary Ion Mass Spectrometry SIMS	124
5.3.3	MSI Methods Using Electrospray Ionization	125
5.3.3.1	Desorption Electrospray Ionization	125
5.3.3.2	Laser Ablation Electrospray Ionization and IR-Matrix-Assisted Laser Desorption-Electrospray Ionization	127

5.3.3.3	Nanospray Desorption Electrospray Ionization	128
5.4	Combining Ion Mobility of Lipids with MSI	128
5.5	On Tissue Chemical Derivatization for MSI	129
5.6	Quantification in MSI	130
5.7	Lipid Identification for MSI	132
5.7.1	Types of Ions Generated by MSI	132
5.7.2	In-source Fragmentation Considerations	133
5.7.3	MSI Lipid Identification Using Accurate Mass	133
5.7.4	Deploying MS/MS for Lipid Identification in MSI	135
5.7.5	Isomer-Resolved MSI	135
5.8	Conclusions	137
	References	137
6	Ion Mobility Spectrometry	151
	<i>Kaylie I. Kirkwood, Melanie T. Odenkirk, and Erin S. Baker</i>	
6.1	Ion Mobility Spectrometry	151
6.1.1	Introduction	151
6.1.2	Ion Mobility Spectrometry Techniques and Platforms	154
6.1.2.1	Drift Tube Ion Mobility Spectrometry (DTIMS)	154
6.1.2.2	Traveling-Wave Ion Mobility Spectrometry (TWIMS)	156
6.1.2.3	Trapped Ion Mobility Spectrometry (TIMS)	157
6.1.2.4	Field Asymmetric Ion Mobility Spectrometry (FAIMS)	158
6.1.3	Ion Mobility Resolving Power (R_p) Advancements	159
6.1.3.1	Cyclic IMS (cIM)	159
6.1.3.2	Standard Lossless Ion Manipulation (SLIM)	160
6.1.3.3	Tandem IMS	161
6.1.3.4	IMS Data Deconvolution Software Strategies	161
6.1.3.5	Drift Gas Dopants and Modifiers	163
6.1.4	Benefits of IMS for Lipidomics	164
6.1.4.1	Chemical Space Separation with IMS	165
6.1.4.2	Lipid Identification and Characterization with CCS	166
6.1.4.3	CCS for Lipid Structural Analysis	168
6.1.5	Lipidomic Applications with IMS	168
6.1.5.1	IMS in Imaging and Shotgun Lipidomics	168
6.1.5.2	IMS-MS/MS and Novel Speciation Approaches	169
6.1.6	Conclusions and Outlook of IMS for Lipidomics	172
	References	173
7	Structural Characterization of Lipids Using Advanced Mass Spectrometry Approaches	183
	<i>Josef Cvačka, Vladimír Vrkoslav, and Štěpán Strnad</i>	183
7.1	Introduction	183
7.2	Structure and Position of Aliphatic Chains in Lipids	185
7.2.1	Double and Triple Bonds	185
7.2.1.1	Charge-Switch Derivatization of Fatty Acids	186

7.2.1.2	Ozone-Induced Dissociation	187
7.2.1.3	Paternò–Büchi Reaction	192
7.2.1.4	Epoxidation of Double Bonds	194
7.2.1.5	Acetonitrile-Related Adducts in APCI	195
7.2.1.6	Photodissociation of Unsaturated Lipids	199
7.2.1.7	Electron-Induced Dissociation of Unsaturated Lipids	202
7.2.2	Methyl Branching of Aliphatic Chains	204
7.2.3	Oxygen-Containing Functional Groups and Carbocyclic Structures	205
7.2.4	Stereospecific Position of Acyl Chain on Glycerol	207
7.3	Conclusions and Outlook	210
	References	211
8	Lipidomic Identification	227
	<i>Harald Köfeler</i>	
8.1	Overview	227
8.2	Chromatography	228
8.3	Mass Spectrometry	230
8.3.1	Exact Mass	230
8.3.2	Fragment Spectra	232
8.3.2.1	General Considerations	232
8.3.2.2	Fatty Acids	233
8.3.2.3	Oxylipins	233
8.3.2.4	Phospholipids	234
8.3.2.5	Sphingolipids	237
8.3.2.6	Glycerolipids	242
8.3.2.7	Sterols	242
8.3.3	Deep Structure Determination	242
8.4	Ion Mobility Spectrometry	243
8.5	Identification Workflows	244
	References	249
9	Lipidomics Quantitation	255
	<i>Michaela Chocholoušková, Denise Wolrab, Ondřej Peterka, Robert Jirásko, and Michal Holčapek</i>	
9.1	Introduction to Lipidomics Quantitation	255
9.2	Principle of Quantitation	256
9.3	Internal Standards	257
9.4	Isotopic Correction	261
9.4.1	Isotopic Correction Type I	261
9.4.2	Isotopic Correction Type II	262
9.5	Common Approaches for Lipidomics Quantitation	263
9.5.1	Shotgun MS	263
9.5.2	Chromatography – MS	264
9.6	Validation	265
9.7	Quality Control (QC)	268
