People on the move

IWP&DC reports on recent appointments in the industry

Construction

12

ROV or diver - which should you use?

Discussing the merits of using divers and ROVs.

16

Expanding reservoirs to provide water security for communities

Details on the Gross Reservoir Expansion Project in the US

Hydropower trends

24

Commission aims to accelerate approvals

New Planning for Climate Commission launched with backing from the sustainable hydropower sector and other global renewables

26

Addressing the impending workforce shortage

The US hydropower industry is pulling out all the stops to address an impending shortage of workers, as increasing numbers are set to reach retirement age

28

High hopes for hydro

Hydropower needs to be recognised as a reliable backbone of future clean power systems. It should be put back on the global energy and climate policy agenda and supported accordingly.

Pumped storage

32

Picking up the pace

Pumped storage is making its way towards the top of the energy policy agenda around the world. *IWP&DC* gives a roundup of the latest developments in this sector that is growing in prominence as the energy industry evolves

Australasia

36

Development down under

As parts of Australia face even more flooding, refurbishment work and pumped storage schemes gain momentum throughout the industry.

Lessons learned

40

Looking to the future

As its work drew to a close earlier this year, members of the FutureDAMS research team reflected on the lessons they have learned about the water-energy-food-environment nexus since the project first swung into action in 2018

2022 spotlight

44

Headliners in hydro

IWP&DC looks at the projects and developments that have hit the headlines in the hydro industry throughout 2022
