| PREFACE..... | ix |
| CHAPTER 1 Of Cockroaches and Wolves: Framing Animal Behavior | 1 |
| 1.1 Introduction: Animal Behavior | 2 |
| 1.2 Wolves: Lessons in Social Behavior | 6 |
| 1.3 Cockroaches: Models for Animal Behavior | 9 |
| 1.4 The Four Questions Revisited | 11 |
| 1.5 Evolution: A Review..... | 14 |
| 1.6 The Study of Animal Behavior: Where Did it Come From? | 20 |
| 1.7 <i>Umwelt</i> : The World in Which Animals Behave | 25 |
| Summary | 26 |
| Study Questions | 26 |
| CHAPTER 2 Neurobiology and Endocrinology for Animal Behaviorists | 29 |
| 2.1 Neurobiology, Endocrinology, and Sensory Systems: An Overview | 30 |
| 2.2 What Does an Animal Behaviorist Need to Know About Neurobiology? | 31 |
| 2.3 What Does an Animal Behaviorist Need to Know About Endocrinology?..... | 42 |
| 2.4 What Does an Animal Behaviorist Need to Know About Sensory Systems? | 56 |
| Summary | 70 |
| Study Questions | 71 |
| CHAPTER 3 Behavioral Genetics | 73 |
| 3.1 Introduction: Principles of Behavioral Genetics..... | 74 |
| 3.2 The Nature Versus Nurture Debate | 79 |
| 3.3 Domestication..... | 82 |
| 3.4 Phylogeny..... | 82 |
| 3.5 Classical and Mendelian Genetics | 86 |
| 3.6 Quantitative and Biometrical Genetics | 92 |
| 3.7 Evolutionary and Population Genetics..... | 102 |
| 3.8 Molecular Genetics | 104 |
| Summary | 107 |
| Study Questions | 108 |
| CHAPTER 4 Homeostasis and Time Budgets | 111 |
| 4.1 Introduction | 112 |
| 4.2 Drive Theory and Homeostasis | 115 |
| 4.3 Behavioral Syndromes, Personality, Emotion, and Mood | 124 |
| 4.4 Biological Clocks and Circadian Rhythms..... | 130 |
| 4.5 Modern Concepts of Homeostatic Regulation | 134 |
| 4.6 Time Budgets and Trade-Offs: Balancing Demands in How Animals Budget Their Time | 141 |
| Summary | 145 |
| Study Questions | 146 |
| CHAPTER 5 Learning | 151 |
| 5.1 Introduction | 152 |
| 5.2 Learning and Memory | 153 |
| 5.3 Basic Models for Learning..... | 159 |

| | | |
|------------------|---|------------|
| 5.4 | Social Learning: Traditions and “Cultural” Transmission of Information in Animals | 170 |
| 5.5 | Play, Learning, and Development..... | 173 |
| | Summary | 176 |
| | Study Questions | 177 |
| CHAPTER 6 | Cognition | 181 |
| 6.1 | Introduction: What Is Cognition? | 182 |
| 6.2 | The Concept of Self | 192 |
| 6.3 | Thought, Foresight, and Problem Solving..... | 197 |
| 6.4 | Decision-Making and Probabilities..... | 206 |
| 6.5 | Intelligence and Social Cognition | 206 |
| 6.6 | The Frontal Lobe and Impulse Control | 209 |
| 6.7 | Animal Emotions | 209 |
| 6.8 | Are Cognitive Abilities Under- or Over-Attributed to Animals? | 211 |
| | Summary | 213 |
| | Study Questions | 214 |
| CHAPTER 7 | Communication | 219 |
| 7.1 | Introduction: Communication Theory | 220 |
| 7.2 | Evolution of Communication | 224 |
| 7.3 | Modes of Communication | 226 |
| 7.4 | Multimodal Signaling and Encoding Complex Messages | 247 |
| 7.5 | Runaway Sexual Selection and Signaling | 250 |
| 7.6 | Deceit Versus Honest Signaling | 251 |
| 7.7 | Game Theory and Communication..... | 254 |
| 7.8 | Interspecific Signaling..... | 256 |
| | Summary | 257 |
| | Study Questions | 258 |
| CHAPTER 8 | Movement..... | 263 |
| 8.1 | Introduction | 264 |
| 8.2 | Sources of Navigational Information..... | 269 |
| 8.3 | Sensing the Environment in Time and Space | 271 |
| 8.4 | How to Respond to Sensory Information: A Toolbox for Finding the Way | 275 |
| 8.5 | Search..... | 283 |
| 8.6 | Homing..... | 284 |
| 8.7 | Migration | 287 |
| 8.8 | Dispersal..... | 299 |
| | Summary | 302 |
| | Study Questions | 303 |
| CHAPTER 9 | Foraging..... | 309 |
| 9.1 | Introduction | 310 |
| 9.2 | Diet Choice and Food Selection | 311 |
| 9.3 | How Animals Get Food | 313 |
| 9.4 | Willing Food | 323 |
| 9.5 | Manipulation of Prey | 323 |
| 9.6 | Parasitic Life Cycles..... | 324 |
| 9.7 | Foraging and Optimality Theory | 328 |
| 9.8 | Optimal Patch Choice..... | 330 |
| 9.9 | Optimal Prey Choice..... | 334 |

| | | |
|-------------------|--|------------|
| 9.10 | Nutritional Constraints | 336 |
| | Summary | 337 |
| | Study Questions | 338 |
| CHAPTER 10 | Self-Defense | 343 |
| 10.1 | Introduction | 344 |
| 10.2 | Cryptic Behavior: Camouflage | 346 |
| 10.3 | Vigilance and Alarm | 355 |
| 10.4 | Mimicry and Diversion..... | 357 |
| 10.5 | Evasion | 361 |
| 10.6 | Predator Deterrence and Fighting Back..... | 363 |
| 10.7 | Pathogen Avoidance/Deterrence and Sickness Behavior..... | 366 |
| | Summary | 370 |
| | Study Questions | 371 |
| CHAPTER 11 | Mating Systems | 377 |
| 11.1 | Introduction | 378 |
| 11.2 | Evolution of Sex: Why Some Animals Are Called Male and Others Female | 380 |
| 11.3 | Sexual Selection | 385 |
| 11.4 | Variance in Mating Success..... | 389 |
| 11.5 | Mate Choice | 390 |
| 11.6 | Mating Systems: How Many Males, How Many Females? | 392 |
| 11.7 | Hormones and Sexual Behavior | 401 |
| 11.8 | Hormones, Territoriality, and Aggression | 402 |
| 11.9 | Sperm Competition..... | 403 |
| 11.10 | Good Genes Models for Choosing a Mate | 405 |
| 11.11 | Forced Copulations..... | 408 |
| | Summary | 409 |
| | Study Questions | 410 |
| CHAPTER 12 | Nesting, Parenting, and Territoriality | 415 |
| 12.1 | Introduction | 416 |
| 12.2 | Nests and Nesting..... | 418 |
| 12.3 | Parental Investment..... | 422 |
| 12.4 | Patterns of Parental Care | 426 |
| 12.5 | Hormones and Parental Behavior | 432 |
| 12.6 | Parenting and Conflicts of Interest | 433 |
| 12.7 | Begging and Weaning Conflict..... | 434 |
| 12.8 | Sibling Conflict | 436 |
| 12.9 | Infanticide | 438 |
| 12.10 | Aggression and Territoriality..... | 439 |
| | Summary | 445 |
| | Study Questions | 445 |
| CHAPTER 13 | Social Behavior, Cooperation, and Kinship | 449 |
| 13.1 | Introduction | 450 |
| 13.2 | Altruism or Selfish Interests? | 454 |
| 13.3 | Schools, Flocks, Hordes, and Herds | 456 |
| 13.4 | Social Network Analysis | 464 |
| 13.5 | Explaining Cooperation..... | 465 |
| 13.6 | Extreme Cooperation: Eusociality | 472 |
| 13.7 | Lack of Ecological Choice in Aid-Giving Decisions | 477 |

Contents

| | | |
|--|---|-----|
| 13.8 | Social Recognition, Kin Recognition, and Cooperation with Close Relatives | 477 |
| 13.9 | Social Symbioses | 481 |
| | Summary | 483 |
| | Study Questions | 484 |
| CHAPTER 14 Comparative Social Behavior 489 | | |
| 14.1 | Introduction | 490 |
| 14.2 | Vertebrate Social Systems | 492 |
| 14.3 | Invertebrate Eusociality: Workers and the Division of Labor..... | 501 |
| 14.4 | Invertebrate Eusociality: Queens and Reproduction | 509 |
| 14.5 | Eusociality: Colony Defense..... | 514 |
| 14.6 | Eusocial Invertebrates | 515 |
| | Summary | 526 |
| | Study Questions | 526 |
| CHAPTER 15 Conservation and Behavior 531 | | |
| 15.1 | Introduction: Conservation and the Future of Animal Behavior | 532 |
| 15.2 | Species Protection in Natural Habitats | 535 |
| 15.3 | Extinctions and Behavior | 541 |
| 15.4 | Reserve Design..... | 548 |
| 15.5 | Captive Breeding Programs and Reintroductions | 557 |
| 15.6 | Human–Wildlife Interface in the Suburbs | 563 |
| | Summary: The Future and Conservation Behavior | 568 |
| | Study Questions | 569 |
| INDEX..... 575 | | |
