

Table of contents

Preface.....	4
Greetings.....	6
Colourful queens of the plant kingdom.....	8
Enchanting orchids.....	10
Orchids – an evolutionary success story.....	12
The blueprint of beauty.....	14
Every orchid's ornament: the flower.....	16
The guile and wile of reproduction – Trick or treat in the orchid world.....	18
Small seeds with high hopes.....	24
Pale vampires of the plant kingdom.....	28
Protection of orchids.....	30
Orchid determination can be difficult.....	32
Orchids in Europe.....	33
Secondary habitats – protection of nature in quarries and gravel pits.....	34
Zero hour as an opportunity.....	36
Always something happening: dynamics in mineral extraction sites.....	38
Grasslands full of life.....	44
Gravel pits as surrogates for floodplains and diverse cultural landscapes.....	46
Soil-site conditions and plant occurrence.....	56
Orchids species in quarries & gravel pits.....	62
Orchid habitats.....	64
Warm forests and edges of woodlands.....	64
Sparsely-stocked forests.....	66
Wet meadows.....	70
Dry semi-natural grasslands.....	72
Moonscapes to orchid habitats: Guidelines for managers of mineral extraction sites.....	78
Responsible use of resources.....	80
In case of emergency: save what can be saved.....	82
The poorer the better.....	84
Near-natural forests instead of commercially managed forests.....	86
Preserving the exceptional.....	87
Invasive plants – they came, they established, they conquered.....	88
Grazing for nature conservation.....	92
Literature.....	94
