

Contents

SECTION 1 Basics of Probability

- | | | |
|---|--|----|
| 1 | Introduction to Probability | 3 |
| 2 | Joint, Marginal, and Conditional Probability | 11 |

SECTION 2 Bayes' Theorem and Bayesian Inference

- | | | |
|---|--|----|
| 3 | Bayes' Theorem | 29 |
| 4 | Bayesian Inference | 37 |
| 5 | The Author Problem: Bayesian Inference with Two Hypotheses | 48 |
| 6 | The Birthday Problem: Bayesian Inference with Multiple Discrete Hypotheses | 61 |
| 7 | The Portrait Problem: Bayesian Inference with Joint Likelihood | 73 |

SECTION 3 Probability Functions

- | | | |
|---|-------------------------------|-----|
| 8 | Probability Mass Functions | 87 |
| 9 | Probability Density Functions | 108 |

SECTION 4 Bayesian Conjugates

- | | | |
|----|---|-----|
| 10 | The White House Problem: The Beta-Binomial Conjugate | 133 |
| 11 | The Shark Attack Problem: The Gamma-Poisson Conjugate | 150 |
| 12 | The Maple Syrup Problem: The Normal-Normal Conjugate | 172 |

SECTION 5 Markov Chain Monte Carlo

- | | | |
|----|--|-----|
| 13 | The Shark Attack Problem Revisited: MCMC with the Metropolis Algorithm | 193 |
| 14 | MCMC Diagnostic Approaches | 212 |
| 15 | The White House Problem Revisited: MCMC with the Metropolis–Hastings Algorithm | 224 |
| 16 | The Maple Syrup Problem Revisited: MCMC with Gibbs Sampling | 247 |

SECTION 6 Applications

17	The Survivor Problem: Simple Linear Regression with MCMC	269
18	The Survivor Problem Continued: Introduction to Bayesian Model Selection	308
19	The Lorax Problem: Introduction to Bayesian Networks	325
20	The Once-ler Problem: Introduction to Decision Trees	353

Appendices

A.1	The Beta-Binomial Conjugate Solution	369
A.2	The Gamma-Poisson Conjugate Solution	373
A.3	The Normal-Normal Conjugate Solution	379
A.4	Conjugate Solutions for Simple Linear Regression	385
A.5	The Standardization of Regression Data	395
	<i>Bibliography</i>	399
	<i>Hyperlinks</i>	403
	<i>Name Index</i>	413
	<i>Subject Index</i>	414
