
Contents

Preface.....	xi
The Author.....	xiii
Chapter 1 Introduction to Surfaces and Colloids.....	1
1.1 Introduction	1
1.2 Solid Phase–Liquid Phase–Gas Phase	1
Chapter 2 Capillarity and Surface Forces (Liquids).....	9
2.1 Introduction	9
2.2 Surface Forces (in Liquids)	10
2.2.1 Surface Energy	11
2.3 Laplace Equation (Liquid Curvature and Pressure).....	13
2.3.1 The Important Role of Laplace Equation in Various Applications	16
2.4 Capillary Rise (or Fall) of Liquids	18
2.5 Bubble Formation	20
2.6 Measurement of Surface Tension of Liquids.....	23
2.6.1 Liquid Drop Weight and Shape Method.....	23
2.6.2 The Ring Method	26
2.6.3 Wilhelmy Slide (or Plate) Method.....	27
2.7 Surface Tension of Liquids.....	29
2.7.1 Effect of Temperature and Pressure on Surface Tension of Liquids	29
2.7.2 Different Aspects of Liquid Surfaces.....	33
2.7.2.1 Heat of Surface Formation and Evaporation	33
2.7.2.2 Other Surface Properties of Liquids	36
2.7.2.3 Interfacial Tension of Liquid ₁ –Liquid ₂	36
2.7.2.4 Measurement of Interfacial Tension (between Two Immiscible Liquids)	37
2.8 Applications.....	38
Chapter 3 Surfactants (Soaps and Detergents) and Physicochemical Properties	39
3.1 Introduction	39
3.2 Surface Tension of Aqueous Solutions	41
3.2.1 Surface-Active Substances (<i>Amphiphiles</i>)	43
3.2.1.1 Aqueous Solution of Surfactants	45
3.2.1.2 Micelle Formation (in Aqueous Media)	48

3.3	Gibbs Adsorption Equation in Solutions	53
3.3.1	GIBBS Adsorption Theory at Liquid Interfaces	53
3.3.2	Kinetic Aspects of Surface Tension of Detergent Aqueous Solutions	62
3.3.3	Solubilization (of Organic-Water-Insoluble Molecules) in Micelles	63
3.3.4	Bile Salt Micelles	66
3.4	Applications	67
3.4.1	Cleaning and Detergency	67
Chapter 4	Spread Lipid Films on Liquid Surfaces (Langmuir–Blodgett Films).....	69
4.1	Introduction	69
4.1.1	Surface Film Balance	71
4.2	Monolayer Isotherms on Water Surfaces.....	72
4.3	Self-Assembly Monolayer (SAM) Formation.....	72
4.3.1	States of Monolayers Spread on Water Surface	72
4.3.1.1	Self-Assembly Monolayers (SAMs).....	73
4.3.1.2	Reaction in Monolayers at Liquid Surfaces	79
4.3.1.3	Fluorescence Studies of Monolayer Films	80
4.3.2	Other Changes at Water Surfaces due to Monolayers	80
4.3.2.1	Surface Viscosity (η_s).....	80
4.3.2.2	Surface Potential (ΔV) of Lipid Monolayers.....	82
4.3.3	Charged Lipid monolayers	82
4.3.3.1	Transport of Ions in Biological Cell Membranes	87
4.4	Effect of Lipid Monolayers on Evaporation Rates of Liquids.....	87
4.4.1	Mixed Monolayers of Lipids	88
4.5	Monolayers of Macromolecules at the Water Surface.....	89
4.6	Langmuir–Blodgett (LB) Films (Transfer of Lipid Monolayers on Solids)	89
4.6.1	Structure and Orientation of Organized Monolayer Assemblies	92
4.6.2	Optical and Related Methods of Absorption.....	93
4.6.3	LB-Deposited Film Structure.....	94
4.6.3.1	Molecular Orientation in Mixed-Dye Monolayers on Polymer Surfaces	95
4.6.4	Physical Properties of LB Films	99
4.6.5	Application of LB Films in Industry.....	100
4.6.6	Bilipid Membranes (BLMs)	101

4.7	Vesicles and Liposomes.....	101
4.7.1	Applications in Drug Delivery	104
4.8	Applications.....	104
4.8.1	Diagnostics (Immobilized Enzymes on Solid Surfaces).....	104
Chapter 5	Solid Surfaces—Adsorption.....	105
5.1	Introduction	105
5.2	Solid Surface Tension (Wetting Properties of Solid Surfaces)	106
5.2.1	Solid Surface Tension (γ_{solid}).....	110
5.3	Contact Angle (θ) of Liquids on Solid Surfaces.....	110
5.4	Measurements of Contact Angles.....	111
5.5	Adsorption of Gas on a Solid Surface	114
5.5.1	Gas Adsorption Measurement Methods.....	115
5.5.1.1	Volumetric Change Methods	115
5.5.1.2	Gravimetric Gas Adsorption Methods	117
5.5.1.3	Langmuir Gas Adsorption	117
5.5.1.4	Various Gas Adsorption Equations	118
5.5.1.5	Multilayer Gas Adsorption	119
5.6	Adsorption from Solution on Solid Surfaces.....	120
5.6.1	Thermodynamics of Adsorption	120
5.6.1.1	Adsorption of Acetic Acid onto Activated Charcoal	121
5.6.2	Solid Surface Area Determination.....	122
5.6.2.1	Experimental Method	123
5.6.2.2	Adsorption in Binary Liquid Systems	124
5.6.3	Heats of Adsorption (Different Substances) on Solid Surfaces.....	124
5.6.3.1	Solid Surface Roughness (Degree of Roughness).....	125
5.6.3.2	Friction (between Solid1–Solid2)	126
5.7	Surface Tension of Solid Polymers.....	126
5.8	Applications.....	127
5.8.1	Flotation of Solid Particles to Liquid Surface.....	127
5.8.2	Polishing of Solid Surfaces	128
5.8.3	Powders (Surface Technology).....	128
5.8.4	Coal Slurry	130
5.8.5	Earthquakes and Faults (Solid Surfaces).....	130
Chapter 6	Wetting, Adsorption, and Cleaning Processes	131
6.1	Introduction	131
6.2	Oil Recovery and Surface Forces.....	131
6.2.1	Oil Spills and Cleanup Processes in Oceans.....	133

6.3	Applications in Cleaning Processes (Surface and Colloidal Aspects)	135
6.3.1	Detergency.....	135
6.3.2	Water Repellency of Materials.....	136
6.4	Evaporation Rates of Liquid Drops	137
6.5	Adhesion (Glues) (Solid1–Solid2)	137
Chapter 7	Colloidal Systems.....	141
7.1	Introduction	141
7.1.1	Van der Waals Forces.....	142
7.1.2	Colloids Stability (DLVO Theory)	143
7.2	Attractive Forces–Repulsive Forces.....	144
7.2.1	Charged Colloids (Electrical Charge Distribution at Interfaces)	146
7.2.2	Electrokinetic Processes.....	149
7.2.3	Stability of Lyophobic Suspensions	150
7.3	Kinetics of Coagulation of Colloids	153
7.3.1	Flocculation and Coagulation of Colloidal Suspension.....	154
7.4	Dispersions of Solid Particles in Fluids.....	154
7.5	Applications of Colloid Systems	155
7.5.1	Wastewater Treatment and Control (Zeta Potential)	155
7.5.2	Steric Stabilization of Solid or Liquid Colloids	157
7.5.2.1	Other Applications of the Zeta Potential	158
7.5.3	Industrial Applications.....	158
Chapter 8	Thin Liquid Films	161
8.1	Introduction	161
8.2	Bubbles and Foams.....	161
8.2.1	Application of Bubbles in Technology	162
8.3	Foams (Thin Liquid films)	162
8.3.1	Foams Stability.....	165
8.3.2	Foam Structure.....	167
8.3.2.1	Foam Formation of Beer and Surface Viscosity	168
8.3.3	Antifoaming Agents.....	169
8.4	Applications of Foams.....	169
8.4.1	Water Purification	169
8.4.2	Froth Flotation and Bubble Foam Purification	170
Chapter 9	Emulsions, Microemulsions, and Lyotropic Liquid Crystals.....	173
9.1	Introduction	173

9.2	Emulsions (Oil and Water)	174
9.2.1	Oil–Water Emulsions	174
9.2.1.1	Oil-in-Water Emulsions	176
9.2.1.2	Water-in-Oil Emulsions	176
9.2.1.3	Hydrophilic–Lipophilic (HLB) Values of Emulsifiers.....	176
9.2.2	Methods of Emulsion Formation.....	178
9.2.3	Emulsion Stability and Analyses	180
9.2.3.1	Emulsion Stability	181
9.2.3.2	Electrical Emulsion Stability.....	181
9.2.4	Orientation of Molecules at Oil–Water Interfaces.....	182
9.3	Microemulsions	183
9.3.1	Different Emulsion Recipes	185
9.3.1.1	Cleaning and Polishing Emulsions.....	185
9.3.1.2	Microemulsion Detergent	185
9.3.2	Characteristics and Stability of Emulsions	186
9.4	Liquid Crystals	186
9.4.1	Liquid Crystal Phases.....	187
9.4.1.1	Thermotropic Liquid Crystals	188
9.4.1.2	Lyotropic Liquid Crystals.....	189
9.4.1.3	Biological Liquid Crystals.....	191
9.5	Applications of Emulsions.....	193
9.5.1	Personal Care Industry	193
9.5.1.1	Fundamentals of Skin Creams and Recipes.....	194
9.5.1.2	Detergent-Based Antiseptics or Alcohol	196
9.5.2	The Paint Industry and Colloidal Aspects	198
9.5.3	Food Emulsions (Milk Industry).....	199
9.5.3.1	Milk—Composition and Emulsion Chemistry	201
9.5.3.2	Milk Fat Structure—Fat Globules.....	203
9.5.3.3	Milk Lipids—Functional Properties	204
9.5.3.4	The Casein Micelle.....	206
9.5.3.5	Colloids in the Food Industry	209
9.5.3.6	Emulsion Stability	209
Chapter 10	Diverse Applications of Surface and Colloid Chemistry in Science and Industry	213
10.1	Introduction	213
10.2	Applications of Scanning Probe Microscopes (STM, AFM, FFM) to Surface and Colloidal Chemistry.....	214
10.2.1	Domain Patterns in Monomolecular Film Assemblies.....	217

10.3 Drug Delivery Design (DDD) 219

10.4 Surface and Colloidal Aspects of Cement Industry 219

10.5 Diverse Industrial Applications 222

 10.5.1 Paper Industry (Surface and Colloidal Aspects) 222

 10.5.1.1 Inks and Printers (Colloidal Chemistry) 223

 10.5.1.2 Theory of Adhesives and Adhesion 223

 10.5.1.3 Surface Coatings of Solids 224

 10.5.2 Emulsion Polymerization 224

 10.5.2.1 Polymer Colloidal Systems 224

 10.5.2.2 Medical Care and Surface Chemistry 225

References 229

Appendix A: Effect of Temperature and Pressure on Surface Tension of Liquids (Corresponding States Theory) 231

Appendix B: Solubility of Organic Molecules in Water Using a *Surface Tension–Cavity* Model System 235

Appendix C: Gas Adsorption on Solid Surface—Theory 237

Appendix D: Common Fundamental Constants 239
