

Contents

1. Introduction	7
Review of the major systems	7
General review of major pathway systems	8
2. Spinal reflex pathways	15
1. Proprioceptive reflex pathways	16
a) Monosynaptic reflex	17
b) Bisynaptic reflexes	19
i) Tendon reflex	19
ii) Reciprocal innervation reflexes	19
ii) Polysegmental pathways	20
2. Visceroceptive reflex pathways	21
3. Exteroceptive reflex pathways	23
a) Flexor reflexes	23
b) Extensor reflex	24
c) Crossed extensor reflex	24
d) Orienting reflexes	24
4. Muscle tone pathways	26
5. Spinal interneurons and propriospinal pathways	29
3. General sensory pathways	34
A. Pathway of dorsal funiculi – tr. spino–bulbo–thalamo–corticalis	37
B. Spino–thalamic pathway – tr. spino–thalamicus	44
C. Spino–reticular pathway – tr. spino–reticularis	48
D. Spino–tectal pathway – tr. spino–tectalis	53
E. General sensory pathways of cranial nerves	54
F. General sensory pathways from organs – viscerosensory pathways	58
5. Motor pathways	65
1. Cortical motor pathways	66
A. Tractus cortico–spinalis – pyramidal tract and tractus cortico–nuclearis	67
B. Tractus cortico–reticularis	72

C. Tractus cortico-rubralis	73
D. Tractus cortico-tectalis	74
E. Tractus cortico-interstitio-vestibularis	75
2. Brainstem motor pathways	75
A. Tractus reticulo-spinalis	75
B. Tractus rubro-spinalis	77
C. Tractus tecto-spinalis	78
D. Tractus vestibulo-spinalis	78
E. Tractus interstitio-spinalis	79
3. Motor activity functional systems	80
6. Connections of the basal ganglia	88
A. The main circuit of the basal ganglia	89
B. Supplementary circuits of the basal ganglia	94
1. Subthalamic circuit	94
2. Striato-nigral circuit	94
3. Striato-pallido-subthalamic circuit	97
4. Pallido-reticulo-thalamic and nigro-tecto-thalamic circuit	97
7. Connections of the cerebellum	104
A. Afferent connections	105
I. Afferents from the vestibular apparatus	105
A. Tractus vestibulo-cerebellaris directus	105
B. Tractus vestibulo-cerebellaris indirectus	105
II. Afferents from the spinal cord and brain stem	108
A. Tractus spino-cerebellaris dorsalis	108
B. Tractus spino-cerebellaris ventralis	109
C. Tractus cuneo-cerebellaris	109
D. Tractus bulbo-cerebellaris	111
E. Tractus reticulo-cerebellaris	111
F. Tractus olivo-cerebellaris	112
G. Tractus trigemino-cerebellaris	114
H. Tractus raphe-cerebellaris et coeruleo-cerebellaris	114
I. Tractus hypothalamo-cerebellaris	114
III. Afferents from the cerebral cortex	114
A. Tractus ponto-cerebellaris	115
B. Tractus olivo-cerebellaris	116
C. Tractus reticulo-cerebellaris	116
B. Intrinsic connections	119
C. Efferent connections	120
I. Efferents from the cerebellar nuclei	120
II. Efferents directly from the cerebellar cortex	123
8. Sensory pathways	127
A. Visual pathway	127
Functional anatomical considerations	131
Branches from the visual pathway	135
The basic pattern of the pathway for miosis	136
The basic pattern of the pathway for mydriasis	138

B. Auditory pathway	141
The basic pattern of the auditory pathway	142
Interstitial nuclei (relay nuclei) of the auditory pathway	142
Descending connections in the auditory pathway	145
C. Vestibular pathway	146
The basic pattern of the vestibular pathway	146
D. Gustatory pathway	150
The basic pattern of the pathway	150
E. Olfactory pathway	151
The basic pattern of the pathway	152
9. Limbic system	156
I. Hippocampal circuits	159
A. Intrinsic and cortical connections of the hippocampus	159
B. Subcortical connections of the hippocampus	159
II. Amygdalar circuits	162
A. Intrinsic and cortical connections of the amygdala	162
B. Subcortical connections of the amygdala	163
1. the circuit of stria terminalis	163
2. ventral amygdalo-fugal system	164
3. brainstem circuit of the amygdala	165
III. Common characteristics in organization of connections of the hippocampus and amygdala	165
Functions of the limbic system	166
10. Association and commissural pathways	170
A. Association fibres	170
B. Commissural fibres	171
11. Chemical pathways	172
Survey of transmitters	173
Main chemical systems	174
A. Monoaminergic system	175
B. Cholinergic system	175
Pathways of monoaminergic and cholinergic systems	176
Functions of monoaminergic and cholinergic systems	176
C. Histaminergic systems	177
D. GABAergic systems	177
E. Glutamatergic systems	181
F. Enkephalin-positive cells	182
G. Neurotensin-positive cells	182
H. P-substance-positive cells	182
