

# Content

---

---

1. Basic chemical calculations. ....	5
2. Solutions of electrolytes. Osmotic pressure .....	10
3. Acid-base reactions.....	15
4. Non-covalent interactions. Surfactants .....	21
5. Reaction kinetics. Chemical equilibrium.....	26
6. Energy in chemical reactions. Latin nomenclature .....	30
7. Redox reactions .....	36
8. Organic compounds I .....	41
9. Organic compounds II .....	43
10. Heterocyclic compounds .....	46
11. Saccharides .....	53
12. Lipids and steroids .....	57
13. Amino acids. Proteins .....	61
The results of calculations .....	67
