

# Contents

<i>P. Beremlijski:</i> Tvarová optimalizace kontaktního problému s Coulombovým třením . . . . .	7
<i>R. Blaheta:</i> Mathematical Modelling: 25 years of the research at the Institute of Geonics AS CR . . . . .	11
<i>M. Brandner, J. Egermaier, H. Kopincová:</i> Central and Upwind Methods for balance laws With Spatially Varying Flux Function . . . . .	17
<i>M. Domorádová, Z. Dostál:</i> Projector Preconditioning for the Solution of the Large Scale Bound Constrained Quadratic Programming Problems . . . . .	21
<i>J. Duintjer Tebbens, J. Liesen, R. Luce, R. Nabben:</i> Direct Solvers for the Linear Systems Arising from Application of the Simplex Method . . . . .	25
<i>T. Hanus, D. Janovská:</i> Discontinuous dynamical systems . . . . .	27
<i>J. Haslinger, T. Kozubek, R. Kučera:</i> A smooth variant of the fictitious domain approach . . . . .	31
<i>J. Haslinger, O. Vlach, Z. Dostál:</i> Použití metody FETI-DP pro 2D kvazistatické kontaktní problémy s Coulombovým třením . . . . .	37
<i>P. Hejda, J. Šimkanin, M. Reshetnyak, B. Steffen:</i> Application of the control volume method to the geodynamo simulation . . . . .	39
<i>I. Hnětynková, M. Plešinger, Z. Strakoš:</i> Golub-Kahan iterative bidiagonalization and stopping criteria in ill-posed problems . . . . .	41
<i>J. Horák, E. Neumanová, P. Ditzl:</i> Population Dynamics of Yeast <i>Candida Utilis</i> Stochastic Approach . . . . .	46
<i>J. Chleboun:</i> Sandia Workshop Structural Mechanics Challenge Problem . . . . .	50
<i>O. Jakl:</i> Recent trends in parallel programming . . . . .	54
<i>D. Janovská, V. Janovský:</i> Singular values of parameter dependent matrices . . . . .	59
<i>D. Janovská, G. Opfer:</i> On the determinant of the quaternionic operator $l(\mathbf{x}) := \mathbf{ax} + \mathbf{bxc} + \mathbf{xd}$ . . . . .	63
<i>P. Kabelíková:</i> Graph Partitioning Using Spectral Methods . . . . .	67

<i>R. Kohut, J. Starý, A. Kolcun:</i>	
Parallel computations of thermo-elasticity benchmark problems: comparison of MPI and OpenMP based program codes . . . . .	71
<i>J. Kruijs, Z. Bittnar:</i>	
Application of the FETI method in problems of interaction between composite matrix and reinforcement . . . . .	75
<i>P. Moses:</i>	
Metoda hraničních prvků pro řešení Helmholtzovy integrální rovnice . . . . .	79
<i>M. Plešinger, I. Hnětynková, D. M. Sima, Z. Strakoš:</i>	
Total least squares problem in linear algebraic systems with multiple right-hand side . . . . .	81
<i>I. Pultarová:</i>	
A posteriori error estimates for hierarchical bases . . . . .	85
<i>M. Sadowská:</i>	
BETI metoda pro 2D kontaktní úlohy . . . . .	88
<i>J. Stebel, J. Haslinger, J. Málek:</i>	
Shape optimization governed by generalized Navier-Stokes equations . . . . .	91
<i>S. Sysala:</i>	
On a Dual Method to a Beam Problem with a Unilateral Elastic Subsoil of Winkler's Type . . . . .	95
<i>I. Šimeček:</i>	
A New Format for Sparse Matrix-vector Multiplication . . . . .	10
<i>J. Šístek et al.:</i>	
Development of an efficient parallel BDDC solver for linear elasticity problems . . . . .	105
<i>M. Tajovský, J. Zítko:</i>	
Improving the convergence of restarted GMRES method . . . . .	109
<i>P. Tomek:</i>	
Modelování sanačního zásahu Fe nanočásticemi . . . . .	113
<i>P. Tvrdlík, I. Šimeček:</i>	
High Performance Recursive Linear Algebra Library . . . . .	116
<i>R. Vaibar, T. Sühnel:</i>	
CFD Simulation of Buoyancy Driven Turbulent Flow and Experimental validation at the VeMix Test Facility . . . . .	120
<i>T. Vejchodský, P. Šolín:</i>	
Improving Conditioning of <i>hp</i> -FEM . . . . .	126
<i>J. R. Winkler, J. Zítko:</i>	
Some questions associated with the calculation of the GCD of two univariate polynomials . . . . .	130
