

SCIENTIFIC TOPICS:

1. New Experiments for Biomolecular NMR in Liquids
2. Dynamic and Relaxation Phenomena
3. NMR and Computation
4. Material and Flow Imaging, Transport Phenomena
5. In-vivo Imaging and Microscopy
6. Advances in Solid State Magnetic Resonance
7. NMR in Structural Biology
8. Advances in Structure Calculations
9. New Experiments for Biomolecular NMR in Solids
10. Theoretical Calculations of NMR Parameters
11. New Topics in High-resolution NMR in Liquids
12. Magnetic Resonance of Intermolecular Interactions
13. Miscellaneous

CONTENTS:

Plenary lectures	L	1 – 36
Russell Varian Prize Award Lecture		
After dinner speech		
Short oral communications	S	1 – 23
Posters – session A (topics 1 – 5, 12-13)	PA	1 – 121
Posters -- session B (topics 6 – 11)	PB	1 – 139
Author index
