<i>Preface</i>	v
1 Section 1: Mineral-microbe interactions <i>J. D. Cotter-Howells</i>	1
1.1 Introduction	1
1.2 Biological processes and minerals	1
1.3 Future directions	3
1.4 The papers	3
References	4
2 Illustrations of the occurrence and diversity of mineral-microbe interactions involved in weathering of minerals <i>J. Berthelin, C. Leyval and C. Mustin</i>	7
2.1 Introduction	8
2.2 Main microbial dissolution and precipitation processes of inorganic elements	10
2.3 Weathering and transformation of a mica under the influence of roots and of their associated microorganisms in the plant rhizosphere	13
2.4 Interactions between <i>Thiobacillus ferrooxidans</i> and sulphide minerals (pyrite) during oxidation and dissolution (bioleaching) processes	16
2.5 Influence of Al and Mn substitution on the dissolution of ferric oxides (goethite) by Fe-reducing bacteria	20
2.6 Conclusions	21
References	23
3 Mineral dissolution by heterotrophic bacteria: principles and methodologies <i>E. Valsami-Jones and S. McEldowney</i>	27
3.1 Introduction	27
3.2 The principles of mineral dissolution	28
3.3 Bacteria as dissolution agents	29
3.4 Methods of studying heterotrophic bacteria	37
3.5 Field evidence of bacterial influence on mineral dissolution	44
3.6 Laboratory studies: mechanisms	45
3.7 Conclusions and future work	49
Acknowledgements	52
References	52

CONTENTS

4	Heterotrophic solubilization of metal-bearing minerals by fungi <i>G. M. Gadd</i>	57
4.1	Introduction	57
4.2	Organic acid biosynthesis	58
4.3	Metal chemistry of citric and oxalic acid	59
4.4	Fungal organic acids and metal biogeochemistry	64
4.5	Fungal organic acid production and metal biotechnology	68
4.6	Conclusions	69
	Acknowledgements	70
	References	70
5	Weathering of rocks by lichens: fragmentation, dissolution and precipitation of minerals in a microbial microcosm <i>M. R. Lee</i>	77
5.1	Introduction	77
5.2	Background	79
5.3	Abiotic weathering and erosion of rock surfaces	83
5.4	A model of the lichen-rock interface	84
5.5	Photosynthetic zone	85
5.6	Direct biochemilithic zone	86
5.7	Indirect biochemilithic zone	90
5.8	Physicochemilithic zone	96
5.9	Rates of lichen-mediated weathering	96
5.10	Summary: the impact of lichen colonization on weathering rates	103
	Acknowledgements	103
	References	104
6	Section 2: Anthropogenic influences on mineral interactions <i>L. S. Campbell</i>	109
6.1	Introduction	109
6.2	Anthropogenic influences	110
6.3	Influences associated with the biosphere	112
6.4	Conclusion	114
	References	114
7	Mechanisms and rates of sulphide oxidation in relation to the problems of acid rock (mine) drainage <i>C. N. Keith and D. J. Vaughan</i>	117
7.1	Introduction	117
7.2	Acid rock drainage: background to the problem	118
7.3	Sulphide minerals: chemistry and reactivity, oxidation mechanisms, rates and controls	123
7.4	Concluding remarks	135
	Acknowledgements	136
	References	136

CONTENTS

8	The relationship of mineralogy to acid- and neutralization-potential values in ARD <i>J. L. Jambor</i>	141
8.1	Introduction	141
8.2	Static and kinetic tests	142
8.3	Acid-producing potential	143
8.4	Sulphide resistance and persistence	144
8.5	Neutralization potential	145
8.6	Weathering rates of minerals	146
8.7	Relationships to ARD	150
8.8	Conclusions	154
	Acknowledgements	155
	References	156
9	Mynydd Parys Cu-Pb-Zn Mines: mineralogy, microbiology and acid mine drainage <i>D. A. Jenkins, D. B. Johnson and C. Freeman</i>	161
9.1	Introduction	161
9.2	Geology and mining history	163
9.3	Surface mineralogy and geochemistry	165
9.4	Biology	170
9.5	Acid mine drainage	174
9.6	Conclusions	177
	Acknowledgements	177
	References	177
10	Decay effects associated with soluble salts on granite buildings of Braga (NW Portugal) <i>C. A. S. Alves and M. A. Sequeira Braga</i>	181
10.1	Introduction	181
10.2	Salt weathering on buildings: a review	182
10.3	Granite buildings of Braga: case studies	185
10.4	Characterization of soluble salts	186
10.5	Decay effects of soluble salts in granite buildings of Braga: a discussion	194
10.6	Conclusions	197
	Acknowledgements	198
	References	198
11	Section 3: Minerals in contaminated environments <i>E. Valsami-Jones</i>	201
11.1	Introduction	201
11.2	Mineral-pollutant interactions	201
11.3	Environmental minerals	202
11.4	Environmental Mineralogy and contaminated environments	203
	References	204

CONTENTS

12	Heavy metal-bearing Mn oxides in river channel and floodplain sediments <i>K. A. Hudson-Edwards</i>	207
12.1	Introduction	207
12.2	Mineralogy and heavy metal affinity of Mn oxides	208
12.3	Mn oxides in river sediments	209
12.4	Mn oxides in river channel and floodplain sediment in northeast England	211
12.5	Conclusions and environmental significance	221
	Acknowledgements	222
	References	222
13	Intercalation of organic and inorganic contaminants by expanding layer silicates <i>W. E. Dubbin</i>	227
13.1	Introduction	227
13.2	Structure and properties of expandable layer silicates	228
13.3	Intercalation of inorganic contaminants	230
13.4	Intercalation of organic contaminants	239
13.5	Summary	241
	References	242
14	Uranium behaviour in natural environments <i>K. V. Ragnarsdottir and L. Charlet</i>	245
14.1	Introduction	245
14.2	Physical and chemical properties of uranium	246
14.3	Aqueous uranium chemistry	250
14.4	Transport of uranium	257
14.5	Sinks of uranium	266
14.6	Uranium mines and tailings	269
14.7	Conclusion – the uranium cycle	277
	Acknowledgements	279
	References	279
15	Metal phosphates and remediation of contaminated land <i>M. E. Hodson, E. Valsami-Jones and J. D. Cotter-Howells</i>	291
15.1	Introduction	291
15.2	Metal phosphates in the natural environment	292
15.3	Metal phosphate solubility	294
15.4	Metal phosphate formation in experimental systems using aqueous metal ions	298
15.5	Metal phosphate formation in batch experiments using metal-bearing solids	302
15.6	Metal phosphate formation in soil column and field experiments	306
15.7	Concluding remarks	308
	Acknowledgements	308
	References	308

CONTENTS

16	Section 4: Minerals and waste management <i>L. S. Campbell</i>	313
16.1	Introduction	313
16.2	Interactive characteristics of minerals	313
16.3	Zeolites	314
16.4	Clay minerals	314
16.5	Carbonates	315
16.6	Other mineral groups	315
16.7	Conclusions	316
	Acknowledgements	316
	References	317
17	Applications of natural zeolites in the treatment of nuclear wastes and fall-out <i>A. Dyer</i>	319
17.1	Introduction	319
17.2	Historical perspective	321
17.3	Zeolites as specific ion exchangers for radioisotopes	322
17.4	Scavenging of radioisotopes from aqueous solution	327
17.5	Treatment of radioactive wastes from nuclear facilities	338
17.6	Clean-up of radioactive waste from nuclear accidents and fall-out	343
17.7	Waste containment uses of natural zeolites	348
17.8	Treatment of gaseous emissions from nuclear facilities	352
17.9	Summary and recommendations for future research	352
	Acknowledgements	353
	References	353
18	Gas entry into unconfined clay pastes at water contents between the liquid and plastic limits <i>A. T. Donohew, S. T. Horseman and J. F. Harrington</i>	369
18.1	Introduction	369
18.2	Gas entry and soil suction	374
18.3	Experiments	377
18.4	Results	380
18.5	Mechanisms	384
18.6	Discussion	386
18.7	Conclusions	389
	Acknowledgements	391
	References	391
19	Geosynthetic Clay Liners (GCLs) for municipal solid waste landfills <i>R. K. Rowe and C. B. Lake</i>	395
19.1	Introduction	395
19.2	Hydraulic conductivity and leachate compatibility	397
19.3	Diffusion research	399

CONTENTS

19.4	GCL interaction with other components of the landfill system	401
19.5	Conclusion	404
	References	404
	INDEX	407

17	Applications of actual facilities in the treatment of surface water	271
	17.1 Introduction	271
	17.2 Historical perspective on surface water treatment	272
	17.3 Surface water treatment for drinking water	273
	17.4 Scavenging of radionuclides from surface water	274
	17.5 Treatment of radioactive waste from nuclear facilities	275
	17.6 Clean-up of radioactive waste from nuclear accidents and fall-out	276
	17.7 Waste management systems for nuclear facilities	277
	17.8 Treatment of gaseous emissions from nuclear facilities	278
	17.9 Summary and recommendations for future research	279
	17.10 Acknowledgements	280
	17.11 References	281
18	Excess clay and bentonite in water treatment	282
	18.1 Introduction	282
	18.2 Physical and chemical properties of bentonite	283
	18.3 Laboratory experiments	284
	18.4 Field experiments	285
	18.5 Mechanisms	286
	18.6 Discussion	287
	18.7 Conclusions	288
	18.8 Acknowledgements	289
	18.9 References	290
19	Geosynthetic Clay Liners (GCLs) for municipal solid waste	291
	19.1 Introduction	291
	19.2 Geosynthetic Clay Liners (GCLs) for municipal solid waste	292
	19.3 Geosynthetic Clay Liners (GCLs) for municipal solid waste	293
	19.4 Geosynthetic Clay Liners (GCLs) for municipal solid waste	294
	19.5 Geosynthetic Clay Liners (GCLs) for municipal solid waste	295
	19.6 Geosynthetic Clay Liners (GCLs) for municipal solid waste	296
	19.7 Geosynthetic Clay Liners (GCLs) for municipal solid waste	297
	19.8 Geosynthetic Clay Liners (GCLs) for municipal solid waste	298
	19.9 Geosynthetic Clay Liners (GCLs) for municipal solid waste	299
	19.10 Geosynthetic Clay Liners (GCLs) for municipal solid waste	300
	19.11 Geosynthetic Clay Liners (GCLs) for municipal solid waste	301
	19.12 Geosynthetic Clay Liners (GCLs) for municipal solid waste	302
	19.13 Geosynthetic Clay Liners (GCLs) for municipal solid waste	303
	19.14 Geosynthetic Clay Liners (GCLs) for municipal solid waste	304
	19.15 Geosynthetic Clay Liners (GCLs) for municipal solid waste	305
	19.16 Geosynthetic Clay Liners (GCLs) for municipal solid waste	306
	19.17 Geosynthetic Clay Liners (GCLs) for municipal solid waste	307
	19.18 Geosynthetic Clay Liners (GCLs) for municipal solid waste	308
	19.19 Geosynthetic Clay Liners (GCLs) for municipal solid waste	309
	19.20 Geosynthetic Clay Liners (GCLs) for municipal solid waste	310
	19.21 Geosynthetic Clay Liners (GCLs) for municipal solid waste	311
	19.22 Geosynthetic Clay Liners (GCLs) for municipal solid waste	312
	19.23 Geosynthetic Clay Liners (GCLs) for municipal solid waste	313
	19.24 Geosynthetic Clay Liners (GCLs) for municipal solid waste	314
	19.25 Geosynthetic Clay Liners (GCLs) for municipal solid waste	315
	19.26 Geosynthetic Clay Liners (GCLs) for municipal solid waste	316
	19.27 Geosynthetic Clay Liners (GCLs) for municipal solid waste	317
	19.28 Geosynthetic Clay Liners (GCLs) for municipal solid waste	318
	19.29 Geosynthetic Clay Liners (GCLs) for municipal solid waste	319
	19.30 Geosynthetic Clay Liners (GCLs) for municipal solid waste	320
	19.31 Geosynthetic Clay Liners (GCLs) for municipal solid waste	321
	19.32 Geosynthetic Clay Liners (GCLs) for municipal solid waste	322
	19.33 Geosynthetic Clay Liners (GCLs) for municipal solid waste	323
	19.34 Geosynthetic Clay Liners (GCLs) for municipal solid waste	324
	19.35 Geosynthetic Clay Liners (GCLs) for municipal solid waste	325
	19.36 Geosynthetic Clay Liners (GCLs) for municipal solid waste	326
	19.37 Geosynthetic Clay Liners (GCLs) for municipal solid waste	327
	19.38 Geosynthetic Clay Liners (GCLs) for municipal solid waste	328
	19.39 Geosynthetic Clay Liners (GCLs) for municipal solid waste	329
	19.40 Geosynthetic Clay Liners (GCLs) for municipal solid waste	330
	19.41 Geosynthetic Clay Liners (GCLs) for municipal solid waste	331
	19.42 Geosynthetic Clay Liners (GCLs) for municipal solid waste	332
	19.43 Geosynthetic Clay Liners (GCLs) for municipal solid waste	333
	19.44 Geosynthetic Clay Liners (GCLs) for municipal solid waste	334
	19.45 Geosynthetic Clay Liners (GCLs) for municipal solid waste	335
	19.46 Geosynthetic Clay Liners (GCLs) for municipal solid waste	336
	19.47 Geosynthetic Clay Liners (GCLs) for municipal solid waste	337
	19.48 Geosynthetic Clay Liners (GCLs) for municipal solid waste	338
	19.49 Geosynthetic Clay Liners (GCLs) for municipal solid waste	339
	19.50 Geosynthetic Clay Liners (GCLs) for municipal solid waste	340
	19.51 Geosynthetic Clay Liners (GCLs) for municipal solid waste	341
	19.52 Geosynthetic Clay Liners (GCLs) for municipal solid waste	342
	19.53 Geosynthetic Clay Liners (GCLs) for municipal solid waste	343
	19.54 Geosynthetic Clay Liners (GCLs) for municipal solid waste	344
	19.55 Geosynthetic Clay Liners (GCLs) for municipal solid waste	345
	19.56 Geosynthetic Clay Liners (GCLs) for municipal solid waste	346
	19.57 Geosynthetic Clay Liners (GCLs) for municipal solid waste	347
	19.58 Geosynthetic Clay Liners (GCLs) for municipal solid waste	348
	19.59 Geosynthetic Clay Liners (GCLs) for municipal solid waste	349
	19.60 Geosynthetic Clay Liners (GCLs) for municipal solid waste	350
	19.61 Geosynthetic Clay Liners (GCLs) for municipal solid waste	351
	19.62 Geosynthetic Clay Liners (GCLs) for municipal solid waste	352
	19.63 Geosynthetic Clay Liners (GCLs) for municipal solid waste	353
	19.64 Geosynthetic Clay Liners (GCLs) for municipal solid waste	354
	19.65 Geosynthetic Clay Liners (GCLs) for municipal solid waste	355
	19.66 Geosynthetic Clay Liners (GCLs) for municipal solid waste	356
	19.67 Geosynthetic Clay Liners (GCLs) for municipal solid waste	357
	19.68 Geosynthetic Clay Liners (GCLs) for municipal solid waste	358
	19.69 Geosynthetic Clay Liners (GCLs) for municipal solid waste	359
	19.70 Geosynthetic Clay Liners (GCLs) for municipal solid waste	360
	19.71 Geosynthetic Clay Liners (GCLs) for municipal solid waste	361
	19.72 Geosynthetic Clay Liners (GCLs) for municipal solid waste	362
	19.73 Geosynthetic Clay Liners (GCLs) for municipal solid waste	363
	19.74 Geosynthetic Clay Liners (GCLs) for municipal solid waste	364
	19.75 Geosynthetic Clay Liners (GCLs) for municipal solid waste	365
	19.76 Geosynthetic Clay Liners (GCLs) for municipal solid waste	366
	19.77 Geosynthetic Clay Liners (GCLs) for municipal solid waste	367
	19.78 Geosynthetic Clay Liners (GCLs) for municipal solid waste	368
	19.79 Geosynthetic Clay Liners (GCLs) for municipal solid waste	369
	19.80 Geosynthetic Clay Liners (GCLs) for municipal solid waste	370
	19.81 Geosynthetic Clay Liners (GCLs) for municipal solid waste	371
	19.82 Geosynthetic Clay Liners (GCLs) for municipal solid waste	372
	19.83 Geosynthetic Clay Liners (GCLs) for municipal solid waste	373
	19.84 Geosynthetic Clay Liners (GCLs) for municipal solid waste	374
	19.85 Geosynthetic Clay Liners (GCLs) for municipal solid waste	375
	19.86 Geosynthetic Clay Liners (GCLs) for municipal solid waste	376
	19.87 Geosynthetic Clay Liners (GCLs) for municipal solid waste	377
	19.88 Geosynthetic Clay Liners (GCLs) for municipal solid waste	378
	19.89 Geosynthetic Clay Liners (GCLs) for municipal solid waste	379
	19.90 Geosynthetic Clay Liners (GCLs) for municipal solid waste	380
	19.91 Geosynthetic Clay Liners (GCLs) for municipal solid waste	381
	19.92 Geosynthetic Clay Liners (GCLs) for municipal solid waste	382
	19.93 Geosynthetic Clay Liners (GCLs) for municipal solid waste	383
	19.94 Geosynthetic Clay Liners (GCLs) for municipal solid waste	384
	19.95 Geosynthetic Clay Liners (GCLs) for municipal solid waste	385
	19.96 Geosynthetic Clay Liners (GCLs) for municipal solid waste	386
	19.97 Geosynthetic Clay Liners (GCLs) for municipal solid waste	387
	19.98 Geosynthetic Clay Liners (GCLs) for municipal solid waste	388
	19.99 Geosynthetic Clay Liners (GCLs) for municipal solid waste	389
	20.00 Geosynthetic Clay Liners (GCLs) for municipal solid waste	390
