

# CONTENTS IN BRIEF

---

CHAPTER	1	The Role of Statistics, 2
CHAPTER	2	Describing Data Sets, 14
CHAPTER	3	Measures of Central Tendency and Dispersion, 52
CHAPTER	4	Principles of Probability, 120
CHAPTER	5	Probability Distributions, 184
CHAPTER	6	The Normal Distribution, 238
CHAPTER	7	Sampling Distributions: An Introduction to Inferential Statistics, 268
CHAPTER	8	Estimating with Confidence Intervals, 316
CHAPTER	9	Hypothesis Testing, 384
CHAPTER	10	Tests of Two Populations, 454
CHAPTER	11	Tests of Variances and Analysis of Variance, 510
CHAPTER	12	Simple Regression and Correlation Analysis, 578
CHAPTER	13	Multiple Regression and Correlation, 660
CHAPTER	14	Dummy Variables and Residual Analysis: Extensions of Regression and Correlation, 708
CHAPTER	15	Chi-Square and Other Nonparametric Tests, 742
CHAPTER	16	Time-Series Analysis and Forecasting, 812
CHAPTER	17	Index Numbers, 856
CHAPTER	18	Techniques of Quality Control, 886
<i>INDEX</i>		990

- B. Median, 56
- C. Mode, 56
- D. The Weighted Mean, 57
- E. The Geometric Mean, 59
- 3.3** Measures of Central Tendency for Grouped Data, 62
  - A. Mean, 62
  - B. Median, 63
  - C. Mode, 64
- 3.4** Comparing the Mean, Median and Mode, 66
- 3.5** Selecting the Appropriate Measure of Central Tendency, 67
- 3.6** Measures of Dispersion for Ungrouped Data, 67
  - A. Range, 68
  - B. Mean Absolute Deviation, 68
  - C. Variance and the Standard Deviation for a Population, 70
  - D. Variance and Standard Deviation for a Sample, 73
- 3.7** Shortcut Method for Variance and Standard Deviation, 75
- 3.8** Other Measures of Dispersion, 76
- 3.9** Measures of Dispersion with Grouped Data, 80
  - A. Percentiles with Grouped Data, 80
  - B. Variance and Standard Deviation with Grouped Data, 82
- 3.10** Common Uses for the Standard Deviation, 83
  - A. Chebyshev's Theorem, 84
  - B. The Normal Distribution and the Empirical Rule, 84
  - C. Skewness, 87
  - D. Coefficient of Variation, 88
- 3.11** A Summary of the More Important Concepts, 90
- 3.12** Solved Problems, 92
- 3.13** What You Should Have Learned from This Chapter, 97
- 3.14** Computer Applications, 98
- List of Symbols and Terms, 101
- List of Formulas, 101
- Chapter Exercises, 103

**CHAPTER 4****PRINCIPLES OF PROBABILITY, 120**

- 4.1** Introduction, 122
- 4.2** Experiments, Outcomes, and Sets, 122
- 4.3** Approaches to Probability, 124
  - A. The Relative Frequency Approach, 125
  - B. The Subjective Approach, 126
  - C. The Classical Approach, 127
- 4.4** The Practice of Odds-Making, 129
- 4.5** Relationships between Events, 131
- 4.6** Unions, Intersection, and Venn Diagrams, 133
- 4.7** Frequency Tables and Probability Tables, 134
- 4.8** Two Rules of Probability, 136
  - A. The Rule of Multiplication and Conditional Probability, 137
  - B. Rule of Addition, 140
  - C. A Couple of Helpful Hints, 143
  - D. Further Illustrations of the Two Rules of Probability, 145
- 4.9** Probability Trees, 154
- 4.10** Bayes' Rule and Conditional Probability, 156
- 4.11** Counting Techniques, 161
  - A. Permutations, 162
  - B. Combinations, 163
  - C. Multiple-Choice Arrangement, 168
  - D. Multiplication Method, 168
- 4.12** Solved Problems, 169
- 4.13** What You Should Have Learned from This Chapter, 175
- List of Symbols and Terms, 175
- List of Formulas, 175
- Chapter Exercises, 177

**CHAPTER 5****PROBABILITY DISTRIBUTIONS, 184**

- 5.1** Introduction, 186
- 5.2** The Mean and Variance of Discrete Random Variables, 189

- 5.3** The Binomial Distribution, 193
- A.** Cumulative Binomial Probability, 197
  - B.** Mean and Variance of a Binomial Distribution, 198
  - C.** Lot Acceptance Sampling, 199
  - D.** The Shape of the Binomial Distribution, 202
- 5.4** The Poisson Distribution, 203
- 5.5** The Hypergeometric Distribution, 205
- 5.6** Mathematical Expectation, 208
- 5.7** Uniform Distribution, 210
- 5.8** The Exponential Distribution, 213
- A.** Determining Probabilities, 214
  - B.** Queuing Problems, 217
- 5.9** Solved Problems, 220
- 5.10** What You Should Have Learned from This Chapter, 226
- 5.11** Computer Applications, 226
- List of Symbols and Terms, 227
- List of Formulas, 227
- Chapter Exercises, 229

## CHAPTER 6

### THE NORMAL DISTRIBUTION, 238

- 6.1** Introduction, 240
- 6.2** The General Nature of the Normal Distribution, 240
- A.** A Comparison of Normal Distributions, 242
  - B.** The Empirical Rule Revisited, 242
  - C.** The Normal Deviate, 244
- 6.3** Calculating Probabilities with the Normal Deviate, 246
- 6.4** Calculating an  $X$ -Value from a Known Probability, 255
- 6.5** Normal Approximation to the Binomial, 258
- 6.6** Solved Problems, 260
- 6.7** What You Should Have Learned from This Chapter, 263
- 6.8** Computer Applications, 263
- List of Symbols and Terms, 264
- List of Formulas, 264
- Chapter Exercises, 264

## CHAPTER 7

### SAMPLING DISTRIBUTIONS: AN INTRODUCTION TO INFERENCE STATISTICS, 268

- 7.1** Introduction, 270
- 7.2** Sampling Distributions, 270
- A.** The Mean of the Sample Means, 273
  - B.** The Standard Error of the Sampling Distribution, 274
  - C.** The Standard Error and Normality, 277
  - D.** The Impact of Sample Size on the Standard Error, 278
- 7.3** The Central Limit Theorem, 280
- 7.4** The Finite Population Correction Factor, 281
- 7.5** Using the Sampling Distribution, 284
- 7.6** The Sampling Distributions for Proportions, 292
- 7.7** An Examination of Sampling Procedures, 297
- A.** Sampling Error and Bias, 297
  - B.** Simple Random Sample, 298
  - C.** Systematic Sampling, 300
  - D.** Stratified Sampling, 300
  - E.** Cluster Sampling, 301
- 7.8** Solved Problems, 302
- 7.9** What You Should Have Learned from This Chapter, 308
- 7.10** Computer Applications, 308
- List of Symbols and Terms, 309
- List of Formulas, 309
- Chapter Exercises, 310

## CHAPTER 8

### ESTIMATING WITH CONFIDENCE INTERVALS, 316

- 8.1** Introduction, 318
- A.** The Principle of a Confidence Interval, 319
  - B.** The Interpretation of Confidence Intervals, 320

- 8.2** Confidence Interval for the Population Mean—Large Samples, 321
- A.** A Known Population Variance, 321
  - B.** The Probability of Error—The  $\alpha$ -Value, 327
  - C.** Confidence Intervals with  $\sigma$  Unknown, 328
  - D.** Sampling Nonnormal Populations, 330
- 8.3** Confidence Intervals for the Population Mean—Small Samples, 332
- 8.4** Estimating the Difference between Two Normal Population Means, 337
- A.** Paired Sampling, 337
  - B.** Independent Sampling, 341
- 8.5** Confidence Intervals for Population Proportions, 349
- A.** Confidence Intervals for a Single Proportion,  $\pi$ , 350
  - B.** Confidence Intervals for the Difference between Two Proportions, 352
- 8.6** Controlling the Interval Width, 354
- A.** Adjusting the Level of Confidence, 354
  - B.** Adjusting the Sample Size, 355
- 8.7** Determining the Sample Size, 356
- A.** Sample Size for  $\mu$ , 357
  - B.** Sample Size for  $\mu_1 - \mu_2$ , 358
  - C.** Sample Size for  $\pi$ , 359
  - D.** Sample Size for  $\pi_1 - \pi_2$ , 360
- 8.8** Properties of Good Estimators, 361
- A.** An Unbiased Estimator, 361
  - B.** An Efficient Estimator, 362
  - C.** A Consistent Estimator, 363
  - D.** A Sufficient Estimator, 364
- 8.9** Solved Problems, 364
- 8.10** What You Should Have Learned from This Chapter, 368
- 8.11** Computer Applications, 369
- List of Symbols and Terms, 370
- List of Formulas, 370
- Chapter Exercises, 372
- CHAPTER 9**
- HYPOTHESIS TESTING, 384**
- 9.1** Introduction, 386
- 9.2** The Principle of Hypothesis Testing, 387
- A.** We Never “Accept” the Null Hypothesis, 388
  - B.** The Level of Significance and a Type I Error, 389
- 9.3** Determination of the Decision Rule, 389
- 9.4** Difference between a One-Tailed and a Two-Tailed Test, 392
- 9.5** A Two-Tailed Hypothesis Test for the Population Mean—Large Sample, 393
- 9.6** A Two-Tailed Hypothesis Test for a Population Proportion: Large Samples, 398
- 9.7** A Two-Tailed Hypothesis Test for the Population Mean—Small Samples, 403
- A.** When  $\sigma$  Is Unknown, 403
  - B.** If  $\sigma$  Is Known, 404
- 9.8** One-Tailed Tests for the Population Mean with Large Samples, 406
- A.** Determination of Hypotheses in a One-Tailed Test, 406
  - B.** Finding the Correct Value for  $Z$  for a One-Tailed Test, 411
- 9.9** One-Tailed Tests for the Mean with Small Samples, 415
- 9.10** One-Tailed Tests for Proportions—Large Samples, 417
- 9.11** An Optional Method of Hypothesis Testing, 420
- A.** Calculation and Interpretation of  $p$ -Values, 425

- 9.12** Type I and Type II Errors, 429
  - A.** Calculating  $\beta$  (the Probability of a Type II Error), 430
  - B.** Selecting an  $\alpha$ -Value, 432
- 9.13** The Operating Characteristic Curve and the Power Curve, 433
- 9.14** Effect of Sample Size on  $\beta$ , 435
- 9.15** Choosing the Correct Test, 435
- 9.16** Using Confidence Intervals to Test Hypothesis, 435
- 9.17** Solved Problems, 437
- 9.18** What You Should Have Learned from This Chapter, 441
- 9.19** Computer Applications, 442
- List of Symbols and Terms, 443
- List of Formulas, 444
- Chapter Exercises, 445

## CHAPTER 10

### TESTS OF TWO POPULATIONS, 454

- 10.1** Introduction, 456
- 10.2** Differences between Two Means—Large Samples, 456
  - A.** One-Tailed Hypothesis Tests, 462
  - B.** When the Hypothesized Difference Is Not Zero, 464
- 10.3** Difference between Two Means—Small Samples, 466
  - A.** Equal but Unknown Variances, 467
  - B.** Unequal Variances, 470
  - C.** Paired Sampling, 473
- 10.4** A Test for the Difference between Two Proportions—Large Samples, 478
  - A.** Basing the Test on Zero, 478
  - B.** Basing the Test on a Nonzero Value, 481
- 10.5** Confidence Intervals for Two Populations, 483
  - A.** Confidence Intervals for Large, Independent Samples, 483
  - B.** Confidence Intervals with Two Small, Independent Samples, 485
  - C.** Paired Samples, 486

- 10.6** Solved Problems, 487
- 10.7** What You Should Have Learned from This Chapter, 494
- 10.8** Computer Applications, 494
  - A.** Minitab, 495
  - B.** SAS, 495
  - C.** SPSS-X, 496
- List of Formulas, 496
- Chapter Exercises, 499

## CHAPTER 11

### TESTS OF VARIANCES AND ANALYSIS OF VARIANCE, 510

- 11.1** Introduction, 512
- 11.2** Testing the Variance of a Normally Distributed Population: Chi-Square, 514
  - A.** Hypothesis Tests for a Variance, 515
  - B.** Confidence Interval for the Variance of a Normal Population, 519
- 11.3** Comparing the Variances of Two Normal Populations, 520
- 11.4** One-Way ANOVA: The Completely Randomized Design, 523
  - A.** An Illustration of ANOVA, 525
  - B.** The Principle behind ANOVA, 527
  - C.** The Sums of Squares, 529
  - D.** The Mean Sums of Squares, 531
  - E.** An ANOVA Table, 533
- 11.5** Tests for Differences Between Individual Pairs, 536
  - A.** Test for Balanced Designs, 537
  - B.** Denoting Significant Differences, 539
  - C.** Tests for Unbalanced Designs, 540
- 11.6** Two-Way ANOVA: The Randomized Block Design, 543
- 11.7** A Potpourri, 551
  - A.** Interaction, 551
  - B.** Two-factor ANOVA, 552
- 11.8** Solved Problems, 553

**11.9** What You Should Have Learned from This Chapter, 561

**11.10** Computer Applications, 561

**A.** Minitab, 561

**B.** SAS, 562

**C.** SPSS-PC, 563

List of Symbols and Terms, 564

List of Formulas, 564

Chapter Exercises, 566

## CHAPTER 12

### SIMPLE REGRESSION AND CORRELATION ANALYSIS, 578

**12.1** Introduction, 580

**12.2** The Mechanics of a Straight Line, 584

**12.3** The Basic Objective of Regression Analysis, 585

**12.4** Ordinary Least Squares (The Line of Best Fit), 588

**12.5** An Example Using OLS, 591

**A.** The Y-Values Are Assumed to Be Normally Distributed, 598

**12.6** Assumptions of OLS, 601

**12.7** The Standard Error of the Estimate: A Measure of Goodness of Fit, 604

**12.8** Correlation Analysis, 609

**A.** The Coefficient of Determination, 609

**B.** The Coefficient of Correlation, 614

**12.9** Limitations of Regression Analysis, 615

**12.10** Interval Estimation in Regression Analysis, 616

**A.** The Conditional Mean for Y, 617

**B.** The Predictive Interval for a Single Value of Y, 620

**C.** Factors Influencing the Width of the Intervals, 622

**12.11** Hypotheses Test about the Population Correlation Coefficient, 623

**12.12** Testing Inferences about the Population Regression Coefficient, 626

**A.** Hypothesis Test for  $\beta_1$ , 627

**B.** A Confidence Interval for  $\beta_1$ , 630

**12.13** Analysis of Variance Revisited, 631

**12.14** Solved Problems, 632

**12.15** What You Should Have Learned from This Chapter, 642

**12.16** Computer Applications, 642

List of Symbols and Terms, 645

List of Formulas, 645

Chapter Exercises, 647

## CHAPTER 13

### MULTIPLE REGRESSION AND CORRELATION, 660

**13.1** Introduction, 660

**13.2** Formulation of the Model, 662

**A.** Ace's Objective, 662

**B.** The Normal Equations, 664

**C.** Ace's Solution, 665

**13.3** Evaluating The Model, 666

**A.** The Standard Error of the Estimate, 667

**B.** Evaluating The Model As a Whole, 668

**C.** Testing Individual Partial Regression Coefficients, 670

**13.4** Multiple Correlation, 678

**A.** The Adjusted Coefficient of Determination, 679

**13.5** The Presence of Multicollinearity, 681

**A.** Problems of Multicollinearity, 681

**B.** Detection of Multicollinearity, 682

**C.** Treating Multicollinearity, 684

**13.6** Comparing Regression Coefficients, 685

**13.7** An Expanded Model, 686

**13.8** Stepwise Regression, 686

**A.** Backward Elimination, 687

**B.** Forward Selection, 687

**13.9** What You Should Have Learned from This Chapter, 688

- 13.10** Computer Applications, 688
  - A.** Minitab, 688
  - B.** SAS, 690
  - C.** SPSS-X, 690

Appendix, 691

List of Symbols and Terms, 693

List of Formulas, 694

Chapter Exercises, 694

## CHAPTER 14

DUMMY VARIABLES AND RESIDUAL ANALYSIS:  
EXTENSIONS OF REGRESSION AND  
CORRELATION, 708

- 14.1** Introduction, 710
- 14.2** Dummy Variables, 710
- 14.3** Residual Analysis, 716
  - A.** Autocorrelation, 716
  - B.** Heteroscedasticity, 721
- 14.4** The Curvilinear Case, 723
  - A.** An Increasing Function, 724
  - B.** A Decreasing Function, 726
  - C.** Other Possibilities, 728
  - D.** Using Polynomial Models, 728
- 14.5** Solved Problems, 730
- 14.6** What You Should Have Learned from This Chapter, 733
- 14.7** Computer Application, 733
  - A.** Durbin-Watson Statistic, 733
  - B.** Plots of Residuals, 734

List of Symbols and Terms, 734

List of Formulas, 734

Chapter Exercises, 734

## CHAPTER 15

CHI-SQUARE AND OTHER NONPARAMETRIC  
TESTS, 742

- 15.1** Introduction, 744
- 15.2** Chi-Square Distribution— $\chi^2$ , 745
  - A.** Goodness-of-Fit Tests, 745
  - B.** Contingency Tables—A Test for Independence, 756

- 15.3** The Sign Test, 761
    - A.** The Use of Large Samples, 765
    - B.** A One-Sample Sign Test, 766
  - 15.4** Runs Test, 768
    - A.** Large-Sample Tests, 770
  - 15.5** The Mann-Whitney  $U$  Test, 772
    - A.** A Two-Tailed Test, 775
    - B.** A One-Tailed Test, 776
  - 15.6** Spearman Rank Correlation, 779
  - 15.7** The Kruskal-Wallis Test, 784
    - A.** Detecting Which Differences Are Significant, 788
    - B.** The Distinction between Parametric and Nonparametric Tests, 790
  - 15.8** Solved Problems, 791
  - 15.9** What You Should Have Learned from This Chapter, 796
  - 15.10** Computer Applications, 797
    - A.** Minitab, 797
- List of Symbols and Terms, 797
- List of Formulas, 797
- Chapter Exercises, 799

## CHAPTER 16

TIME-SERIES ANALYSIS AND FORECASTING, 812

- 16.1** Introduction, 814
- 16.2** Time Series and Their Components, 814
  - A.** Secular Trend, 816
  - B.** Seasonal Variation, 816
  - C.** Cyclical Variation, 817
  - D.** Irregular Variation, 818
- 16.3** Time-Series Models, 818
- 16.4** Smoothing Techniques, 819
  - A.** Moving Averages, 820
  - B.** Exponential Smoothing, 823
- 16.5** Decomposition of a Time Series, 827
  - A.** Secular Trend, 828
  - B.** Seasonal Variation, 832
  - C.** Cyclical Variation, 837
  - D.** Irregular Variation, 839
- 16.6** Solved Problems, 840
