List of authors.....	vi
Preface	vii
1. Satellite-based regional system for observation of forest response to global environmental changes	1
1.1 Introduction.....	1
1.2 Materials and methods.....	2
1.3 Results	9
1.4 Conclusion	12
2. Object-based classification of Landsat imagery and aerial photographs for land cover mapping in eCognition.....	15
2.1 Introduction.....	15
2.2 Geographic object-based image analysis	16
2.3 Object-based classification in eCognition.....	19
2.4 Case studies	22
2.5 Conclusion	30
3. Method for detection of small water bodies developed for purpose of cage fish farming in Eastern Africa	33
3.1 Introduction.....	33
3.2 The Method applied on Landsat data.....	34
3.3 Application on another satellite data	37
3.4 Results	38
3.5 Discussion / Conclusion	42
4. Constructing a Digital Terrain Model from LIDAR data.....	47
4.1 Introduction.....	47
4.2 State of the art.....	49
4.3 Methods	50
4.4 Result and discussion.....	54
4.5 Conclusion	58
5. Analysis of the surface of buildings using terrestrial hyperspectral data.....	61
5.1 Introduction.....	61
5.2 Spectral analyses	62
5.3 Hyperspectral data	63
5.4 The hyperspectral system.....	64
5.5 System empirical calibration method and system setting problems.....	66
5.6 The field experiment.....	68
5.7 Analysis of results	71
5.8 Conclusions.....	72
6. Dependence of PM₁₀ Particles Concentration on Aerosol Optical Thickness Value from the MODIS Data.....	75
6.1 Introduction.....	75

6.2	Data	76
6.3	Methodology	77
6.4	Results	81
6.5	Discussion	89
6.6	Conclusion	89
7.	Monitoring of Precipitable water vapour by GPS under extreme weather conditions	93
7.1	Introduction	93
7.2	Precipitable water vapour and methods of its determination	93
7.3	Processing	94
7.4	Visualization of computed results	96
7.5	Confrontation of values obtained from GPS measurements with results from other methods	97
7.6	Conclusion	101
8.	Stochastic approach for determining landslide activity	105
8.1	Introduction	105
8.2	Landslides and their monitoring	106
8.3	Experimental site and plot design	107
8.4	Statistical methods for landslides determination	109
8.5	Models	111
8.6	Results	114
8.7	Discussion	116
8.8	Conclusions	117
9.	Statistical estimation of land uplift model parameters based on various data sets	121
9.1	Introduction	121
9.2	Pâsse's uplift model	122
9.3	Refinement of Pâsse's uplift model	126
9.4	Results	129
9.5	UNTAMO toolbox	130
9.6	Discussion and conclusions	133
10.	Mapping and Monitoring of Socially Excluded Localities in Ostrava City	135
10.1	Introduction	135
10.2	Data processing	136
10.3	Identification of socially excluded localities in the city	139
10.4	Monitoring of selected localities	143
10.5	Discussion	146
10.6	Conclusion	148
11.	Simulation of commuting by carpooling in the Czech Republic	151
11.1	Introduction	151
11.2	Carpooling: ride-sharing, car-sharing	151
11.3	Methodology	153
11.4	Carpooling versus other transport modes	156
11.5	Cluster of employers based on commuting by travel mode	158
11.6	Conclusions	160

12. Statistical inferences – visualization possibilities and fuzzy approach computing	163
12.1 Introduction	163
12.2 Public database and its geovisualization possibilities.....	164
12.3 Case study - Visualization of statistical inferences in the definition of rural area using fuzzy methods	167
12.4 Conclusion	176
Index	179
About authors.....	183
